1	Introduction	1
1.1	Production-Based vs. Consumption-Based Policy Orientation	2
1.2	Consumption-Based Approaches and Policy Effectiveness	3
1.3	Two Strands of Literature and a Controversial Political Debate	6
1.4	Methodology, Structure, and Research Objectives	9
1.4.1	A Common Perspective on Hitherto Separate Literature Strands	9
1.4.2	Theoretical Analysis	10
1.4.3	Policy Design and the Practicability of Consumption-Based Policies	12
	References	13

Part I The Economic, Political, and Legal Background

2	Consumption as a Base for Emission Accounting and as a Policy Base	17
2.1	Production- and Consumption-Based Emission Inventories	18
2.1.1	Emission Accounting Concepts	18
2.1.2	Determining a Country's Consumption-Based Emissions	21
2.2	Consumption-Based Emissions as a Policy Base	23
2.2.1	Target Base vs. Tax Base	23
2.2.2	The Tax Base: Production vs. Consumption	25
2.2.3	Implementing a Consumption-Based Policy	26
2.3	Evaluating Different Policy Variants	29
2.3.1	Criteria to Evaluate a Policy's Effectiveness	29
2.3.2	Carbon Leakage	31
2.3.2.1	Policy-Induced Carbon Leakage	31
2.3.2.2	Consumption-Induced Carbon Leakage	33

2.3.3	Criteria to Evaluate the Relative Performance of Different Regions	35
2.4	A Simplified Framework for Analysis	38
	References	39
3	The Political and Legal Background to the Discussion About Consumption-Based Policies	41
3.1	Border Carbon Adjustments: A Politically Controversial Idea . . .	41
3.2	Consumption-Based Policies and World Trade Law	46
	References	50
4	Unilateral Climate Policies: The Theoretical Economic Background	53
4.1	Optimal Unilateral Abatement Policies	54
4.2	Analysis of Carbon Leakage and Possible Counter-Measures . . .	56
4.3	Macroeconomic Effects Not Depicted in Simple Models	59
	References	60
5	Quantitative Studies of Carbon Leakage and the Effects of Border Adjustments	63
5.1	Quantitative Estimates of Carbon Leakage	64
5.1.1	<i>Ex Ante</i> Studies	64
5.1.2	<i>Ex Post</i> Studies	65
5.1.3	Apportioning Overall Leakage: Which Channels Are Relevant?	67
5.1.4	Parameters Driving Leakage	68
5.2	The Effects of Border Carbon Adjustments	70
5.2.1	Sectoral Studies	71
5.2.2	General Equilibrium Studies	74
5.2.2.1	Leakage Channels	75
5.2.2.2	Model Structure	76
5.2.2.3	Import Tariffs vs. Full Carbon Adjustments . . .	77
5.2.2.4	Calculating the Carbon Content	78
5.2.2.5	Producer Response	81
5.2.3	Cost-Effectiveness	83
5.2.4	International Distribution of the “Burden” of the Policy	84
5.3	Conclusion	86
	References	88
6	Literature on Emissions Embodied in Trade	91
6.1	Trends in Emission Transfers via International Trade	93
6.2	Policy Proposals Focusing on Environmental Effectiveness . . .	96
6.2.1	Leakage and the Share of Global Emissions Targeted by Climate Policy	96
6.2.2	Comparative Advantage and Technology Diffusion . . .	99

6.3	“Responsibility” for Emissions and the Question of Justice	101
6.3.1	Definitions and Basic Concepts	102
6.3.2	Attributing “Responsibility for Emissions”: A Literature Review	103
6.3.3	Contribution of the Research Project “RESPONSE” . . .	106
6.4	Conclusion	109
	References	112

