

Contents

1	Overview	1
1.1	Spectrum Under-Utilization Issue	1
1.2	Social Cognitive Radio Networks	2
1.3	Related Research	3
	References	4
2	Adaptive Channel Recommendation Mechanism	7
2.1	Introduction	7
2.2	System Model	9
2.3	Introduction to Channel Recommendation	11
2.3.1	Review of Static Channel Recommendation	12
2.3.2	Motivations for Adaptive Channel Recommendation	13
2.4	Adaptive Channel Recommendation with Channel Homogeneity	14
2.4.1	MDP Formulation for Adaptive Channel Recommendation	15
2.4.2	Existence of Optimal Stationary Policy	16
2.4.3	Structure of Optimal Stationary Policy	16
2.5	Model Reference Adaptive Search for Optimal Spectrum Access Policy	17
2.5.1	Model Reference Adaptive Search Method	18
2.5.2	Model Reference Adaptive Search for Optimal Spectrum Access Policy	19
2.5.3	Convergence of Model Reference Adaptive Search	22
2.6	Adaptive Channel Recommendation with Channel Heterogeneity	22
2.7	Adaptive Channel Recommendation in General Channel Environment	24

2.8	Simulation Results	25
2.8.1	Simulation Setup	26
2.8.2	Heuristic Heterogenous Channel Recommendation . . .	28
2.8.3	Simulation with Real Channel Data.	29
2.9	Summary	32
	References.	32
3	Imitative Spectrum Access Mechanism.	35
3.1	Introduction	35
3.2	System Model	36
3.2.1	Spectrum Sharing System Model	36
3.2.2	Social Information Sharing Graph.	39
3.3	Imitative Spectrum Access Mechanism	40
3.3.1	Expected Throughput Estimation	40
3.3.2	Imitative Spectrum Access.	43
3.4	Convergence of Imitative Spectrum Access	44
3.4.1	Cluster-Based Graphical Representation of Information Sharing Graph.	45
3.4.2	Dynamics of Imitative Spectrum Access	47
3.4.3	Convergence of Imitative Spectrum Access	49
3.5	Imitative Spectrum Access with User Heterogeneity	51
3.6	Simulation Results	52
3.6.1	Imitative Spectrum Access with Homogeneous Users.	53
3.6.2	Imitative Spectrum Access with Heterogeneous Users.	56
3.6.3	Performance Comparison.	57
3.7	Summary.	59
	References.	59
4	Evolutionarily Stable Spectrum Access Mechanism.	61
4.1	Introduction	61
4.2	System Model	62
4.3	Overview of Evolutionary Game Theory	64
4.3.1	Replicator Dynamics.	64
4.3.2	Evolutionarily Stable Strategy.	65
4.4	Evolutionary Spectrum Access	66
4.4.1	Evolutionary Game Formulation	66
4.4.2	Evolutionary Dynamics	67
4.4.3	Evolutionary Equilibrium in Asymptotic Case $\lambda_{max} = \infty$	68
4.4.4	Evolutionary Equilibrium in General Case $\lambda_{max} < \infty$	69

4.5	Learning Mechanism for Distributed Spectrum Access.	69
4.5.1	Learning Mechanism for Distributed Spectrum Access.	70
4.5.2	Convergence of Learning Mechanism	72
4.6	Simulation Results	73
4.6.1	Evolutionary Spectrum Access in Large User Population Case	73
4.6.2	Distributed Learning Mechanism in Large User Population Case	77
4.6.3	Evolutionary Spectrum Access and Distributed Learning in Small User Population Case	77
4.6.4	Performance Comparison	79
4.7	Summary	81
	References.	81
5	Conclusion	83
