<b>Preface to the Second Edition . . . . .</b>	<b>xi</b>
<b>Introduction to the First Edition . . . . .</b>	<b>xiii</b>
<b>1 Invertible Operator with a Difference Kernel</b>	
1.1 Constructing the inverse operator . . . . .	3
1.2 Existence conditions and the structure of the inverse operator . . .	12
1.3 Equations with a special right-hand side . . . . .	16
1.4 Operators with difference kernel in $L^p(0, \omega)$ . . . . .	18
1.5 The use of the Fourier transform . . . . .	25
<b>2 Equations of the First Kind with a Difference Kernel</b>	
2.1 Equations of the first kind with a special right-hand side . . . . .	32
2.2 Solutions of equations of the first kind . . . . .	34
2.3 Generalized solutions . . . . .	43
2.4 On the behavior of solutions . . . . .	47
2.5 On a class of integro-differential equations . . . . .	50
<b>3 Examples and Applications</b>	
3.1 Integral equations with kernel of power type . . . . .	53
3.2 Integral equations with logarithmic type kernels . . . . .	59
3.3 Regularization . . . . .	65
3.4 Fractional integrals of purely imaginary order . . . . .	66
3.5 On classes of integral equations which are solvable explicitly . . .	70
3.6 On certain problems of hydrodynamics . . . . .	76
3.7 Equations from the contact theory of elasticity . . . . .	82
3.8 The equation of radiation transfer . . . . .	85
<b>4 Eigensubspaces and Fourier Transform</b>	
4.1 Classification of eigensubspaces . . . . .	88
4.2 On the distribution of the roots of Fourier images . . . . .	92

<b>5</b>	<b>Integral Operators with <math>W</math>-Difference Kernels</b>	
5.1	The principal notions of $S$ -node theory . . . . .	102
5.2	Operators with $W$ -difference kernels . . . . .	105
5.3	The Prandtl equation . . . . .	109
<b>6</b>	<b>Problems of Communication Theory</b>	
6.1	Optimal prediction . . . . .	113
6.2	Diffraction on a strip . . . . .	116
6.3	Extremal problems in the theory of synthesis of antennae . . . . .	120
<b>7</b>	<b>Lévy Processes: Convolution-type Form of the Infinitesimal Generator</b>	
7.1	Introduction . . . . .	125
7.2	Convolution-type form of the infinitesimal generator . . . . .	127
<b>8</b>	<b>On the Probability that the Lévy Process (Class II) Remains within the Given Domain</b>	
8.1	Introduction . . . . .	135
8.2	Support . . . . .	136
8.3	Lévy processes (class II) . . . . .	136
8.4	Quasi-potential . . . . .	141
8.5	Long time behavior . . . . .	152
8.6	Appendix I . . . . .	158
8.7	Appendix II (stable processes) . . . . .	161
<b>9</b>	<b>Triangular Factorization and Cauchy Type Lévy Processes</b>	
9.1	Introduction . . . . .	167
9.2	Integral equations of the first kind and triangular factorization . . . . .	169
9.3	Triangular factorization, examples . . . . .	172
9.4	New examples of the Lévy processes . . . . .	175
9.5	Two-sided estimation of the smallest eigenvalue of the operator $(-L_\Delta)$ . . . . .	178
9.6	Proof of Kreĭn's formulas . . . . .	182
<b>10</b>	<b>Lévy Processes with Summable Lévy Measures, Long Time Behavior</b>	
10.1	Introduction . . . . .	187
10.2	Quasi-potential . . . . .	190
10.3	Quasi-potential and compactness of $T$ and $T_1$ . . . . .	192
10.4	The probability that Lévy process (class $I_c$ ) remains within the given domain . . . . .	194
10.5	Long time behavior . . . . .	201
10.6	Example . . . . .	202
10.7	Discrete Lévy measure . . . . .	204

**11 Open Problems** . . . . . 205

11.1 Triangular form . . . . . 205

11.2 Quasi-potential operator  $B$  . . . . . 207

11.3 Analogue of the Weyl problem from spectral theory . . . . . 208

11.4 Fractional integrals of purely imaginary order . . . . . 208

**Commentaries and Remarks** . . . . . 209

**Bibliography** . . . . . 213

**Glossary** . . . . . 221

**Index** . . . . . 225

Integral Equations with Difference Kernels on Finite  
Intervals

Second Edition, Revised and Extended

Sakhnovich, L.

2015, XVIII, 226 p. 2 illus., Hardcover

ISBN: 978-3-319-16488-5

A product of Birkhäuser Basel
