

Contents

1	Introduction	1
1.1	The Homogeneous Universe	4
1.1.1	General Relativity and Einstein's Equation	4
1.1.2	The Friedmann Equations	7
1.2	Inflation	8
1.2.1	The Horizon Problem	9
1.2.2	Single Field Slow-Roll Inflation	11
1.2.3	Beyond the Homogeneous Field Evolution	14
1.2.4	Canonical Quantization	15
1.2.5	Quantum Fluctuations During Inflation	19
1.3	From Inflation to the Cosmic Microwave Background	24
1.3.1	Perturbations in Matter and Radiation	24
1.3.2	CMB Polarization	27
1.4	Reheating	31
1.4.1	Perturbative Reheating	32
1.4.2	Preheating and Parametric Resonance	34
1.4.3	Massless Preheating	36
1.5	Gravitational Waves	40
1.5.1	Tensor Perturbations as Gravitational Waves	41
1.5.2	Gravitational Waves Generated by Sources	43
1.5.3	Energy Carried by Gravitational Waves	45
1.5.4	Gravitational Wave Detectors	46
	References	47
2	Chiral Tensor Power Spectrum from Quantum Gravity	53
2.1	Canonical Quantization of Gravity	54
2.1.1	Quantum Field Theory	54
2.1.2	Loop Quantum Gravity	55
2.1.3	Different Approaches in Quantum Gravity	56

2.2	Different Formalisms for General Relativity	57
2.2.1	The Tetrad Formalism	57
2.2.2	The Palatini Formalism	60
2.2.3	The Ashtekar Formalism	60
2.3	Spectrum of Tensor Perturbations Using Ashtekar Variables	62
2.3.1	The Canonical Variables	63
2.3.2	Hamiltonian Formalism	64
2.3.3	Fourier Space Expansion	71
2.3.4	Quantum Hamiltonian	76
2.3.5	Chiral Vacuum Fluctuations	83
2.3.6	A Purely Real γ	86
2.4	Conclusions	87
	References	88
3	Anisotropic Gravitational Wave Background from Massless Preheating	91
3.1	Gravitational Wave Production During Preheating	92
3.1.1	Studying Preheating Numerically	92
3.1.2	Gravitational Waves from Massless Preheating	93
3.1.3	Gravitational Wave Background from Preheating Today	97
3.2	Massless Preheating with a Light Scalar Field	99
3.2.1	The Separate Universe Approximation	99
3.2.2	Varying χ_i During Preheating	101
3.3	Numerical Simulations	102
3.3.1	Numerical Algorithm	102
3.3.2	Choosing the Numerical Parameters	105
3.3.3	Simulating Gravitational Wave Production	108
3.4	The Impact of χ_i on gravitational wave production	110
3.5	Anisotropies in GW Background from Massless Preheating	113
3.5.1	Toolkit for Computing Anisotropies	114
3.5.2	Anisotropic Gravitational Wave Background	119
3.5.3	Field Dynamics	124
3.6	Conclusions and Outlook	128
	References	129
4	Concluding Remarks	133
	References	134
	Appendix	135

Exploring the Early Universe with Gravitational Waves

Bethke, L.B.

2015, XIII, 139 p. 16 illus., 5 illus. in color., Hardcover

ISBN: 978-3-319-17448-8
