

Contents

1	Introduction	1
1.1	Introduction	1
1.2	Cues for Language Identification	2
1.3	Types of Language Identification Systems	6
1.3.1	Explicit LID Systems	6
1.3.2	Implicit LID Systems	7
1.4	Challenging Issues in Automatic Language Identification	7
1.5	Objective and Scope of the Book	8
1.6	Issues Addressed in the Book	9
1.7	Organization of the Book	10
	References	10
2	Literature Review	13
2.1	Introduction	13
2.2	Review of Explicit LID Systems	14
2.3	Review of Implicit LID Systems	17
2.4	Reasons for Attraction Towards Implicit LID Systems	20
2.5	Motivation for the Present Work	21
2.6	Summary and Conclusions	22
	References	22
3	Language Identification Using Spectral Features	27
3.1	Introduction	27
3.2	Speech Databases	28
3.2.1	Indian Institute of Technology Kharagpur Multi-lingual Indian Language Speech Corpus (IITKGP-MLILSC)	28
3.2.2	Oregon Graduate Institute Database Multi-language Telephone-Based Speech (OGI-MLTS)	30
3.3	Features Used for Automatic Language Identification	31
3.4	Development of Language Models	32

3.5	LID Performance on Indian Language Database (IITKGP-MLILSC)	33
3.5.1	Speaker Dependent LID System	33
3.5.2	Speaker Independent LID System	34
3.5.3	Speaker Independent LID System with Speaker Specific Language Models	37
3.6	LID System Using Spectral Features from Pitch Synchronous Analysis (PSA) and Glottal Closure Regions (GCRs)	42
3.6.1	Epoch Extraction Using Zero Frequency Filter Method	46
3.6.2	Extraction of the Spectral Features from PSA and GCRs	47
3.6.3	Performance Evaluation	49
3.7	Performance of Proposed Spectral Features on OGI-MLTS Database	51
3.8	Summary and Conclusions	52
	References	52
4	Language Identification Using Prosodic Features	55
4.1	Introduction	55
4.2	Extraction of CV Units from Continuous Speech	56
4.3	Prosodic Differences Among Languages	62
4.4	Extraction of Intonation, Rhythm and Stress (IRS) Features from Syllable and Word Levels	62
4.4.1	Intonation	63
4.4.2	Rhythm	66
4.4.3	Stress	67
4.5	Performance Evaluation Using Syllable and Word Level Prosodic Features	68
4.6	Extraction of Prosodic Features from Global Level	69
4.6.1	ΔF_0 Contour	70
4.6.2	Duration Contour	70
4.6.3	ΔE Contour	70
4.7	Performance Evaluation Using Global Level Prosodic Features	71
4.8	Performance Evaluation Using Prosodic Features on OGI-MLTS Database	71
4.9	LID Using Combination of Features	73
4.9.1	Performance of LID System Using IRS Features from Syllable and Word Levels	75
4.9.2	Performance of LID System Using Prosodic Features from Syllable, Word and Global Level	75
4.9.3	Performance of LID System Using Spectral and Prosodic Features	77

4.10	Summary and Conclusions	80
	References	80
5	Summary and Conclusions	83
5.1	Summary of the Book.	83
5.2	Major Contributions of the Book	84
5.3	Scope for Future Work	85
	References	86
	Appendix A: LPCC Features	87
	Appendix B: MFCC Features.	89
	Appendix C: Gaussian Mixture Model (GMM)	93

Language Identification Using Spectral and Prosodic
Features

Rao, K.S.; Reddy, V.R.; Maity, S.

2015, XI, 98 p. 21 illus., 5 illus. in color., Softcover

ISBN: 978-3-319-17162-3
