

Contents

1	Definition of Multibody System	1
	References.	3
2	Fundamental Concepts in Multibody Dynamics	5
	References.	9
3	Global and Local Coordinates	11
	References.	14
4	Euler Angles, Bryant Angles and Euler Parameters	15
	References.	22
5	Angular Velocity and Acceleration	23
	References.	26
6	Vector of Coordinates, Velocities and Accelerations	27
	References.	29
7	Kinematic Constraint Equations	31
	References.	35
8	Basic Constraints Between Two Vectors	37
	References.	41
9	Kinematic Joints Constraints	43
	References.	48
10	Equations of Motion for Constrained Systems	49
	References.	52

11	Force Elements and Reaction Forces	55
	References.	59
12	Methods to Solve the Equations of Motion	61
	References.	66
13	Integration Methods in Dynamic Analysis	67
	References.	74
14	Correction of the Initial Conditions	75
	References.	78
15	Demonstrative Example of Application	79
	References.	82

Concepts and Formulations for Spatial Multibody
Dynamics

Flores, P.

2015, VIII, 83 p. 36 illus., 1 illus. in color., Softcover

ISBN: 978-3-319-16189-1
