

Contents

Part I Mini-Courses

Diffusion of Energy in Chains of Oscillators with Conservative Noise	3
Cédric Bernardin	

Dissipative Reactive Fluid Models from the Kinetic Theory	67
Vincent Giovangigli	

Part II Short Papers

Large Deviations in a Gaussian Setting: The Role of the Cameron-Martin Space	135
Diogo Bessam	

Kinetic Theory of Simple Reacting Spheres: An Application to Coloring Processes	153
Filipe Carvalho, Jacek Polewczak and Ana Jacinta Soares	

Can Translation Invariant Systems Exhibit a Many-Body Localized Phase?	173
Wojciech De Roeck and François Huveneers	

Stability of Non-deterministic Systems	193
Pedro Duarte and Maria Joana Torres	

Derivation of the Stochastic Burgers Equation from the WASEP	209
Patrícia Gonçalves	

Large Population Asymptotics for Interacting Diffusions in a Quenched Random Environment	231
Eric Luçon	
Shock Structure and Temperature Overshoot in Macroscopic Multi-temperature Model of Binary Mixtures	253
Damir Madjarević	
Diffusive Limit for the Random Lorentz Gas	273
Alessia Nota	
Fractional Boson Gas and Fractional Poisson Measure in Infinite Dimensions	293
Maria João Oliveira and Rui Vilela Mendes	
Dynamical Properties of a Cosmological Model with Diffusion.	313
M.P. Ramos and A.J. Soares	
The Structure of Shock Waves in Dissipative Hyperbolic Models.	335
Srboljub Simić	
Diffusion Coefficient for the Disordered Harmonic Chain Perturbed by an Energy Conserving Noise	355
Marielle Simon	
Conditioned Stochastic Particle Systems and Integrable Quantum Spin Systems	371
Gunter M. Schütz	

From Particle Systems to Partial Differential Equations II

Particle Systems and PDEs II, Braga, Portugal,

December 2013

Goncalves, P.; Soares, A.J. (Eds.)

2015, VIII, 393 p. 29 illus., 10 illus. in color., Hardcover

ISBN: 978-3-319-16636-0
