

Contents

1	Overview of Greenhouse Gases and Global Warming.	1
1.1	Evidence for Climate Change.	1
1.1.1	Extreme Extremes	3
1.1.2	El Nino	3
1.1.3	Biological Systems.	3
1.1.4	Water Cycle	4
1.2	CO ₂ as a Greenhouse Gas.	5
1.2.1	Increase in Emissions.	5
1.3	Actions to Reduce CO ₂ Emission.	8
1.4	Mitigation Techniques	8
1.4.1	Land Management Practices	8
1.4.2	Biochar Sequestration.	9
1.4.3	Energy Efficiency.	10
1.4.4	Alternative Energy Sources	10
1.5	Conclusion	14
	References.	14
2	Overview of CO₂ Capture Technology	17
2.1	Rationale for CO ₂ Capture Technology	17
2.2	Research on Carbon Capture and Storage (CCS).	18
2.3	Carbon Capture Processes in Power Plants	18
2.3.1	Pre-combustion.	19
2.3.2	Oxy-fuel Combustion.	19
2.3.3	Post-combustion	19
2.4	CO ₂ Capture Technology at Different Stages.	20
2.5	Selection of Capture Technology	20
2.5.1	Absorbents	20
2.5.2	Adsorbents	21
2.5.3	Cryogenic Distillation	21
2.5.4	Membranes.	21

2.5.5	Gas Hydrates	21
2.5.6	Chemical Looping	22
2.6	Carbon Capture Process in Power Plant Applications	22
2.6.1	Iron and Steel Production.	22
2.6.2	Cement Production.	22
2.6.3	Purification of Natural Gas Streams.	23
2.7	Transport and Storage of CO ₂	23
2.7.1	Transport.	23
2.7.2	Storage	23
2.8	Conclusion	23
	References	24
3	Adsorbents for CO₂ Capture	25
3.1	Adsorbents Overview	25
3.2	Determining the Feasibility for CO ₂ Capture.	26
3.2.1	Screening Adsorbents.	26
3.2.2	Properties that Are Screened for.	26
3.2.3	Langmuir Isotherm.	29
3.3	Organic Adsorbents	29
3.3.1	Activated Carbon	29
3.3.2	Biochar	30
3.3.3	Metal Organic Framework (MOF).	33
3.4	Other CO ₂ Adsorbents	35
3.4.1	Silica-Based Adsorbents.	35
3.4.2	Metal Oxide-Based Absorbents	36
3.4.3	Zeolites	37
3.4.4	Clays/Layered Double Hydroxides (LDHs).	38
3.5	Conclusion	39
	References	39
4	Absorbents for CO₂ Capture	43
4.1	Search for the Optimal Absorbent	43
4.2	Physical Absorbents	44
4.2.1	Mechanism	44
4.2.2	Processes	44
4.3	Alkanolamine Absorbents	45
4.3.1	Introduction to Liquid Amines	45
4.3.2	Amine-Based Carbon Dioxide Capture Systems	46
4.3.3	Cost-Benefit Analysis of MEA Sorption	47
4.4	Ionic Liquids	47
4.4.1	Introduction to Ionic Liquids	47
4.4.2	Selection of Ionic Liquids	48
4.4.3	Status of Ionic Liquids for CO ₂ Capture	48
4.5	Conclusion	48
	References	49

5	CO₂ Reduction and Utilization.	51
5.1	Introduction to the Reduction of CO ₂ .	51
5.1.1	Photocatalysis.	51
5.2	Thermodynamics of the Catalysis Process.	52
5.3	Photocatalytic Reactions	52
5.3.1	Choosing a Catalyst	53
5.3.2	Testing the Catalysts.	53
5.3.3	Common Catalysts	53
5.3.4	Comparison of Catalytic CO ₂ Photoreduction Systems.	55
5.4	CO ₂ Reuse Research.	56
5.5	Conclusion	57
	References	57

Carbon Dioxide Capture: An Effective Way to Combat
Global Warming

Creamer, A.E.; Gao, B.

2015, VII, 57 p. 24 illus., 14 illus. in color., Softcover

ISBN: 978-3-319-17009-1
