

Contents

1	Introduction	1
1.1	Problem Statement and Scope	1
1.2	Research Objective and Approach	2
	References	4
2	Review on the State of the Research in Energy and Eco-efficiency of Manufacturing Processes	5
2.1	What Is Energy Efficiency	5
2.1.1	Thermodynamic Approach	6
2.1.2	Physical-Thermodynamic Approach	10
2.1.3	The Predictions of SEC	11
2.1.4	Energy Efficiency Practices in Manufacturing	15
2.2	What Is Eco-efficiency?	16
2.2.1	The General Definition of Eco-efficiency	16
2.2.2	Environmental Studies of Manufacturing Processes	17
2.2.3	LCC/LCA Approach	19
2.3	Ensuing Need for Research	19
	References	20
3	Methodology for Characterizing Energy and Eco-efficiency of Manufacturing Processes	23
3.1	Methodology of Energy Efficiency Evaluation for Unit Process	24
3.1.1	Empirical Modelling	24
3.1.2	Stage I: Methodology of Design of Experiments (DoE)	26
3.1.3	Stage II: Energy Metering and Monitoring System	30
3.1.4	Stage III: Statistical Analysis and Regression Methods	33
3.1.5	Stage IV: Validation Methods	36
3.1.6	Summary of Model Development	36
3.2	Methodology of Eco-efficiency Evaluation for Unit Process	36
3.2.1	Definition of Eco-efficiency Evaluation for Unit Process	36
3.2.2	The Value of a Unit Process	38

3.2.3	The Associated Environmental Impacts	39
3.2.4	The Interrelationship Within a Unit Process	42
3.3	Summary	42
	References	43
4	Energy Efficiency Characterization of Manufacturing Processes . . .	45
4.1	Energy Efficiency Characterization for Turning Processes	45
4.1.1	Background	45
4.1.2	Design of Experiments	46
4.1.3	Experiment Details	49
4.1.4	Regression Results	53
4.1.5	Model Validation	57
4.2	Energy Efficiency Characterization for Milling Processes	58
4.2.1	Background	58
4.2.2	Design of Experiments	59
4.2.3	Experiment Details	60
4.2.4	Regression Results for Dry Machining	62
4.2.5	Model Validation	65
4.2.6	Comparison Between Dry and Wet Machining	66
4.3	Energy Efficiency Characterization for Grinding Processes	67
4.3.1	Background	67
4.3.2	Design of Experiments	68
4.3.3	Experiment Details	73
4.3.4	Regression Results	73
4.3.5	Model Validation	76
4.4	Energy Efficiency Characterization for Injection Molding Processes	78
4.4.1	Background	78
4.4.2	Design of Experiments	79
4.4.3	Experiment Details	83
4.4.4	Regression Results	83
4.4.5	Model Validation	84
4.5	Energy Efficiency Characterization for Electrical Discharge Machining (EDM) Processes	88
4.5.1	Background	88
4.5.2	Design of Experiments	89
4.5.3	Experiment Details	91
4.5.4	Regression Results	93
4.5.5	Model Validation	95
4.6	Summary	95
	References	97

5	Eco-efficiency of Manufacturing Processes	99
5.1	Eco-efficiency of Material Removal Processes	99
5.1.1	The Value of Material Removal Processes	99
5.1.2	The Associated Environmental Impact of Material Removal Processes	100
5.1.3	The Interrelationship Within the Material Removal Processes	100
5.2	Eco-efficiency of Injection Molding Processes	101
5.2.1	The Value of Injection Molding Processes	101
5.2.2	The Associated Environmental Impact of Injection Molding Processes	102
5.3	Eco-efficiency of Grinding Processes	103
5.3.1	The Value of Grinding Processes	103
5.3.2	The Associated Environmental Impact of Grinding Processes	104
5.3.3	The Interrelationship Within the Grinding Processes	108
5.4	Summary	111
	References	111
6	Implementation Towards Improving Energy and Eco-efficiency of Manufacturing Processes	113
6.1	Investigation into Model Coefficients	114
6.1.1	Comparison Between Empirical Models and Exergy Framework	114
6.1.2	SEC Decomposition	115
6.1.3	Coefficients c_0 and c_1	119
6.2	Model Clustering for Metal Machining Processes	121
6.3	Implementation the Methodology of Energy Efficiency Evaluation in an Industrial Environment	123
6.3.1	Challenges in Industries	123
6.3.2	Modified Methodology for Characterizing Energy-Efficiency in Industries	124
6.3.3	Case Study: A Case of Sheet Extrusion Line	125
6.4	Improving Life Cycle Inventory (LCI) Database	132
6.5	Energy Efficiency Strategies for Manufacturing Processes	134
6.5.1	Energy Efficiency Strategies: An Operator's Perspective	134
6.5.2	Energy Efficiency Strategies: A Machine Tool Builder's Perspective	137
6.5.3	Energy Efficiency Strategies: A Designer's Perspective	139
6.6	Summary	141
	References	141

7 Conclusions 143

 7.1 Concluding Remarks 143

 7.2 Research Contributions 145

 7.3 Recommendations for Future Works 145

Appendix 1 147

Appendix 2 149

Appendix 3 151

Appendix 4 169