Part II Theoretical Analysis

7	Evaluating a Shift to a Consumption-Based Climate Policy: Objectives and Analytical Tools	117
7.1	Objectives of the Theoretical Analysis	118
7.1.1	Analytical Approach	119
7.1.2	Coalition Size, Parameters, Tax Design: Which Factors Are Decisive?	122
7.2	Partial Equilibrium Climate Policy Model	123
7.2.1	Production	124
7.2.2	Emissions	126
7.2.3	Demand and Goods Market Equilibrium	127
	References	129
8	Effects of Policy Transmission via Non-Energy Markets	131
8.1	Policy Effects for a Single Sector	133
8.2	Production-Based Policy	136
8.2.1	Global Emission Reduction and Carbon Leakage	136
8.2.2	Effects of a Production-Based Policy on Competitiveness	140
8.3	Consumption-Based Policy	141
8.3.1	Global Emission Reduction and Carbon Leakage	141
8.3.2	The Role of Specific Model Assumptions	142
8.3.3	Effects of a Consumption-Based Policy on Competitiveness	145
8.3.4	Border Tax Design and Producer Response	145
8.4	Policy Evaluation in Terms of Environmental Effectiveness . . .	148
8.4.1	Equal Reduction of Emissions Targeted	148
8.4.2	Equal Tax Rate	149
8.5	Switching the Tax Base, But Not the Target Base	153
8.6	Policy with Import Tax, but Without Export Rebate	155
8.6.1	Environmental Effectiveness of “Import-Tax-Only” Policy	156
8.6.2	Impact of an “Import-Tax-Only” Policy on Competitiveness	159

8.7	Climate Policy Costs	159
8.7.1	Policy Evaluation in Terms of Cost-Effectiveness	160
8.7.2	Welfare Effects of an Emission Tax	164
8.7.3	Distributional Impacts of the Different Policy Variants	167
8.7.4	Costs vs. Competitiveness Effects as Measures of the “Policy Burden”	170
8.8	Conclusion	171
	Appendix 1: Relationships Between the Price Elasticities of Demand of the Representative Consumers of the Model	176
	Appendix 2: Relationships Between Elasticities Following from the Cournot Aggregation Condition	178
	References	179
9	Policy Transmission Through Energy Markets, Income Effects, and Technological Spillovers	181
9.1	Policy Transmission via Energy Markets	182
9.1.1	The Transmission Mechanism	182
9.1.2	Energy Market Effects and Global Emission Reduction	185
9.1.3	Comparing the Policy Variants in Terms of Environmental Effectiveness	186
9.1.4	Practical Implications of the Impact of the Fuel Market on Emissions	189
9.1.5	Climate Policy Costs	191
9.2	Abatement via Income Effects and Its Distributional Implications	192
9.2.1	Distributional Effects of Climate Policy	193
9.2.2	The Income Channel of Policy Transmission	197
9.3	Policy Transmission Through Technological Spillovers	197
9.4	Limitations to an Analysis Relying on Simplified Models	198
9.5	Conclusion	199

Part III Implementing Consumption-Based Policy Approaches

10	Design Options for Consumption-Based Policy Approaches: A Literature Review	205
10.1	Making Border Carbon Adjustments Politically Acceptable . . .	206
10.1.1	Objectives of Border Adjustments and Their Legitimacy	207
10.1.2	Border Carbon Adjustments as a Win-Win Scenario? . . .	209
10.1.3	Export Taxes: A Feasible Alternative to Import Tariffs?	211

10.1.4	Compensating Developing Countries for Income Losses	212
10.1.5	A Multilateral Approach to the Introduction of Border Adjustments	215
10.2	Border Adjustment Design Proposals	216
10.2.1	The Proposal of Ismer and Neuhoff	217
10.2.2	The Proposal of Monjon and Quirion	218
10.2.3	The Proposal of Cosbey et al.	220
10.2.4	The Proposal of Gros et al.	223
10.2.5	Relying on Benchmarks and Taxing Only Basic Commodities	224
	References	225
11	Consumption-Based Climate Policy in Practice: Abatement Potentials Difficult to Exploit	227
11.1	Criteria for Assessing Policy Variants	228
11.2	Conditions Favoring the Effectiveness of Consumption-Based Approaches	229
11.3	Designing an Effective and Just Consumption-Based Policy . . .	230
11.3.1	The Use of Tax Revenues	230
11.3.2	Technology Transfer	232
11.3.3	No Export Rebate?	232
11.3.4	Incentives to “Green” Production	234
11.4	Policy Implementation in the Short Run: Border Adjustments . .	234
11.5	Policy Implementation in the Long Run: Carbon-Added Scheme	240
11.6	Conclusion	241
	References	242
12	Conclusion	243
