

Contents

1	Introduction	1
1.1	Motivations	1
1.2	Software Security	4
1.3	Model-Driven Engineering	6
1.4	Unified Modeling Language	7
1.5	Aspect-Oriented Paradigm	8
1.6	Outline	9
2	Unified Modeling Language	11
2.1	Why Unified Modeling Language?	11
2.2	UML Structure	12
2.3	UML Views and Concepts	13
2.4	UML Diagrams	15
2.5	UML Extension Mechanisms	18
2.5.1	Stereotypes and Tagged Values	18
2.5.2	Constraints	18
2.6	Object-Constraint Language	18
2.7	Executable UML	19
2.7.1	Foundational UML	19
2.7.2	Action Language for Foundational UML	21
2.8	Conclusion	22
3	Aspect-Oriented Paradigm	23
3.1	AOP Models	24
3.1.1	Pointcut-Advice Model	24
3.1.2	Multi-Dimensional Separation of Concerns Model	26
3.1.3	Adaptive Programming Model	26
3.2	AOP and Security	27
3.3	Basic Constructs of the Pointcut-Advice Model	28
3.3.1	Aspects	28
3.3.2	Join Points	28

3.3.3	Pointcuts	28
3.3.4	Advices	31
3.3.5	Introductions	32
3.4	Aspect-Oriented Modeling	32
3.5	Conclusion.	33
4	Model-Driven Architecture and Model Transformations	35
4.1	MDA Layers	37
4.1.1	Computation Independent Model (CIM).	37
4.1.2	Platform Independent Model (PIM).	37
4.1.3	Platform Specific Model (PSM)	37
4.1.4	Implementation Specific Model (ISM).	38
4.2	MDA Benefits	38
4.3	MDA Transformations.	39
4.4	Applications of Model Transformations	40
4.5	Model Transformation Languages and Tools	42
4.5.1	Query/View/Transformation Language.	42
4.5.2	Atlas Transformation Language	43
4.5.3	Open Architecture Ware	43
4.5.4	IBM Model Transformation Framework.	43
4.5.5	Kermeta.	43
4.6	Comparative Study of Model Transformation Languages	44
4.7	Conclusion.	45
5	Model-Based Security	47
5.1	Security Specification for UML Design	47
5.1.1	Security Specification Using UML Artifacts.	47
5.1.2	Security Specification by Extending UML Meta-language	52
5.1.3	Security Specification by Creating New Meta-languages.	52
5.2	Usability Discussion	53
5.2.1	Usability Criteria	53
5.2.2	Security Specification Using UML Artifacts.	54
5.2.3	Extending UML Meta-language	56
5.2.4	Creating a New Meta-language.	57
5.3	Model-Based Security Hardening Mechanisms	57
5.3.1	Security Design Patterns	58
5.3.2	Mechanism-Directed Meta-languages.	58
5.3.3	Aspect-Oriented Modeling	58
5.3.4	Challenges	59
5.4	Related Work on Model-Based Security	59
5.4.1	Security Design Patterns	60
5.4.2	Mechanism-Directed Meta-languages.	61

5.4.3	Aspect-Oriented Modeling	63
5.4.4	Comparative Study	65
5.5	Conclusion.	67
6	Security Aspect Specification	69
6.1	Proposed AOM Approach for Security Hardening.	70
6.2	A UML Profile for Aspect-Oriented Modeling	71
6.2.1	Aspect Adaptations	72
6.2.2	Aspect Adaptation Rules	74
6.2.3	Pointcuts	75
6.3	Related Work on AOM	82
6.4	Conclusion.	84
7	Security Aspect Weaving.	85
7.1	Approach Overview	86
7.2	Security Aspect Specialization	87
7.3	Join Point Matching	88
7.4	Security Aspect Weaving.	89
7.4.1	Weaver Architecture	89
7.4.2	Transformation Definitions.	92
7.4.3	Transformation Rules	102
7.5	Tool Support	106
7.5.1	AOM Profile	106
7.5.2	Weaving Framework.	107
7.6	Case Studies	111
7.6.1	Service Provider Application	111
7.6.2	SIP-Communicator	119
7.6.3	Replacing Deprecated Functions in OpenSAF.	128
7.7	Related Work on Model Weaving.	132
7.8	Conclusion.	136
8	Static Matching and Weaving Semantics in Activity Diagrams . . .	137
8.1	Syntax.	138
8.1.1	Activity Diagrams Syntax	138
8.1.2	Aspect Syntax	140
8.2	Matching and Weaving Semantics.	142
8.2.1	Matching Semantics	142
8.2.2	Weaving Semantics.	146
8.3	Completeness and Correctness of the Weaving	148
8.3.1	Algorithms.	148
8.3.2	Completeness and Correctness	151
8.4	Conclusion.	161

9	Dynamic Matching and Weaving Semantics in λ-Calculus	163
9.1	Background	164
9.1.1	λ -Calculus	165
9.1.2	Denotational Semantics	167
9.1.3	Continuation-Passing Style	168
9.1.4	Defunctionalization	170
9.2	Syntax and Denotational Semantics	172
9.3	Continuation-Passing Style Semantics	174
9.3.1	Representation of Continuations as Functions	174
9.3.2	Representation of Continuations as Frames	174
9.4	Aspect Syntax and Semantics	178
9.4.1	Aspect Syntax	179
9.4.2	Matching Semantics	179
9.4.3	Weaving Semantics	181
9.5	Semantics of Flow-Based Pointcuts	184
9.5.1	Control Flow Pointcut	184
9.5.2	Dataflow Pointcut	185
9.5.3	Example	189
9.6	Related Work on AOP Semantics	190
9.7	Conclusion	192
10	Dynamic Matching and Weaving Semantics in Executable UML	193
10.1	Example	194
10.2	Syntax	195
10.3	Denotational Semantics	196
10.3.1	Denotational Semantics of Activity Diagrams	197
10.3.2	Denotational Semantics of Alf Language	199
10.4	Continuation-Passing Style Semantics	199
10.4.1	Representation of Continuations as Functions	199
10.4.2	Representation of Continuations as Frames	200
10.5	Aspect Syntax and Semantics	203
10.5.1	Aspect Syntax	204
10.5.2	Matching Semantics	204
10.5.3	Weaving Semantics	205
10.6	Semantics of the Dataflow Pointcut	207
10.7	Related Work on Aspect Semantics in xUML	211
10.8	Conclusion	212
11	Conclusion	215
