

Contents

1	Infinitesimal specification of continuous time Markov chains	1
1.1	Poisson and general counting processes	1
1.2	Modeling with intensities	5
1.3	Multivariate counting processes	7
1.4	Continuous time Markov chains	10
	Problems	15
2	Models of biochemical reaction systems	19
2.1	The basic model	19
2.1.1	Example: Gene transcription and translation	22
2.1.2	Example: Virus kinetics	26
2.1.3	Example: Enzyme kinetics	28
2.2	Deterministic models of biochemical reaction systems, and first-order reaction networks	29
	Problems	31
3	Stationary distributions of stochastically modeled reaction systems	33
3.1	Introduction	33
3.2	Network conditions, complex-balanced equilibria, and the deficiency zero theorem	34
3.3	Stationary distributions for complex-balanced models	36
	Problems	40
4	Analytic approaches to model simplification and approximation	43
4.1	Limits under the classical scaling	43
4.2	Models with multiple time-scales	46
4.2.1	Example: Derivation of the Michaelis-Menten equation	48
4.2.2	Example: Approximation of the virus model	50
	Problems	52

5	Numerical methods	55
5.1	Monte Carlo	55
5.2	Generating random variables: Transformations of uniforms	56
5.3	Exact simulation methods	58
5.3.1	Embedded discrete time Markov chains and the stochastic simulation algorithm	58
5.3.2	The next reaction method	59
5.4	Approximate simulation with Euler's method / τ -leaping	62
5.5	Monte Carlo and multi-level Monte Carlo	63
5.5.1	Computational complexity for Monte Carlo	63
5.5.2	Multi-level Monte Carlo (MLMC)	64
	Problems	67
A	Notes on probability theory and stochastic processes	69
A.1	Some notation and basic concepts	69
A.1.1	Measure theoretic foundations of probability	69
A.1.2	Dominated convergence theorem	70
A.1.3	General theory of stochastic processes	71
A.2	Martingales	71
A.2.1	Doob's inequalities	72
A.3	Stochastic integrals	73
A.4	Convergence in distribution and the functional central limit theorem for Poisson processes	74
A.5	Conditioning and independence	75
A.6	Directed sets	76
A.7	Gronwall inequality	76
	References	79
	Index	83

Stochastic Analysis of Biochemical Systems

Anderson, D.F.; Kurtz, Th.

2015, X, 84 p. 4 illus., Softcover

ISBN: 978-3-319-16894-4
