Part I Effects of Glaciation and Geology on Caves and Karst of the Northeastern US

1 Introduction	3
1.1 Karstic Rocks of the Northeastern United States	4
1.2 Glaciation	8
1.2.1 Glacial Effects	9
1.2.2 Glacial Effects on Caves and Karst	13
References	16
2 Geologic and Geomorphic History of New York and New England	19
2.1 Precambrian—Grenville Orogenic Events	20
2.2 Paleozoic Mountain Building and Deposition	21
2.2.1 Cambro-Ordovician—Taconic Orogenic Events	21
2.2.2 Siluro-Devonian—Acadian Orogenic Events	23
2.2.3 Mississippian, Pennsylvanian, and Permian—Allegheny Orogeny	26
2.3 Mesozoic Rifting and Deposition	27
2.3.1 Triassic and Jurassic—Rifting	27
2.3.2 Cretaceous—Plate Movement, Erosion, and Deposition	27
2.4 Cenozoic Geomorphic Development	28
2.4.1 Paleogene and Neogene—Erosion	28
2.4.2 Quaternary—Ice Age	28
References	31
3 Studies on Glaciated Karst in New York and New England	33
3.1 Timeline and Impacts of Glaciated Karst Studies	35
3.1.1 Late 1960s-Early 1980s	35
3.1.2 Mid 1980s-Early 2000s	36
3.1.3 Early 2000s-Current	37
3.2 What Did These Studies Tell Us About Glaciation and Karst?	39
3.2.1 Flow Route and Base Level Controls	39
3.2.2 Glaciation, Cave Sediments and Speleothems	40
3.3 Summary	43
References	44

Part II Cave and Karst Regions of the Northeastern US

4 Pseudokarst and Non-dissolutional Caves	49
4.1 Non-dissolutional Caves and Glaciation	51
4.2 Non-dissolutional Caves of New York and New England	53
4.2.1 New York	55
4.2.2 Adirondacks	55
4.2.3 Shawangunks	56
4.2.4 Vermont	57
4.2.5 New Hampshire	59
4.2.6 Maine	61
4.2.7 Connecticut and Massachusetts	63
4.3 Summary	64
References	65
5 Caves and Karst of the Helderberg Plateau	67
5.1 Initiation of Modern Cave and Karst Science in the Helderbergs	70
5.2 The General Model of Helderberg Plateau Speleogenesis	71
5.2.1 Glacial Overprint of the Helderberg Plateau	75
5.2.2 Glaciation and Cave Sediments	82
5.3 Cave Exploration and Discovery in the Helderberg Plateau	84
5.4 Summary	85
References	85
6 Caves and Karst of the Deformed Siluro-Devonian Carbonates, South Central New York	87
6.1 Introduction	87
6.2 Geologic Background	89
6.3 Eastern Helderberg Plateau—Clarksville Cave and Onesquethaw Cave	89
6.3.1 Development of Clarksville and Onesquethaw Caves	90
6.4 Joralemon Park Karst Area, Ravena	94
6.4.1 Geology and Hydrology	94
6.4.2 Caves and Karst of Joralemon Park	96
6.5 Pompeys Cave	100
6.5.1 Geology and Hydrology of Pompeys Cave	101
6.5.2 Evolution of Pompeys Cave	103
6.6 Other Caves of the HVFTB	104
6.7 Summary	105
References	106
7 Caves and Karst of the Northern New York Lowlands	109
7.1 Introduction	109
7.2 Geologic History and Karst Setting	110
7.3 Hydrologic History and Setting	112
7.4 Caves of the Northern New York Lowlands	112
7.4.1 Schroeders Pants Cave	113
7.4.2 Mitchells Cave	113

7.5	Maze Caves of the Black and Perch Rivers	114
7.6	American History in the New York Lowland Caves	117
7.7	Summary	118
	References	118
8	Caves and Karst of New England and Eastern New York	121
8.1	Introduction	121
8.2	Caves, Karst and Glaciation in New England	122
8.3	The Vermont Example	127
8.4	Recent Discoveries.	128
8.5	Summary	129
	References	130
9	Caves and Karst of the Adirondacks.	131
9.1	Introduction	131
9.2	Geologic and Hydrologic Setting	133
9.3	Big Loop Cave	134
9.4	The TDMO Model in the Adirondack Mountains.	136
9.5	Meander Cutoff Caves in the Grenville Marble	136
9.6	Stream Capture in the Grenville Marble	139
9.7	Summary	142
	References	142

Glaciation and Speleogenesis

Interpretations from the Northeastern United States

Cooper, M.P.; Mylroie, J.E.

2015, XV, 142 p. 118 illus., Hardcover
