<b>1</b>	<b>Introduction</b> . . . . .	<b>1</b>
	Reference. . . . .	5
<b>2</b>	<b>Societal Requirements/Goals for a Sustainable Transportation System</b> . . . . .	<b>7</b>
2.1	Greenhouse Gas Emission Requirements . . . . .	8
2.2	Dependence on Finite Fossil Fuels . . . . .	10
2.3	Local Air Pollution. . . . .	14
	References. . . . .	16
<b>3</b>	<b>Alternative Vehicle and Fuel Options</b> . . . . .	<b>19</b>
3.1	Electric Vehicles. . . . .	19
3.1.1	Battery Electric Vehicles (BEVs). . . . .	19
3.1.2	Hybrid Electric Vehicles (HEVs). . . . .	20
3.1.3	Plug-in Hybrid Electric Vehicles (PHEVs) . . . . .	21
3.1.4	Biofuel PHEVs. . . . .	21
3.1.5	Hydrogen-Powered Fuel Cell Electric Vehicles (FCEVs) . . . . .	22
3.2	Other Alternative Fuel Vehicles . . . . .	23
3.2.1	Natural Gas Vehicles (NGVs) . . . . .	24
3.2.2	Diesel-Fueled Internal Combustion Vehicles (ICVs). . . . .	24
	References. . . . .	24
<b>4</b>	<b>Alternative Vehicle Market Potential</b> . . . . .	<b>25</b>
4.1	Range Limitations . . . . .	25
4.2	Fueling Time Limitations. . . . .	27
4.3	Size Limitations . . . . .	29
4.4	Market Surveys . . . . .	29
4.5	BEV Market Potential . . . . .	30
	References. . . . .	31

<b>5</b>	<b>Alternative Vehicle Cost Estimates</b>	33
5.1	Initial Capital Costs	33
5.1.1	Battery Electric Vehicles	33
5.1.2	Electric Motor/Controller Costs	34
5.2	FCEV Cost	35
5.2.1	Fuel Cell System Costs	36
5.3	Hydrogen Storage Costs	36
5.3.1	Peak Power Battery Costs	36
5.4	Summary of EV “Bottom-Up” Cost Estimates	37
5.5	MIT EV Cost Estimates	37
5.6	McKinsey & Company Cost Estimates	38
	References	41
<b>6</b>	<b>Fuel Infrastructure Cost</b>	43
6.1	Hydrogen Fueling Stations	43
6.2	Battery Charging Stations	45
6.3	McKinsey & Company Infrastructure Cost Estimates	48
	References	49
<b>7</b>	<b>Computer Simulation Model Scenarios</b>	51
7.1	Hybrid Electric Vehicle (HEV) Scenario	51
7.2	Gasoline Plug-in Hybrid Electric Vehicle (PHEV) Scenario	52
7.3	Biofuel PHEV Scenario	53
7.4	Battery Electric Vehicle (BEV) Scenario	55
7.5	Fuel Cell Electric Vehicle (FCEV) Scenario	56
	Reference	58
<b>8</b>	<b>Greenhouse Gas Emissions for Alternative Vehicles</b>	59
8.1	Near-Term (Through 2035) GHG Emissions Without Climate Change Legislation	64
8.2	Long-Term GHG Emissions with Climate Change Legislation	66
	References	70
<b>9</b>	<b>Projected Oil Consumption for Alternative Vehicles</b>	71
9.1	Near-Term Oil Consumption Projections	71
9.2	Long-Term Oil Consumption Projections	73
<b>10</b>	<b>Local Air Pollution</b>	77
	References	79
<b>11</b>	<b>Natural Gas and Diesel Hybrid Electric Vehicles</b>	81
11.1	Greenhouse Gas Emissions	81
11.2	Oil Imports	84
11.3	Local Air Pollution	85

11.4	Conclusions . . . . .	86
11.4.1	Diesel HEV Conclusions . . . . .	86
11.4.2	Natural Gas HEV Conclusions. . . . .	86
<b>12</b>	<b>State and International Alternative Vehicle Activities . . . . .</b>	<b>87</b>
12.1	Federal Fuel Cell R&D . . . . .	87
12.2	State Fuel Cell Initiatives . . . . .	88
12.2.1	California . . . . .	88
12.3	International Fuel Cell Programs . . . . .	89
12.3.1	Japan. . . . .	89
12.3.2	Germany. . . . .	89
12.3.3	Scandinavia . . . . .	89
12.3.4	UK . . . . .	89
12.3.5	South Korea . . . . .	90
	References. . . . .	90
<b>13</b>	<b>Waste to Hydrogen . . . . .</b>	<b>91</b>
13.1	Tri-Gen System Description. . . . .	91
13.2	Tri-Gen System Cost Estimates . . . . .	93
13.3	Cost Savings. . . . .	94
13.3.1	Reduced Electricity Costs . . . . .	94
13.3.2	Reduced Heating Costs . . . . .	94
13.3.3	Hydrogen Sales Income . . . . .	95
13.3.4	Annual Operations and Maintenance (O&M) Costs . . . . .	96
13.3.5	Net Annual Cost Savings . . . . .	97
13.4	Number of FCEVs on the Road . . . . .	97
13.5	Detailed Cash Flow Analysis of Tri-Gen Hydrogen Fueling Stations. . . . .	98
13.6	Impact of Lower Gasoline Prices. . . . .	101
13.7	Tri-Gen WWTF Economic Performance in Other Areas of the Country . . . . .	102
13.8	Greenhouse Gas Emissions and Oil Consumption with Hydrogen Made from Wastewater Treatment Plant Waste . . . . .	106
13.8.1	Greenhouse Gas Emissions with WWTP Hydrogen . . . . .	106
13.8.2	Hydrogen Production Potential from Biogas . . . . .	106
13.8.3	Oil Consumption with WWTP Hydrogen . . . . .	107
	References. . . . .	107
<b>14</b>	<b>Automobile Companies on FCEVs . . . . .</b>	<b>109</b>
14.1	DaimlerChrysler. . . . .	109
14.2	Ford . . . . .	109
14.3	GM . . . . .	109
14.4	Honda Motor . . . . .	110
14.5	Toyota. . . . .	110

<b>15</b>	<b>Conclusions</b>	113
15.1	Transportation Conclusions	113
15.1.1	Greenhouse Gas Emissions	113
15.1.2	Petroleum Consumption	114
15.1.3	Fuel Infrastructure Cost	115
15.1.4	Urban Air Pollution	115
15.1.5	Alternative Vehicle Cost	115
15.2	Electricity Generation	116
15.2.1	Clean Coal Hydrogen and Electricity Generation	116
15.2.2	Hydrogen as Storage Pathway to Enable More Intermittent Renewable Utilization	117
15.3	Final Summary Conclusions	117
	References	118
	<b>Appendix A: Range Limitations of Battery Electric Vehicles</b>	119
	<b>Appendix B: Distribution of Vehicles by Class</b>	137
	<b>Appendix C: Estimated Future US Light-Duty Vehicle Sales, Vehicles on the Road, and Number of Miles Driven Annually</b>	143
	<b>Appendix D: Marginal Grid Mixes</b>	157
	<b>Appendix E: Capital Cost of Equipment to Produce Hydrogen, Heat, and Electricity at Wastewater Treatment Plants</b>	167

Sustainable Transportation Options for the 21st  
Century and Beyond

A Comprehensive Comparison of Alternatives to the  
Internal Combustion Engine

Thomas, C.E.S.

2015, XVI, 182 p. 82 illus., 26 illus. in color., Hardcover

ISBN: 978-3-319-16831-9
