

Contents

Part I Fundamentals and Modeling

| | |
|---|------------|
| Colloidal Particles in Thin Liquid Films. | 3 |
| Yan Zeng, Sebastian Schön, Adrian Carl and Regine von Klitzing | |
| Colloidal Gels Formed by Dilute Aqueous Dispersions of Surfactant and Fatty Alcohol. | 21 |
| Felix Grewe, Jochen Ortmeyer, Roxana Haase and Claudia Schmidt | |
| Resolved Numerical Simulation of Particle Agglomeration | 45 |
| M. Ernst and M. Sommerfeld | |
| Small-Molecule Stabilization Mechanisms of Metal Oxide Nanoparticles | 73 |
| S. Zellmer, C. Grote, T.A. Cheema and G. Garnweitner | |
| Liquid Distribution and Structural Changes During Convective Drying of Gels | 93 |
| Abdolreza Kharaghani, Christoph Kirsch, Thomas Metzger and Evangelos Tsotsas | |
| Large Amplitude Oscillatory Shear Applications for the Characterization of Dispersed Systems | 113 |
| D. Merger, K. Reinheimer, M. Grosso, J.M. Brader, M. Ballauff, J. Kim, M.E. Helgeson and M. Wilhelm | |

Part II Colloidal Systems with Solid Disperse Phase

| | |
|---|------------|
| Simulating the Restructuring of Colloidal Aggregates | 145 |
| Vincent Bürger, Eva Schlauch, Volker Becker, Ryohei Seto, Marek Behr and Heiko Briesen | |

| | |
|--|------------|
| Gelation, Fragmentation and Reorganization of Precipitated Silica | 175 |
| Sebastian Wilhelm and Matthias Kind | |

| | |
|--|------------|
| Synthesis, Structure and Mechanics of Nano-Particulate Aggregates | 205 |
| Carsten Schilde and Arno Kwade | |

| | |
|--|------------|
| Aggregation and Deformation Induced Reorganisation of Colloidal Suspension. | 221 |
| Günter K. Auernhammer, Doris Vollmer, Miao Wang, Marcel Roth and Maria D'Acunzi | |

| | |
|--|------------|
| Fluidization of Highly Concentrated Colloidal Dispersions by Tailoring of Attractive Interactions | 243 |
| E. Bartsch, D. Burger, S. Burger, J. Gisin, R. Schneider, O. Thorwarth, J. Vesaratchanon, C. Weis, M. Wiemann and N. Willenbacher | |

| | |
|--|------------|
| Process Engineering of Nanoparticles Below 20 nm— A Fundamental Discussion of Characterization, Particle Formation, Stability and Post Processing | 279 |
| Doris Segets and Wolfgang Peukert | |

Part III Colloidal Systems with Liquid Disperse Phase

| | |
|---|------------|
| Thermodynamic Models for the Adsorption of Alkyl Trimethyl Ammonium Bromides at the Water/Hexane Interface | 309 |
| N. Mucic, A. Javadi, J. Krägel, M. Karbaschi, E.V. Aksenenko, V.B. Fainerman and R. Miller | |

| | |
|---|------------|
| Filled Vesicles Formed by Phase Transfer of Emulsions or Microemulsions. | 323 |
| Christian Strötges, Evelin Schmitte and Heinz Rehage | |

Part IV New Process Routes

| | |
|---|------------|
| Continuous Preparation of Polymer/Inorganic Composite Nanoparticles via Miniemulsion Polymerization | 345 |
| Tobias Merkel, Lena L. Hecht, Alexander Schoth, Caroline Wagner, Rafael Muñoz-Espí, Katharina Landfester and Heike P. Schuchmann | |
| Process Development of a Liquid-Liquid Phase Transfer of Colloidal Particles for Production of High-Quality Organosols | 371 |
| Jacqueline V. Erler, Stefanie Machunsky, Steffen Franke, Philipp Grimm, Hans-Joachim Schmid and Urs A. Peuker | |

Colloid Process Engineering

Kind, M.; Peukert, W.; Rehage, H.; Schuchmann, H.P.
