

Contents

1	Introduction: Drinking Water Management.	1
1.1	Introduction	1
1.2	Introduction to Waterborne Diseases Outbreaks	2
1.3	Lessons from Disease Outbreaks.	3
1.4	Overview of the Rest of the Book.	9
	References	10
2	Principles for Sound Drinking Water Management: A Review	11
2.1	Introduction	11
2.2	Source Water Protection	11
2.2.1	Point Source Pollution.	12
2.2.2	Nonpoint Source Pollution.	13
2.3	Classification of Treatment Technologies.	14
2.4	Risk Assessment in Water Treatment.	21
2.4.1	Hazard Analysis and Critical Control Point (HACCP) Protocol	21
2.5	Water Infrastructure Asset Management.	23
2.6	Planned Elimination of Long-Term Risks.	25
2.7	Conclusion.	26
	References	26
3	Canadian Small Water Systems: Demand and Treatment Costs	29
3.1	Introduction	29
3.2	Conservation and Water Demand Management.	30
3.3	Analysis of Small Municipal Water Consumption:	
	A Panel Data Analysis.	33
3.3.1	Description of the Data	33
3.3.2	Panel Data Estimation	36
3.3.3	Panel Data Estimates.	37

3.4	Analysis of Small Municipal Water Treatment Costs: A Nonparametric and Semiparametric Approach for the Evidence of Economies of Scale.	39
3.4.1	Description of the Data	39
3.4.2	Introduction to Semiparametric Regression.	39
3.4.3	Semiparametric Estimation.	40
3.4.4	Semiparametric Estimates.	41
3.4.5	Nonparametric Estimates	41
3.4.6	Summary of the Section	43
3.5	Estimating the Differential Costs of Treatment Train Components: A Semiparametric Approach with Clustered Data	44
3.6	Conclusions	47
	References	55
4	Water Policy in Ontario	57
4.1	Introduction	57
4.2	Introduction to Drinking Water Systems in Ontario.	57
4.3	Watershed Protection in Ontario	59
4.4	Ontario Water Quality Standards.	66
4.5	Remaining Problems	68
4.5.1	Low Standards for Chemical Parameters in Drinking Water Supplies	69
4.5.2	Nutrient and Algal Issues.	71
4.5.3	Chemicals of Emerging Concern in Water Sources	72
4.5.4	Review of the Effectiveness of Wastewater Treatment (WWT) and Water Treatment (WT) Technologies	75
4.6	Canada-US Great Lakes Water Quality Agreement	81
4.7	Conclusion.	84
	References	85
5	An In-Depth Study of Water Demand: An Ontario Case Study	89
5.1	Introduction	89
5.2	Descriptions of Ontario Municipal Water Consumption Data	90
5.2.1	The Data	90
5.2.2	Water Demand Equation	96
5.3	Analysis of Ontario Municipal Water Consumption using Panel Data.	97
5.3.1	Introduction to Panel Data	97
5.3.2	Two-Way Random Effects Model Estimation.	98

5.3.3	Interpretation of the Continuous Variables and the Associated Slope Dummy Variables.	99
5.3.4	Interpretation of the Intercept Dummy Variables.	101
5.4	A Nonparametric Regression Estimate for Ontario	101
5.4.1	The Nadaraya-Watson Kernel Method of Nonparametric Regression	102
5.4.2	The Nadaraya-Watson Kernel Estimation	104
5.4.3	Examining the Predicted Values of Per Capita Consumption	104
5.4.4	A Nonparametric Regression Analysis for 2009	107
5.4.5	Predicted Values for Specific Municipalities in 2009	110
5.4.6	High Price Elasticities or Income Elasticities of Demand for Specific Municipalities in 2009.	113
5.5	General Conclusions of the Demand Analysis.	114
5.5.1	Effects of Price Elasticity for Water Demand	115
5.5.2	Effects of Income Elasticity for Water Demand	115
5.5.3	Effects of Water Metering and Pricing Structures	116
5.5.4	Other Effects	116

6.1	Introduction	127
6.2	The Profile of Public Water Systems in Newfoundland and Labrador	128
6.2.1	Source Water Quality and Disinfection	130
6.2.2	Aesthetics	132
6.2.3	Health	134
6.2.4	Relationship to Boil Water Advisories (BWAs)	134
6.2.5	Disinfection Methods	135
6.2.6	Treatment Process Distribution	136
6.2.7	Geography and Governance	137
6.3	Government Policy and Regulations	138
6.3.1	Government Policy	138
6.3.2	Multi-Barrier Strategic Action Plan (MBSAP) Level 1.	138
6.3.3	Multi-Barrier Strategic Action Plan Level 2	140
6.3.4	Boil Water Advisories	142
6.3.5	Data Management and Reporting	145
6.3.6	Inspection and Enforcement	146
6.3.7	Operator Training and Education	147

6.4	Finance and Pricing	148
6.4.1	Finance: Budget and Water Rates	148
6.4.2	Operator Wages and Employment	149
6.4.3	Capital Funding for Water Systems	150
6.5	Policy for Potable Water Dispensing Units (PWDUs)	151
6.5.1	Summary Statistics	151
6.5.2	PWDU Characteristics	152
6.6	Statistical Analysis: Risk and Health	152
6.6.1	Introduction	152
6.6.2	Water Systems Failure and Boil Water Advisories in Canada	154
6.7	The Statistical Model and Methodology	156
6.7.1	The Statistical Model	156
6.7.2	Data Analysis	158
6.7.3	Methodological Issues	159
6.7.4	Estimated Statistical Results	160
6.7.5	Model Fit for Probit Analysis: Sensitivity versus Specificity	163
6.7.6	Ranking of Factors Based on Associated Risk of Water System Failure	165
6.8	Conclusion	167
	References	168
