

Contents

Part I Prevention of Microbial Spreading

1 Decision Procedures and Strategies	3
1.1 Introduction to Safety Protocols in Food Industries	3
1.2 The Role of the HACCP Manager: Food Risks and GMP	6
1.3 The Microbial Risk.	7
1.4 The Chemical Risk.	8
1.5 Microbial Decontamination and Related Risks	12
References	13
2 The Reduction of Microbial Spreading: Little Details, Great Effects	19
2.1 Basic Strategies Against Microbial Spreading in Food Industries: An Overview	19
2.2 Correct Selection of Raw Ingredients and Packaging Materials	20
2.3 Segregation of Raw Materials	24
2.4 Segregation of Packaging Materials and Equipments.	26
2.5 Aerosolised Spreading.	26
References	27
3 Hygiene of Food-Contact Approved Materials for Machinery	31
3.1 Food-Contact Materials and Machinery: An Overview	31
3.2 Chemical Features of Suitable Food-Contact Surfaces	33
3.3 Microbial Biofilms on Approved Food-Contact Surfaces	38
3.4 Eradication of Microbial Biofilms.	39
3.5 Unexpected Complications: Protobiofilms	41
References	42

4 The Hygienic Prevention of Food Contamination: The Role of Technology	47
4.1 Microbial Contamination in Food Industries and Correlated Countermeasures: An Overview	47
4.2 Sterilisation and Other Thermal Treatments in Food Processing	50
4.3 Chemical Treatments in Food Industries	52
4.4 Non-thermal Treatments in Food Industries	53
References	56

Part II Disinfection Techniques and Risks

5 Technology, Chemistry and Food Hygiene: A Multidisciplinary Approach for the Reduction of Microbial Risk	63
5.1 The Microbial Risk in Food Industries: The HACCP System is a Multidisciplinary Approach	63
5.2 The Microbial Risk in Food Industries: The Contribution of Organic and Physical Chemistry	66
5.3 The Microbial Risk in Food Industries: Engineering and Food Technology Considerations	68
5.4 The Microbial Risk in Food Industries: Regulatory Norms and Reflections About Information Technology	70
References	71
6 The Chemistry of Disinfection: Ally or Enemy?	75
6.1 Disinfection in Food Industries: Needs and Solutions	75
6.2 Main Chemicals for Food Cleaning and Disinfection	78
6.2.1 Cleaning Chemicals	78
6.2.2 Sanitising Chemicals	83
References	90
7 Reasons for the Substitution of Chlorine in the Disinfection	93
7.1 Sanitisation in Food Industries: The Role of Chlorine-Based Compounds	93
7.2 Chlorine-Based Chemicals: Safety and Toxicological Concerns	95
7.2.1 Odour Failures	95
7.2.2 Corrosion Power	96
7.2.3 Irritating Effects on Skin and Respiratory Organs	96
7.2.4 Production of Carcinogenic Substances	97
7.2.5 Explosion Risks	97
References	97
