

Contents

1	Light, Matter, and Energy	1
1.1	Light Beams	1
1.2	First Law of Relativity: Straight, Steady Speed Is Relative	1
1.3	Measuring the Speed of Light	3
1.4	Second Law of Relativity: The Speed of Light Is Absolute	4
1.5	Faster than Light?	5
1.6	Theory and Practice	6
1.7	Mass and Inertia	6
1.8	Inertia and Weight: A First Glance	7
1.9	Energy	7
1.10	Mass and Motion Energy	8
1.11	Resting-Mass and Motion Energy	9
	1.11.1 Internal Motion-Energy	9
	1.11.2 Pure Energy	9
1.12	Inertia of Pure Energy	10
1.13	Mass Is Energy Is Mass	12
1.14	Information Needs Energy for Transport	13
2	Light, Time, Mass, and Length	15
2.1	Light and Time	15
2.2	The Gamma Factor	17
2.3	Whose Clock Is Running More Slowly?	19
2.4	Light, Time, and Length	20
	2.4.1 Length in the Direction of Movement	20
	2.4.2 Length at Right Angles to Movement	21
2.5	At the Same Time?	22
2.6	Are There Any Time Machines?	24
2.7	Time and Mass	25
2.8	Speed Addition	27

3	Light, Electricity, and Magnetism	29
3.1	Electric Charge and Speed	29
3.2	Electric Charges and Magnets	30
3.3	Electric and Magnetic Fields	32
3.4	Magnetic Field from Electric Current	33
3.4.1	The Faraday Paradox	34
3.4.2	No Attraction Without Relativity	35
3.4.3	Attraction with Relativity	35
4	Acceleration and Inertia	37
4.1	Rotating Motion: Twin Paradox 1	37
4.2	Rotating Motion: Not School Geometry	39
4.3	Straight Motion and Acceleration	41
4.4	Proper Time and Inertia: Twin Paradox 2	42
4.5	Inertial State, Acceleration, and Proper Time	44
5	Inertia and Gravity	45
5.1	Gravity Is Not a Force	46
5.2	Gravity Bends Space-Time	48
5.2.1	Bended Surface	49
5.2.2	Bended Space-Time	51
5.3	Measuring the Bending of Space-Time	52
6	Equivalence Principle in Action	57
6.1	Time and Gravity	57
6.2	Proper Time in Bended Space-Time: Twin Paradox 3	59
6.3	Moving Straightly in Bended Space-Time	61
6.4	Length Under the Gravity of a Perfect Ball	62
6.5	Gravity Around a Perfect Ball	64
6.6	Mass Under Gravity	65
6.7	Light Under Gravity	66
6.8	Black Holes: A First Look	68
6.9	Equivalence Principle: Summary	69
7	How Mass Creates Gravity	71
7.1	Gravity in a Lonely Cloud	71
7.2	Einstein Equation of Gravity	73
7.3	Enter Pressure	73
7.4	Enter Speed	75
7.5	Enter Outside Masses	76
7.6	Local and Global Space-Time	76
7.7	Bended Space-Time and Tensors	77
7.8	How to Solve the Einstein Equation of Gravity	78

8	Solving the Einstein Equation of Gravity	81
8.1	Gravity Causes the Law of Motion	81
8.2	Gravity Inside a Perfect Ball of Mass	82
8.3	Flat Space-Time Inside a Ball-Shaped Hollow	85
8.4	Gravity Outside a Perfect Ball of Mass	86
8.5	Schwarzschild Exact Solution	88
8.6	Newton Law of Gravity	91
9	General Relativity in Action	93
9.1	Black Holes	93
9.2	Light Bending: Weak Gravity 1	95
9.3	Kepler Laws	101
9.4	Planet Orbits Rotate: Weak Gravity 2	104
9.5	Strong Gravity Near Black Holes	108
9.6	Gravitational Waves	111
9.7	Where Is the Gravity Energy?	113
9.8	Big Bang of the Universe	115
	9.8.1 Small Ball of Mass in the Universe	116
	9.8.2 Large Ball of Mass in the Universe	118
9.9	Vacuum Energy and Gravity	121
10	Epilogue	125
	Appendix	127
	Index	135

Relativity for Everyone

How Space-Time Bends

Fischer, K.

2015, XIII, 137 p. 115 illus., Softcover

ISBN: 978-3-319-17890-5
