

Contents

1	Introduction	1
1.1	General	1
1.2	Sources of Energy	1
1.2.1	Renewable Energy	2
1.2.2	Nonrenewable Energy	5
1.3	Fossil Fuel Power Plants	5
1.4	Nuclear Power Plants	7
1.5	Definition of Risk	10
1.6	Risk from Various Hazards	10
1.7	History of Accidents	12
1.7.1	Three Mile Island Accident	12
1.7.2	Chernobyl Accident	13
1.7.3	Fukushima Accident	13
1.8	Need for Risk Assessment	15
1.9	Organization of the Book	16
	References	17
2	Basics of Reliability	19
2.1	Introduction	19
2.2	Probability Theory	21
2.2.1	Random Experiment	21
2.2.2	Sample Space	21
2.2.3	Event	22
2.2.4	Probability	22
2.2.5	Axioms of Probability	22
2.3	Random Variable	24
2.3.1	Discrete Random Variable	25
2.3.2	Continuous Random Variable	32
2.4	The Reliability Function	53

- 2.5 Measures of Reliability 57
 - 2.5.1 Mean Time to Failure 58
 - 2.5.2 Median Time to Failure. 58
 - 2.5.3 Mode 59
 - 2.5.4 Variance 60
- 2.6 Hazard Rate Function 64
- 2.7 Life Characteristic Curve. 66
- References 71

- 3 Risk Analysis of Nuclear Power Plants 73**
 - 3.1 Introduction 73
 - 3.2 Nuclear Power Plants 74
 - 3.3 Safety Objectives of NPPs. 75
 - 3.3.1 Radiation Protection Objective 75
 - 3.3.2 Technical Safety Objectives 76
 - 3.4 Safety Analyses 77
 - 3.4.1 Deterministic Safety Analyses 77
 - 3.4.2 Probabilistic Safety Assessment 78
 - 3.5 Level 1 PSA 80
 - 3.5.1 Scope 80
 - 3.5.2 Procedure 81
 - 3.5.3 Event Tree Analysis 85
 - 3.5.4 Fault Tree Analysis 89
 - 3.5.5 Common Cause Failures 94
 - 3.5.6 Common Cause Failure Models 96
 - 3.5.7 Component Failure Probability Models 104
 - 3.5.8 Estimation of Parameters of Failure Models. 109
 - 3.5.9 Parameter Estimation Using Bayesian Analysis 112
 - 3.5.10 Human Reliability Analysis 120
 - 3.5.11 Uncertainty Analysis. 120
 - 3.5.12 Importance Analysis 122
 - 3.6 Level 2 PSA 124
 - 3.6.1 Objectives of Level 2 PSA 125
 - 3.6.2 Steps in Level 2 PSA 125
 - 3.6.3 Plant Damage States 126
 - 3.6.4 Accident Progression 128
 - 3.6.5 Containment Analysis 128
 - 3.6.6 Containment Event Tree Development 129
 - 3.6.7 Reliability Analysis of Containment ESFs 131
 - 3.6.8 Containment Failure Modes 131
 - 3.6.9 Release Categorization and Source Term Analysis 133
 - 3.6.10 Frequencies of Release Categories 133

- 3.7 Level 3 PSA 133
 - 3.7.1 The Input and Output 133
 - 3.7.2 Source Term 134
 - 3.7.3 Meteorological Data and Its Sampling. 135
 - 3.7.4 Atmospheric Dispersion and Deposition 136
 - 3.7.5 Exposure Pathways and Dose Assessment. 150
 - 3.7.6 Countermeasures 154
 - 3.7.7 Health Effects 156
 - 3.7.8 Population and Economic Data 157
 - 3.7.9 Complementary Cumulative Frequency Distributions . . . 157
- 3.8 Applications of PSA 157
- 3.9 Case Study: Level 1, 2, and 3 PSA Analysis 159
 - of a Typical NPP 159
 - 3.9.1 Level 1 PSA 159
 - 3.9.2 Level 2 PSA 165
 - 3.9.3 Level 3 PSA 171
- References 174

