

Contents

1	Introduction to Mechanics of Anisotropic Materials	1
	Artur W. Ganczarski, H. Egner and Jacek J. Skrzypek	
2	Constitutive Equations for Isotropic and Anisotropic Linear Viscoelastic Materials	57
	Jacek J. Skrzypek and Artur W. Ganczarski	
3	Mechanics of Anisotropic Composite Materials	87
	Artur W. Ganczarski, S. Hernik and Jacek J. Skrzypek	
4	General Concept of Limit Surfaces—Convexity and Normality Rules, Material Stability.	133
	Artur W. Ganczarski and Jacek J. Skrzypek	
5	Termination of Elastic Range of Pressure Insensitive Materials—Isotropic and Anisotropic Initial Yield Criteria.	159
	Artur W. Ganczarski and Jacek J. Skrzypek	
6	Termination of Elastic Range of Pressure Sensitive Materials—Isotropic and Anisotropic Initial Yield/Failure Criteria	209
	Jacek J. Skrzypek and Artur W. Ganczarski	
7	Classification of Constitutive Equations for Dissipative Materials—General Review	247
	H. Egner and W. Egner	
	Index	295

Mechanics of Anisotropic Materials

J. Skrzypek, J.; W. Ganczarski, A.W. (Eds.)

2015, XXIII, 311 p. 191 illus., 14 illus. in color.,

Hardcover

ISBN: 978-3-319-17159-3
