

Contents

Translators' Preface	v
L'Hôpital's Preface.....	xlix
1 In Which We Give the Rules of This Calculus	1
2 Use of the Differential Calculus for Finding the Tangents of All Kinds of Curved Lines	11
3 Use of the Differential Calculus for Finding the Greatest And the Least Ordinates, to Which Are Reduced Questions <i>De Maximis & Minimis</i>	45
4 Use of the Differential Calculus for Finding Inflection Points and Cusps.....	61
5 Use of the Differential Calculus for Finding Evolutes	79
6 Use of the Differential Calculus for Finding Caustics by Reflection.....	113
7 Use of the Differential Calculus for Finding Caustics by Refraction.....	129
8 Use of the Differential Calculus for Finding the Points of Curved Lines That Touch An Infinity of Lines Given in Position, Whether Straight or Curved	139
9 The Solution of Several Problems That Depend upon the Previous Methods.....	151
10 A New Method for Using the Differential Calculus with Geometric Curves, from Which We Deduce the Method of Messrs. Descartes and Hudde	169

11	Bernoulli's <i>Lectiones de Calculo Differentialis</i>	187
12	Selected Letters from the Correspondence Between the Marquis de L'Hôpital and Johann Bernoulli	233
13	Fontenelle's Eulogy for the Marquis de L'Hôpital	295
	References	303
	Index	305

L'Hôpital's Analyse des infiniments petits

An Annotated Translation with Source Material by

Johann Bernoulli

Bradley, R.E.; Petrilli, S.J.; Sandifer, C.E.

2015, LV, 311 p. 244 illus., 9 illus. in color., Hardcover

ISBN: 978-3-319-17114-2

A product of Birkhäuser Basel
