

Contents

1	Introduction	1
1.1	Motivation	2
1.2	Problem Statement	5
1.3	Research Goal and Research Methodology	7
1.4	Structure of the Dissertation	8
	References	11
2	Developments of Manufacturing Systems with a Focus on Product and Process Quality	15
2.1	Manufacturing Terms, Definitions and Developments	15
2.1.1	Manufacturing Processes	17
2.1.2	Process Monitoring	21
2.1.3	Product in Manufacturing	22
2.1.4	Quality in Manufacturing	24
2.1.5	Example of a Manufacturing Programme	26
2.2	Developments of Manufacturing System	27
2.2.1	System View on Manufacturing	28
2.2.2	Intelligent Manufacturing Systems	29
2.2.3	Holonic Manufacturing Systems	31
2.3	Developments in Information and Data Management in Manufacturing	32
2.3.1	Information Management (Systems) in Manufacturing	35
2.3.2	Data and Information Quality	37
2.4	Challenges of MS from a Product and Process Information Perspective	40
	References	42

3	Current Approaches with a Focus on Holistic Information Management in Manufacturing	51
3.1	Product Lifecycle Management in Manufacturing	51
3.1.1	Product Data Management	52
3.1.2	Product Lifecycle Management	54
3.1.3	Closed-Loop and Item-Level PLM	56
3.2	Quality Monitoring in Manufacturing	59
3.2.1	Quality Management in the Manufacturing Domain	59
3.2.2	Quality Monitoring in Manufacturing Programmes	61
3.3	Limitations of Current Approaches for Holistic Information Management in Manufacturing Systems	62
	References	64
4	Development of the Product State Concept	69
4.1	Rationale for the Product State Concept	70
4.2	Product State	74
4.3	Relevant State Characteristics	79
4.3.1	Product State Characteristics	79
4.3.2	Product State Transformation	85
4.3.3	Categorization of Product State Transformation	88
4.3.4	Relevant State Characteristics	92
4.3.5	Identification of Relevant State Characteristics	94
4.4	Process Intra- and Inter-relations Among State Characteristics	97
4.4.1	Describing Process Intra- and Inter-relations of State Characteristics	98
4.4.2	Visualization of Relations	101
4.4.3	Limitations of Describing Process Intra- and Inter-relations	109
4.5	Requirements of State Driver Identification	112
4.5.1	NP Complete Nature of Product State Concept	113
4.5.2	Suitability of Machine Learning Methods	114
4.6	Derived Research Hypothesis of the Application of ML Within the Product State Concept	117
	References	119
5	Application of Machine Learning to Identify State Drivers	125
5.1	Machine Learning in Manufacturing	125
5.1.1	Machine Learning	126
5.1.2	Supervised Machine Learning	127
5.2	Selection of Suitable Machine Learning Technique	129
5.2.1	Support Vector Machines (SVM)	131
5.2.2	Rationale of SVM Application for Identification of State Drivers in Manufacturing Systems	138
5.3	Application of SVM for Identification of State Drivers	142
	References	149

6 Application of SVM to Identify Relevant State Drivers	153
6.1 Introducing Scenarios I, II and III	153
6.2 Scenario I—Rolls-Royce	155
6.2.1 SVM Kernel and Parameters for Hyperplane by X-Validation	155
6.2.2 Feature Ranking Using SVM Classifier	157
6.2.3 Classification on Previously Unknown Data	161
6.3 Scenario II—Chemical Manufacturing Process	162
6.3.1 SVM Kernel and Parameters for Hyperplane by X-Validation	163
6.3.2 Classification on Previously Unknown Data	167
6.3.3 Compilation of SVM Operation and Output Data	169
6.3.4 Feature Ranking Using SVM Classifier	171
6.4 Scenario III—SECOM	177
6.4.1 SVM Kernel and Parameters for Hyperplane by X-Validation	177
References	187
7 Evaluation of the Developed Approach	189
7.1 Evaluation Results	189
7.1.1 Data Pre-processing	189
7.1.2 Cross-validation Performance of SVM Classifier	191
7.1.3 Unbalanced Data	193
7.1.4 Feature Selection and Feature Ranking	193
7.1.5 Classification Performance on Previously Unknown Data	198
7.2 Discussion of Evaluation Results	200
7.3 Limitations	205
References	210
8 Recapitulation	211
8.1 Conclusion	211
8.2 Outlook and Future Work	212
References	214
Annex	215
Appreciation of Student Contribution	265
About the Author	271

Identifying Product and Process State Drivers in
Manufacturing Systems Using Supervised Machine
Learning

Wuest, T.

2015, XVIII, 272 p. 139 illus., 10 illus. in color.,

Hardcover

ISBN: 978-3-319-17610-9
