## Part I Measure and Integration

<b>1</b>	<b>Measure Spaces</b>	3
1.1	Algebras and $\sigma$ -Algebras of Sets	3
1.1.1	Notation and Preliminaries	3
1.1.2	Algebras and $\sigma$ -Algebras	5
1.2	Measures	7
1.2.1	Additive and $\sigma$ -Additive Functions	7
1.2.2	Measure Spaces	10
1.2.3	Borel–Cantelli Lemma	12
1.3	The Basic Extension Theorem	13
1.3.1	Monotone Classes	13
1.3.2	Outer Measures	16
1.4	Borel Measures on $\mathbb{R}^N$	20
1.4.1	Lebesgue Measure on $[0, 1)$	20
1.4.2	Lebesgue Measure on $\mathbb{R}$	22
1.4.3	Lebesgue Measure on $\mathbb{R}^N$	25
1.4.4	Examples	27
1.4.5	Regularity of Radon Measures	29
	References	35
<b>2</b>	<b>Integration</b>	37
2.1	Measurable Functions	38
2.1.1	Inverse Image of a Function	38
2.1.2	Measurable Maps and Borel Functions	38
2.2	Convergence Almost Everywhere	44
2.3	Approximation by Continuous Functions	46
2.4	Integral of Borel Functions	49
2.4.1	Integral of Positive Simple Functions	50
2.4.2	Repartition Function	51
2.4.3	The Archimedean Integral	53

2.4.4	Integral of Positive Borel Functions . . . . .	56
2.4.5	Integral of Functions with Variable Sign . . . . .	62
2.5	Convergence of Integrals . . . . .	67
2.5.1	Dominated Convergence . . . . .	67
2.5.2	Uniform Summability . . . . .	71
2.5.3	Integrals Depending on a Parameter . . . . .	74
2.6	Miscellaneous Exercises. . . . .	78
<b>3</b>	<b><math>L^p</math> Spaces . . . . .</b>	<b>81</b>
3.1	The Spaces $\mathcal{L}^p(X, \mu)$ and $L^p(X, \mu)$ . . . . .	81
3.2	The Space $L^\infty(X, \mu)$ . . . . .	89
3.3	Convergence in Measure . . . . .	94
3.4	Convergence and Approximation in $L^p$ . . . . .	95
3.4.1	Convergence Results . . . . .	95
3.4.2	Dense Subsets in $L^p$ . . . . .	98
3.5	Miscellaneous Exercises. . . . .	103
	References. . . . .	106
<b>4</b>	<b>Product Measures . . . . .</b>	<b>107</b>
4.1	Product Spaces . . . . .	107
4.1.1	Product Measures . . . . .	107
4.1.2	Fubini-Tonelli Theorem . . . . .	112
4.2	Compactness in $L^p$ . . . . .	115
4.3	Convolution and Approximation . . . . .	118
4.3.1	Convolution Product . . . . .	119
4.3.2	Approximation by Smooth Functions. . . . .	123
	References. . . . .	130

## Part II Functional Analysis

<b>5</b>	<b>Hilbert Spaces . . . . .</b>	<b>133</b>
5.1	Definitions and Examples . . . . .	134
5.2	Orthogonal Projection . . . . .	138
5.2.1	Projection onto a Closed Convex Set. . . . .	139
5.2.2	Projection onto a Closed Subspace . . . . .	141
5.3	Riesz Representation Theorem . . . . .	145
5.3.1	Bounded Linear Functionals. . . . .	145
5.3.2	Riesz Theorem . . . . .	147
5.4	Orthonormal Sequences and Bases . . . . .	153
5.4.1	Bessel's Inequality . . . . .	154
5.4.2	Orthonormal Bases . . . . .	155
5.4.3	Completeness of the Trigonometric System . . . . .	159
5.5	Miscellaneous Exercises. . . . .	163
	References. . . . .	166

<b>6</b>	<b>Banach Spaces</b> . . . . .	167
6.1	Definitions and Examples . . . . .	168
6.2	Bounded Linear Operators . . . . .	170
6.2.1	The Principle of Uniform Boundedness . . . . .	176
6.2.2	The Open Mapping Theorem . . . . .	178
6.3	Bounded Linear Functionals . . . . .	184
6.3.1	Hahn-Banach Theorem . . . . .	185
6.3.2	Separation of Convex Sets . . . . .	190
6.3.3	The Dual of $\ell^p$ . . . . .	194
6.4	Weak Convergence and Reflexivity . . . . .	200
6.4.1	Reflexive Spaces . . . . .	201
6.4.2	Weak Convergence and Bolzano-Weierstrass Property . . . . .	204
6.5	Miscellaneous Exercises . . . . .	215
	References . . . . .	225

### Part III Selected Topics

<b>7</b>	<b>Absolutely Continuous Functions</b> . . . . .	229
7.1	Monotone Functions . . . . .	230
7.1.1	Differentiation of Monotone Functions . . . . .	231
7.2	Functions of Bounded Variation . . . . .	237
7.3	Absolutely Continuous Functions . . . . .	242
7.4	Miscellaneous Exercises . . . . .	251
<b>8</b>	<b>Signed Measures</b> . . . . .	253
8.1	Comparison Between Measures . . . . .	254
8.2	Lebesgue Decomposition . . . . .	256
8.2.1	The Case of Finite Measures . . . . .	256
8.2.2	The General Case . . . . .	259
8.3	Signed Measures . . . . .	261
8.3.1	Total Variation . . . . .	261
8.3.2	Radon-Nikodym Theorem . . . . .	264
8.3.3	Hahn Decomposition . . . . .	265
8.4	Dual of $L^p(X, \mu)$ . . . . .	267
	Reference . . . . .	270
<b>9</b>	<b>Set-Valued Functions</b> . . . . .	271
9.1	Definitions and Examples . . . . .	271
9.2	Existence of a Summable Selection . . . . .	273
	Reference . . . . .	277

<b>Appendix A: Distance Function</b> . . . . .	279
<b>Appendix B: Semicontinuous Functions</b> . . . . .	285
<b>Appendix C: Finite-Dimensional Linear Spaces</b> . . . . .	289
<b>Appendix D: Baire's Lemma</b> . . . . .	293
<b>Appendix E: Relatively Compact Families of Continuous Functions</b> . . .	295
<b>Appendix F: Legendre Transform</b> . . . . .	299
<b>Appendix G: Vitali's Covering Theorem</b> . . . . .	303
<b>Appendix H: Ekeland's Variational Principle</b> . . . . .	307
<b>Index</b> . . . . .	311

Introduction to Measure Theory and Functional Analysis

Cannarsa, P.; D'Aprile, T.

2015, XIV, 314 p. 8 illus., 1 illus. in color., Softcover
