

Contents

1	Global Health and the Role of Biomaterials: Presenting the Case of Bolivia	1
	The Condition of Global Health	1
	The Case of Bolivia	5
	The Potential of Biomaterials	9
	Biomaterials for Bolivia	11
	References	13
2	Barley	15
	Introduction	15
	Medical Applications	16
	Necessity for Biological Catalysts	16
	Low-Cost Biological Catalysts	16
	Water Sanitation	18
	Algae Inhibition	19
	Endotoxin-Free Recombinant Proteins	20
	References	21
3	Sugarcane	23
	Introduction	23
	Medical Applications	24
	Cell Immobilization	24
	Membrane for Middle Ear	25
	References	26
4	Corn	27
	Introduction	27
	Medical Applications	28
	Utilization of Corn Protein Zein for Drug Delivery	28

Corn and Cellulose Applications in Tissue Scaffolding	29
Production of HIV Antibodies in Maize.	30
References	31
5 Sorghum	33
Introduction	33
Medical Applications.	34
Sorghum Use in Nanoparticle Production	34
References	38
6 Sunflower Seeds	41
Introduction	41
Medical Applications.	42
Combating Infection in Preterm Infants	42
Prevention of Invasive Bacterial Infections in Preterm Infants	43
References	44
7 Quinoa	45
Introduction	45
Medical Applications.	46
Reducing Risk of Various Diseases	46
A Global Source of Nutrition	48
References	48
8 Feasibility of Biomedical Applications for Biomaterials in Bolivia . . .	51
References	53
Appendix: Bolivian Medicinal Herbs	55
Index	59

Medical Applications for Biomaterials in Bolivia

Arias, S.; Bhatia, S.K.

2015, X, 62 p. 21 illus., 18 illus. in color., Softcover

ISBN: 978-3-319-16774-9
