

# Contents

<b>1</b>	<b>Definition of Integral Transforms and Distributions . . . . .</b>	<b>1</b>
1.1	Integral Transforms . . . . .	1
1.2	Distributions and Their Integration Formulas . . . . .	6
1.3	Branch Cut and Argument of Square Root Functions . . . . .	11
1.3.1	Square Root Function 1: $g(z) = \sqrt{z - z_0}$ . . . . .	11
1.3.2	Square Root Function 2: $g(z) = \sqrt{z^2 - z_0^2}$ . . . . .	14
1.4	Comments on Inversion Techniques and Integration Formulas . . . . .	28
	References. . . . .	32
<b>2</b>	<b>Green's Functions for Laplace and Wave Equations . . . . .</b>	<b>33</b>
2.1	1D Impulsive Source. . . . .	33
2.2	1D Time-Harmonic Source. . . . .	38
2.3	2D Static Source. . . . .	44
2.4	2D Impulsive Source. . . . .	49
2.5	2D Time-Harmonic Source. . . . .	51
2.6	3D Static Source. . . . .	68
2.7	3D Impulsive Source. . . . .	70
2.8	3D Time-Harmonic Source. . . . .	73
	Appendix . . . . .	76
	References. . . . .	76
<b>3</b>	<b>Green's Dyadic for an Isotropic Elastic Solid . . . . .</b>	<b>77</b>
3.1	2D Impulsive Source. . . . .	79
3.2	2D Time-Harmonic Source. . . . .	87
3.3	2D Static Source. . . . .	89
3.4	3D Impulsive Source. . . . .	96
3.5	3D Time-Harmonic Source. . . . .	107
3.6	3D Static Source. . . . .	108

3.7	Torsional Source. . . . .	109
3.7.1	Ring Source. . . . .	110
3.7.2	Point Torque Source. . . . .	113
	Appendix . . . . .	116
	References. . . . .	119
<b>4</b>	<b>Acoustic Wave in a Uniform Flow. . . . .</b>	<b>121</b>
4.1	Compressive Viscous Fluid . . . . .	121
4.2	Linearization . . . . .	123
4.3	Viscous Acoustic Fluid . . . . .	126
4.4	Wave Radiation in a Uniform Flow. . . . .	129
4.5	Time-Harmonic Wave in a Uniform Flow . . . . .	135
	References. . . . .	137
<b>5</b>	<b>Green's Functions for Beam and Plate. . . . .</b>	<b>139</b>
5.1	An Impulsive Load on a Beam. . . . .	139
5.2	A Moving Time-Harmonic Load on a Beam . . . . .	142
5.3	An Impulsive Load on a Plate . . . . .	145
5.4	A Time-Harmonic Load on a Plate . . . . .	148
	Appendix . . . . .	152
	References. . . . .	152
<b>6</b>	<b>Cagniard-de Hoop Technique . . . . .</b>	<b>153</b>
6.1	2D Anti-plane Deformation . . . . .	154
6.2	2D In-plane Deformation . . . . .	162
6.3	3D Dynamic Lamb's Problem . . . . .	178
	References. . . . .	204
<b>7</b>	<b>Miscellaneous Green's Functions . . . . .</b>	<b>205</b>
7.1	2D Static Green's Dyadic for an Orthotropic Elastic Solid . . . . .	205
7.2	2D Static Green's Dyadic for an Inhomogeneous Elastic Solid. . . . .	213
7.2.1	2D Kelvin's Solution for Homogeneous Media. . . . .	221
7.3	Green's Function for Torsional Waves in a Monoclinic Material. . . . .	222
7.4	Reflection of a Transient SH-Wave at a Moving Boundary . . . . .	227
7.5	Wave Scattering by a Rigid Inclusion in an Inhomogeneous Elastic Solid. . . . .	242
7.6	An Excellent Application of Cauchy Complex Integral . . . . .	253
	References. . . . .	260

Integral Transform Techniques for Green's Function

Watanabe, K.

2015, XIV, 264 p. 53 illus., 26 illus. in color., Hardcover

ISBN: 978-3-319-17454-9
