

Contents

1	Introduction	1
1.1	Overview and Motivation	1
1.2	Why Solve PDEs?	3
1.3	The Background of the Numerical Solution	4
1.4	Related Work	6
2	Discretization and Formulation of Solution Approaches	9
2.1	Background	9
2.2	Strong Form	13
2.3	Weak Form	13
2.4	Discretization of Time	16
2.5	Summary of Solution Methodology	19
3	Supporting Algorithms	21
3.1	Domain Discretization	21
3.1.1	Mesh Topology	21
3.1.2	Mesh Generation	22
3.1.3	Mesh Enhancement	23
3.1.4	Mesless Discretization	24
3.1.5	Complexity of Discretization Algorithms	25
3.2	Determining Local Support Domain	26
3.2.1	Strategies for Determining Support Nodes	26
3.2.2	kD Tree	28
3.2.3	Computational Complexity of Determining the Support Domain	30
3.3	Interpolation and Approximation	30
3.3.1	Interpolation	31
3.3.2	Moving Least Squares Approximation	32
3.3.3	Accuracy of MLS	37
3.3.4	Computational Complexity of MLS	37

3.4	Numerical Quadrature	38
3.4.1	Computational Complexity of Numerical Integration.	42
3.5	Solution of Linear System of Equations	42
3.5.1	Computational Complexity of Solving a Linear System of Equations	44
4	Mesh-Based Methods	45
4.1	Finite Difference Method.	45
4.2	Finite Element Method	47
4.2.1	FEM Weak System	48
4.2.2	FEM Complexity	50
5	Meshless Methods.	53
5.1	Meshless Local Strong Form Method	53
5.1.1	MLSM Complexity	55
5.2	Meshless Local Petrov Galerkin Method	55
5.2.1	MLPG1 Weak System	55
5.2.2	MLPG1 Complexity	60
6	Assessment of Described Solution Methods	63
6.1	Diffusion Equation	63
6.2	Test Conditions	64
6.3	Solution Approaches.	65
6.3.1	FDM	65
6.3.2	FEM	66
6.3.3	MLSM	66
6.3.4	MLPG1	67
6.4	Experimental Comparison of Convergence and Execution Time	68
6.4.1	Convergence	68
6.4.2	Execution Time	69
7	Test Cases	71
7.1	Mechanics of Cantilever Beam.	71
7.1.1	Governing Equations	71
7.1.2	Closed Form Solution.	73
7.1.3	Convergence and Runtime	74
7.2	Computational Fluid Dynamics	76
7.2.1	Problem Definition.	76
7.2.2	Convergence	78
7.2.3	Stability and Execution Time.	78

7.3	Semiconductor Simulation	79
7.3.1	Problem Definition	79
7.3.2	Solution Accuracy and Convergence	81
8	Parallel Implementation	83
8.1	Multicore Parallelization	84
8.2	GPU Parallelization	87
8.3	Parallelization on Distributed Computers	89
9	Final Remarks and Conclusions	93
	References	99
	Index	105

Parallel Scientific Computing

Theory, Algorithms, and Applications of Mesh Based
and Meshless Methods

Trobec, R.; Kosec, G.

2015, XI, 107 p. 37 illus., 3 illus. in color., Softcover

ISBN: 978-3-319-17072-5