- 4 Seismic PSA of Nuclear Power Plants 177**
 - 4.1 Introduction. 177
 - 4.2 Probabilistic Seismic Hazard Analysis. 180
 - 4.2.1 The Poisson Process 180
 - 4.2.2 Identification of Fault Sources 184
 - 4.2.3 Recurrence Relationship 185
 - 4.2.4 Source-to-Site Distance 194
 - 4.2.5 Attenuation Relationships 200
 - 4.2.6 Conditional Probability of Exceedence 201
 - 4.2.7 Determining the Hazard at the Site. 205
 - 4.2.8 Logic Tree Methods 238
 - 4.3 Seismic Fragility Evaluation 241
 - 4.4 Accident Sequence Analysis 243
 - 4.4.1 Seismic Event Trees 243
 - 4.4.2 Seismic Fault Trees 244
 - 4.4.3 Accident Sequence Evaluation 252
 - References 253

- 5 Reliability Analysis of Passive Systems 255**
 - 5.1 Introduction. 255
 - 5.2 Active and Passive Systems. 255
 - 5.3 Need for Passive Systems 256
 - 5.4 Categorization of Passive Systems 257

5.5	Various Passive Systems Used in Advanced Reactors	257
5.5.1	High Pressure Injection by Using Accumulators	257
5.5.2	Low Pressure Gravity Driven Water Tank	258
5.5.3	Passive Isolation Condenser System	259
5.5.4	Passive Containment Cooling System	259
5.5.5	Passive Poison Injection System	261
5.6	Issues Related to Passive Systems	261
5.7	Need for Estimating Reliability of Passive Systems	262
5.8	Passive System Reliability	265
5.8.1	REPAS Methodology	265
5.8.2	RMPS Methodology	274
5.8.3	APSR Methodology	282
5.8.4	Fuzzy Monte Carlo Simulation Approach	288
5.9	Mechanistic Modeling Approach	295
5.9.1	The Approach	298
5.9.2	Control Valves	299
5.9.3	A Case Study on Feed Water System	303
	References	304
6	Time-Variant Reliability Analysis	307
6.1	Introduction	307
6.2	Different Types of Load Actions	308
6.3	Failure Probability Formulations	309
6.4	Stress–Strength Interference Model	314
6.5	Poisson Process	318
6.6	Stochastic Fatigue Loading	319
6.6.1	Representing Random Sequence Loading as Random Cyclic Loading	320
6.6.2	A Case Study on Nuclear Piping	323
6.7	Out Crossing Approach	329
6.8	Strength Degradation	334
6.8.1	Stress Corrosion Cracking	335
6.8.2	Intergranular Stress Corrosion Cracking	335
6.8.3	Primary Water Stress Corrosion Cracking	335
6.8.4	Erosion Corrosion or Flow Accelerated Corrosion	335
6.8.5	Crevice Corrosion and Pitting	336
6.8.6	Erosion–Cavitation	336
6.8.7	Thermal Fatigue	336
6.8.8	Vibration Fatigue	337
6.8.9	Water Hammer	337
6.9	Stress Corrosion Cracking	337
6.9.1	Time to Initiation	339
6.9.2	Crack Size at Initiation	340
6.9.3	Crack Propagation Due to SCC	340

- 6.9.4 Failure Criteria 341
- 6.9.5 Simulation 343
- 6.10 Case Study on PDHR System 343
 - 6.10.1 System Description 343
 - 6.10.2 Stochastic Fatigue Loading 345
 - 6.10.3 Stress Corrosion Cracking 350
- 6.11 Time-Dependent CDF Analysis 357
- References 361

- 7 Risk Management of Nuclear and Thermal Power Plants. 363**
 - 7.1 Introduction 363
 - 7.2 Risk Monitor 365
 - 7.2.1 Necessity of Risk Monitor 366
 - 7.2.2 Various Modules of Risk Monitor 367
 - 7.2.3 Applications of Risk Monitor 371
 - 7.3 Probabilistic Precursor Analysis 374
 - 7.3.1 Approaches for Precursor Analysis 374
 - 7.3.2 PSA-Based Precursor Analysis 374
 - 7.4 A Case Study on NPP Events 376
 - 7.4.1 PPA for Plant 1 376
 - 7.4.2 PPA for Plant 2 378
 - 7.5 Risk-Based Inspection of Thermal Power Plants 380
 - 7.5.1 Calculation of Risk 381
 - 7.5.2 Risk Matrix 387
 - 7.5.3 Effect of Inspection Intervals on Risk 389
 - 7.5.4 Inspection Strategies Based on Risk 389
 - References 392

- Appendix A: Response Surface Methodology 395**
- Appendix B: Simulation Techniques 403**
- Appendix C: Fuzzy Set Theory 413**
- Appendix D: Stochastic Process Theory 417**
