

# Contents

<b>1</b>	<b>Motivation and Background Functional Analysis</b>	<b>1</b>
1.1	Introduction	1
1.2	Notations	1
1.3	Motivation	3
1.4	Hilbert Space Theory	8
1.5	Spherical Harmonics and Fourier Analysis	10
1.6	Sobolev Spaces in Euclidean Space	14
1.7	Sobolev Spaces on the Unit Sphere	21
<b>2</b>	<b>The Spherical Basis Function Method</b>	<b>29</b>
2.1	Introduction	29
2.2	A Brief History of the RBF Method	30
2.3	The Spherical Basis Function Method	39
2.4	Framework for Pointwise Error Estimates	47
2.5	Pointwise Error Estimate I	50
2.6	Pointwise Error Estimate II	52
<b>3</b>	<b>Error Bounds via Duchon's Technique</b>	<b>59</b>
3.1	Duchon's Recipe for the Sphere	59
3.2	Global Error Bounds for SBF Interpolation	76
<b>4</b>	<b>Radial Basis Functions for the Sphere</b>	<b>85</b>
4.1	Duchon Splines for the Sphere	85
4.2	Numerical Investigation	91
<b>5</b>	<b>Fast Iterative Solvers for PDEs on Spheres</b>	<b>97</b>
5.1	Introduction	97
5.2	The Weak Formulation of the PDE	99
5.3	The Additive Schwarz Method	101

5.4	A Subspace Decomposition Algorithm . . . . .	103
5.5	An Upper Bound for the Condition Number $\kappa(\mathcal{P})$ . . . . .	104
5.6	An Overlapping Additive Schwarz Algorithm . . . . .	111
5.7	Numerical Results . . . . .	113
<b>6</b>	<b>Parabolic PDEs on Spheres.</b> . . . .	<b>121</b>
6.1	Introduction . . . . .	121
6.2	The Homogeneous Semi-discrete Problem . . . . .	122
6.3	The Inhomogeneous Semi-discrete Problem . . . . .	125
6.4	Time Discretization Using the Backward Euler Method. . . . .	128
6.5	Time Discretization Using the Crank-Nicolson Method . . . . .	132
6.6	Numerical Experiments on $S^2$ . . . . .	135
	<b>References.</b> . . . .	<b>139</b>

Spherical Radial Basis Functions, Theory and  
Applications

Hubbert, S.; Le Gia, Q.T.; Morton, T.M.

2015, X, 143 p. 7 illus., 3 illus. in color., Softcover

ISBN: 978-3-319-17938-4
