

# Contents

<b>Introduction: Energy Systems Modelling for Decision-Making . . . . .</b>	<b>1</b>	
Alessandro Chiodi, George Giannakidis, Maryse Labriet, Brian Ó Gallachóir and GianCarlo Tosato		
 <b>Part I From Policy Insights to Policy Decisions</b>		
 <b>Energy Policies Influenced by Energy Systems</b>		
<b>Modelling—Case Studies in UK, Ireland, Portugal and G8 . . . . .</b>	<b>15</b>	
Alessandro Chiodi, Peter G. Taylor, Júlia Seixas, Sofia Simões, Patrícia Fortes, João P. Gouveia, Luís Dias and Brian Ó Gallachóir		
 <b>A Global Renewable Energy Roadmap: Comparing Energy Systems Models with IRENA’s REmap 2030 Project . . . . .</b>		<b>43</b>
Ruud Kempener, Edi Assoumou, Alessandro Chiodi, Umberto Ciorba, Maria Gaeta, Dolf Gielen, Hiroshi Hamasaki, Amit Kanudia, Tom Kober, Maryse Labriet, Nadia Maïzi, Brian Ó Gallachóir, Deger Saygin, Júlia Seixas, Nicholas Wagner and Evelyn Wright		
 <b>Energy Decisions in an Uncertain Climate and Technology Outlook: How Stochastic and Robust Methodologies Can Assist Policy-Makers . . . . .</b>		<b>69</b>
Maryse Labriet, Claire Nicolas, Stéphane Tchung-Ming, Amit Kanudia and Richard Loulou		
 <b>Schemes for the Regional Allocation of Emission Allowances under Stringent Global Climate Policy . . . . .</b>		<b>93</b>
Tom Kober, Bob van der Zwaan and Hilke Rösler		

<b>Assessment of Carbon Emissions Quotas with the Integrated TIMES and MERGE Model . . . . .</b>	<b>111</b>
Socrates Kypreos and Antti Lehtilä	
<b>Integrating Policy Instruments into Energy System Models—From Theory to Application to Germany . . . . .</b>	<b>125</b>
Birgit Fais and Markus Blesl	
<b>Improving Efficiency in Kazakhstan’s Energy System . . . . .</b>	<b>141</b>
Aiyngul Kerimray, Kanat Baigarin, Aidyn Bakdolotov, Rocco De Miglio and GianCarlo Tosato	
<b>Ex Post and Prospective Analyses of Renewable Policies in Spain . . . .</b>	<b>151</b>
Helena Cabal, Yolanda Lechón, Natalia Caldés, Cristina de la Rúa, Diego García-Gusano, Elena López-Bernabé, Inés López-Dóriga and Marta Santamaría	
<b>Modelling Pathways to a Low Carbon Economy for Finland . . . . .</b>	<b>163</b>
Tiina Koljonen and Antti Lehtilä	
 <b>Part II Focussing on Specific Aspects of Supply and End-Use</b>	
<b>Methodological Significance of Temporal Granularity in Energy-Economic Models—Insights from the MARKAL/TIMES Framework . . . . .</b>	<b>185</b>
Ramachandran Kannan, Hal Turton and Evangelos Panos	
<b>Improved Representation of the European Power Grid in Long Term Energy System Models: Case Study of JRC-EU-TIMES. . . . .</b>	<b>201</b>
Wouter Nijs, Sofia Simoes, Alessandra Sgobbi, Pablo Ruiz-Castello, Christian Thiel, George Giannakidis, John Mantzaris, Kostas Tigas, Dionisios Dimitroulas, Pavlos Georgilakis and Costas Vournas	
<b>Highly Detailed TIMES Modeling to Analyze Interactions Between Air Quality and Climate Regulations in the United States . . . . .</b>	<b>223</b>
Evelyn Wright and Amit Kanudia	
<b>An Analysis of the Impacts of New Oil Pipeline Projects on the Canadian Energy Sector with a TIMES Model for Canada. . . .</b>	<b>247</b>
Kathleen Vaillancourt, Yuri Alcocer and Olivier Bahn	

<b>Multi-cluster Technology Learning in TIMES: A Transport Sector Case Study with TIAM-UCL . . . . .</b>	<b>261</b>
Gabrial Anandarajah and Will McDowall	
<b>Modal Shift of Passenger Transport in a TIMES Model: Application to Ireland and California . . . . .</b>	<b>279</b>
Hannah E. Daly, Kalai Ramea, Alessandro Chiodi, Sonia Yeh, Maurizio Gargiulo and Brian Ó Gallachóir	
<b>The Role of Energy Service Demand in Carbon Mitigation: Combining Sector Analysis and China TIMES-ED Modelling . . . . .</b>	<b>293</b>
Wenying Chen, Xiang Yin, Hongjun Zhang, Ding Ma, Jincheng Shi, Weilong Huang and Nan Li	
 <b>Part III Gaining Additional Insights Through Model Coupling</b>	
<b>Soft-Linking Exercises Between TIMES, Power System Models and Housing Stock Models. . . . .</b>	<b>315</b>
J.P. Deane, Francesco Gracceva, Alessandro Chiodi, Maurizio Gargiulo and Brian Ó Gallachóir	
<b>Economic Impacts of Future Changes in the Energy System—Global Perspectives . . . . .</b>	<b>333</b>
James Glynn, Patricia Fortes, Anna Krook-Riekkola, Maryse Labriet, Marc Vielle, Socrates Kypreos, Antti Lehtilä, Peggy Mischke, Hancheng Dai, Maurizio Gargiulo, Per Ivar Helgesen, Tom Kober, Phil Summerton, Bruno Merven, Sandrine Selosse, Kenneth Karlsson, Neil Strachan and Brian Ó Gallachóir	
<b>Economic Impacts of Future Changes in the Energy System—National Perspectives . . . . .</b>	<b>359</b>
James Glynn, Patricia Fortes, Anna Krook-Riekkola, Maryse Labriet, Marc Vielle, Socrates Kypreos, Antti Lehtilä, Peggy Mischke, Hancheng Dai, Maurizio Gargiulo, Per Ivar Helgesen, Tom Kober, Phil Summerton, Bruno Merven, Sandrine Selosse, Kenneth Karlsson, Neil Strachan and Brian Ó Gallachóir	
<b>Assessing Climate Impacts on the Energy Sector with TIAM-WORLD: Focus on Heating and Cooling and Hydropower Potential. . . . .</b>	<b>389</b>
Maryse Labriet, Markus Biberacher, Philip B. Holden, Neil R. Edwards, Amit Kanudia and Richard Loulou	

**Coupling World and European Models: Energy Trade  
and Energy Security in Europe . . . . . 411**  
Raffaella Gerboni, Daniele Grosso, Evasio Lavagno, Amit Kanudia  
and GianCarlo Tosato

Informing Energy and Climate Policies Using Energy  
Systems Models  
Insights from Scenario Analysis Increasing the Evidence  
Base
