

# Contents

<b>1</b>	<b>Introduction and Motivation</b>	<b>1</b>
1.1	Research Questions	3
1.2	Thesis Structure	4
<b>2</b>	<b>Assessing the Quality and Usability of Multimodal Systems</b>	<b>5</b>
2.1	Taxonomy of Quality Aspects of Multimodal Interfaces	6
2.1.1	Emotions and Affect in the Context of Multimodal Interaction	9
2.1.2	Locating the Quality Aspects in Focus of this Work	10
2.2	Evaluation Methods	11
2.2.1	Interaction Parameters	12
2.2.2	Evaluation Methods Involving Participants	14
2.2.3	Measuring Affect and Emotions	18
<b>3</b>	<b>System Feedback on Mobile Devices</b>	<b>19</b>
3.1	Visual Feedback	21
3.2	Auditory Feedback	22
3.2.1	Auditory Icons	23
3.2.2	Earcons	23
3.2.3	Effectiveness of Auditory Feedback	24
3.3	Tactile Feedback	24
3.4	Audio-Tactile Feedback	26
<b>4</b>	<b>Experimental Paradigm to Examine the Affective Quality and Functional Connotation of Feedback in Different Contexts</b>	<b>29</b>
4.1	Self-assessment Manikin	29
4.2	Functional Applicability	30
4.3	Context	31
4.4	Setup and General Procedure	34

<b>5</b>	<b>Affective Quality and Functional Connotation of Auditory Feedback</b>	<b>37</b>
5.1	Focus Groups and Association Study with Auditory Feedback	37
5.1.1	Focus Groups	37
5.1.2	Association Study	39
5.2	Influence of Context on the Perception of Auditory Icons and Earcons	42
5.2.1	Participants and Material	42
5.2.2	Procedure	43
5.2.3	Results	44
5.2.4	Discussion	49
<b>6</b>	<b>Affective Quality and Functional Connotation of Tactile Feedback</b>	<b>51</b>
6.1	Pilot Study to Investigate a Selection of Vibrotactile Feedback	51
6.1.1	Participants and Material	51
6.1.2	Procedure	53
6.1.3	Results	54
6.1.4	Discussion	54
6.2	Influence of Context on the Perception of Tactons	55
6.2.1	Participants and Material	55
6.2.2	Procedure	56
6.2.3	Results	56
6.2.4	Discussion	62
<b>7</b>	<b>Affective Quality and Functional Connotation of Auditory-Tactile Feedback</b>	<b>65</b>
7.1	Participants and Material	65
7.2	Procedure	66
7.3	Results	67
7.3.1	Affective Impression	67
7.3.2	Functional Connotation	68
7.3.3	Message Clustering	70
7.3.4	Linear Regression	73
7.3.5	General Results	73
7.4	Discussion	75
<b>8</b>	<b>Investigating Different Types of Feedback in a Mobile Interaction Paradigm</b>	<b>79</b>
8.1	Methodology	79
8.1.1	Feedback Types	80
8.1.2	Hypotheses and Research Questions	80

8.1.3	Material and Participants . . . . .	82
8.1.4	Procedure . . . . .	84
8.2	Results . . . . .	86
8.2.1	Affective and General Feedback Impression . . . . .	86
8.2.2	Modality Ratings . . . . .	88
8.2.3	Course Performance . . . . .	91
8.2.4	Errors and Corrections . . . . .	91
8.2.5	Durations . . . . .	91
8.2.6	General Results . . . . .	92
8.3	Discussion . . . . .	96
8.3.1	Is Bimodal and Trimodal Feedback Rated Better Than Unimodal Feedback? . . . . .	96
<b>9</b>	<b>Conclusion and Future Work . . . . .</b>	<b>99</b>
9.1	Thesis Summary . . . . .	99
9.2	Guidelines . . . . .	102
9.3	Shortcomings . . . . .	103
9.4	Future Work . . . . .	104
<b>Appendix A: Description of Feedback Messages Used in the Context Studies . . . . .</b>		<b>107</b>
<b>Appendix B: Description of Feedback Messages in the PIN Interaction Study. . . . .</b>		<b>115</b>
<b>Appendix C: Additional Data to the Results of the PIN Interaction Study. . . . .</b>		<b>119</b>
<b>References. . . . .</b>		<b>123</b>

Emotional Feedback for Mobile Devices

Seebode, J.

2015, XIV, 131 p. 29 illus., 13 illus. in color., Hardcover

ISBN: 978-3-319-17192-0
