

# Contents

## Program Analysis and Transformation

Analyzing Array Manipulating Programs by Program Transformation . . . . .	3
<i>J. Robert M. Cornish, Graeme Gange, Jorge A. Navas, Peter Schachte, Harald Søndergaard, and Peter J. Stuckey</i>	
Analysing and Compiling Coroutines with Abstract Conjunctive Partial Deduction . . . . .	21
<i>Danny De Schreye, Vincent Nys, and Colin Nicholson</i>	

## Constraint Handling Rules

Confluence Modulo Equivalence in Constraint Handling Rules . . . . .	41
<i>Henning Christiansen and Maja H. Kirkeby</i>	
Exhaustive Execution of CHR Through Source-to-Source Transformation . . .	59
<i>Ahmed Elsayy, Amira Zaki, and Slim Abdennadher</i>	
A Formal Semantics for the Cognitive Architecture ACT-R . . . . .	74
<i>Daniel Gall and Thom Frühwirth</i>	
CHRAAnimation: An Animation Tool for Constraint Handling Rules . . . . .	92
<i>Nada Sharaf, Slim Abdennadher, and Thom Frühwirth</i>	

## Termination Analysis

Extending the 2D Dependency Pair Framework for Conditional Term Rewriting Systems . . . . .	113
<i>Salvador Lucas, José Meseguer, and Raúl Gutiérrez</i>	

## Security

Partial Evaluation for Java Malware Detection . . . . .	133
<i>Ranjeet Singh and Andy King</i>	
Access Control and Obligations in the Category-Based Metamodel: A Rewrite-Based Semantics . . . . .	148
<i>Sandra Alves, Anatoli Degtyarev, and Maribel Fernández</i>	

## Program Testing and Verification

Concolic Execution and Test Case Generation in Prolog . . . . .	167
<i>Germán Vidal</i>	
Liveness Properties in CafeOBJ – A Case Study for Meta-Level Specifications . . . . .	182
<i>Norbert Preining, Kazuhiro Ogata, and Kokichi Futatsugi</i>	

## Program Synthesis

A Hybrid Method for the Verification and Synthesis of Parameterized Self-Stabilizing Protocols . . . . .	201
<i>Amer Tahat and Ali Ebneenasir</i>	
Drill and Join: A Method for Exact Inductive Program Synthesis . . . . .	219
<i>Remis Balaniuk</i>	

## Program Derivation

Functional Kleene Closures . . . . .	241
<i>Nikita Danilenko</i>	

## Semantic Issues in Logic Programming

On Completeness of Logic Programs. . . . .	261
<i>Włodzimierz Drabent</i>	
Polynomial Approximation to Well-Founded Semantics for Logic Programs with Generalized Atoms: Case Studies. . . . .	279
<i>Md. Solimul Chowdhury, Fangfang Liu, Wu Chen, Arash Karimi, and Jia-Huai You</i>	

## Program Transformation and Optimization

Declarative Compilation for Constraint Logic Programming . . . . .	299
<i>Emilio Jesús Gallego Arias, James Lipton, and Julio Mariño</i>	
Pre-indexed Terms for Prolog. . . . .	317
<i>J.F. Morales and M. Hermenegildo</i>	

Author Index . . . . .	333
