

Contents

1	Introduction	1
1.1	Molecular Modeling Methods	3
1.2	Nanotoxicity Modeling	5
1.3	Nanomedicine: Implications from Nanotoxicity	10
	References	13
2	Fullerene and Derivatives	17
2.1	Introduction	17
2.2	Fullerene Inhibition of HIV Protease	18
2.3	Fullerene Induced Antibody and Related Interaction	21
2.4	Antitumor Nanomedicinal Effect of Gd@C ₈₂ (OH) ₂₂	23
2.4.1	Inhibitory Mechanism of Gd@C ₈₂ (OH) ₂₂ on MMP-9	24
2.4.2	Mechanical Impact of Gd@C ₈₂ (OH) ₂₂ on Collagen Complexes	29
2.5	Gd@C ₈₂ (OH) ₂₂ Inhibition of Protein–Protein Interaction	31
2.5.1	Direct Inhibition of WW-Domain	31
2.5.2	Indirect Inhibition of SH3-Domain	33
2.6	Metallofullerenol Gd@C ₈₂ (OH) ₂₂ Force Field Development	34
2.6.1	Force Field Parameterization from Quantum Mechanics	35
2.6.2	Validation of Gd@C ₈₂ (OH) ₂₂ Force Field Parameters	35
2.7	Summary and Future Perspectives	37
	References	38
3	Carbon Nanotubes	45
3.1	Introduction	45
3.2	Protein–CNT Binding and Associated Nanotoxicity	46
3.3	Potential Molecular Mechanisms of CNT’s Toxicity	48
3.3.1	Disruption of Protein Active Sites	49
3.3.2	Competitive Binding with Ligands to Receptors	51

3.4	Driving Forces for Protein–CNT Binding	53
3.4.1	π – π Stacking Interaction	53
3.4.2	Hydrophobic Interaction	54
3.4.3	Electrostatic Interaction	55
3.5	Summary and Future Perspectives	55
	References	56
4	Graphene and Derivatives	61
4.1	Introduction	61
4.2	Graphene Disruption to Protein Structure and Function	62
4.2.1	Graphene Interaction with a Model Protein	63
4.2.2	Comparison Among C60, CNT, and Graphene	65
4.3	Graphene Disruption to DNA	67
4.4	Graphene Disruption to Cell Membranes	69
4.4.1	<i>E. coli</i> Membranes	70
4.4.2	Mammalian Cellular Membranes	76
4.5	Summary and Future Perspective	83
	References	84
5	Graphyne and Derivatives	89
5.1	Introduction	89
5.2	Graphyne-Mediated Interruption of a Protein–Protein Interaction	91
5.2.1	Graphyne Cutting a Protein Dimer	93
5.2.2	Molecular Mechanism of the Dimer Cutting	95
5.3	Comparison with Graphene Insertion	96
5.4	Summary and Future Perspectives	98
	References	98
6	Noble Metal Nanomaterials	101
6.1	Introduction	101
6.2	Gold Nanomaterials	102
6.2.1	Peptide-Coated Gold Nanocluster Inhibition of TrxR1	102
6.2.2	Gold Nanorod Protein Corona with BSA	105
6.3	Silver Nanomaterials	107
6.4	Summary and Future Perspectives	109
	References	110
7	Metal Oxides and Related Nanostructures	115
7.1	Introduction	115
7.2	TiO ₂ Nanoparticle Interaction with Proteins	116
7.2.1	TiO ₂ Force Field Reparametrization	117
7.2.2	TiO ₂ Interaction with SH3-Domain and HSA	118

7.3	MoS ₂ Nanosheet Interaction with Proteins	122
7.4	Nanotoxicity of Other Metal Oxides	125
7.5	Summary and Future Perspectives	126
	References	127
8	Quantum Dots and Their Ligand Passivation	131
8.1	Introduction	131
8.2	(CdSe) ₁₃ Coating with Ligands	133
8.2.1	Blue-Shifts in UV-vis Spectra Due to Ligand Passivation	135
8.2.2	Changes in Density of States (DOSs) upon Ligand Passivation	137
8.3	(CdSe) ₁₃ Coating with Small Organics	138
8.4	Summary and Future Perspectives	141
	References	142
9	Nanomedicine: Implications from Nanotoxicity	147
9.1	Introduction	147
9.2	Antitumor Metallofullerenol Nanodrugs	148
9.3	Antibacterial Graphene and Graphene Oxide	154
9.3.1	Two Types of Molecular Mechanisms	154
9.3.2	Applications as Green “Graphene-Bandages”	157
9.4	Nanodrugs that Induce Autophagy	160
9.5	Nanodrugs Assisted by External Triggers	161
9.6	Summary and Future Implications	163
	References	164
	Appendix: The π–π Interactions Revisited: Comparison of Classical and Quantum Mechanical Calculations	169
	Index	189

Modeling of Nanotoxicity
Molecular Interactions of Nanomaterials with
Bionanomachines

Zhou, R.

2015, XIII, 189 p. 61 illus., 56 illus. in color., Hardcover

ISBN: 978-3-319-15381-0
