

Contents

1	Introduction: A Wealth of Lived Experience	1
1.1	Introduction	1
1.2	Lived Experiences of Weather, Floods and Climate.	2
1.3	The Rich Diversity of Lived Experience	5
1.3.1	Contrasting Lived Experiences of Rich and Poor	6
1.3.2	The Lived Experience of Public Attempts at Climate Change Mitigation and Adaptation in an Affluent Country	7
1.3.3	Connecting Climate Change and Climate Change Mitigation to Lived Experience of Vulnerability of Tropical Forest Communities in East Africa	9
1.3.4	The Lived Experience of Environmental Activists.	15
1.4	From Flood Victims in the United Kingdom to Small Farmers and Drought-Resistant Food Grains in Zimbabwe: Making Sense of the Lived Experience of Climate Change.	20
1.5	The Building Blocks of This Book.	24
	References	24
2	Exploring the Lived Experience of Climate Change	27
2.1	Introduction: Lived Experiences as Rich, Complex Narratives	27
2.2	Lived Experience as a Social Process of Making.	30
2.3	The Complex Interaction of Structure (Power Relations) and Agency that Makes Lived Experience	33
2.4	Lived Experience in Relation to Interacting Phenomena.	38
2.5	Lived Experience in Relation to Culture and Value	41
2.6	The Lived Experience of Climate Change: Personal and Collective	43
2.7	Lived Experience and Scale	45
	References	48

3	Lived Experience and Scientific Knowledge of Climate Change	51
3.1	Introduction	51
3.2	Science and Lived Experience: Whose Reality?	55
3.3	Diverse Scientific Perspectives and the Political Exploitation of Diversity	67
3.4	Working with Scientists	70
3.4.1	Working with Physical Scientists: A Social Science Story	70
	References	74
4	Representing Climate Change: Science, Social Science, Interdisciplinary Approaches and Lived Experience.	77
4.1	Introduction	77
4.2	Climate Change as a ‘Wicked Problem’.	79
4.3	Fundamentals of Natural Science Inquiry and the ‘Scientific Method’.	81
4.4	Underlying Assumptions of the ‘Scientific Method’ and Positivist Objectivity	84
4.5	Fundamentals of Social Science Inquiry and Power Relations . . .	88
4.5.1	A Shift from Numbers to Qualitative Data.	90
4.5.2	Underlying Ontological Assumptions and Celebration of Subjectivity	91
4.6	Interdisciplinarity, Representation and Climate Change	95
4.6.1	The Politics of Representation	98
	References	102
5	Lived Experience and the Advocates of Local Knowledge	105
5.1	Introduction	105
5.2	Local Knowledge and What Works	110
5.2.1	Sharing or Extracting Knowledge Through Participatory Processes: The Contribution of Development Studies	113
5.2.2	Local Knowledge, Power and Participatory Processes in Environmental Studies.	115
5.2.3	Local Knowledge and the Climate Change Literature. . .	117
5.3	Local/Indigenous Knowledge and Identity	119
5.4	Local Knowledge, Indigenous Knowledge and Lived Experience.	121
	References	124
6	Lived Experience and Discourses of Mitigation, Adaptation	127
6.1	Introduction	127
6.2	Mitigation and Adaptation and the IPCC.	128

6.3	Adaptation and Mitigation in the 4th Assessment Report (2007) . . .	130
6.3.1	Adaptation as Covered by the 2007 Report of WGII . . .	130
6.3.2	Mitigation as Covered by the 2007 Report of WGIII . . .	132
6.4	Adaptation and Mitigation in the 5th Assessment Report (2014)	133
6.4.1	The 2014 WGII Report ‘Impacts, Adaptation and Vulnerability’	133
6.4.2	The 2014 WGIII Report ‘Mitigation of Climate Change’	135
6.5	The Lived Experience of Mitigation and Adaptation	140
	References	153
7	Lived Experience and Engagement on Climate Change	155
7.1	Introduction	155
7.2	The Public Will to Know and Act as a Problem of Science Communication	157
7.3	The Public Will to Know and Act, and Disagreement Over Climate Change	160
7.4	The Public Will to Know and Act, Socially Organised Denial and Lived Experience	168
	References	172
8	Lived Experience, Science and a Social Imagination	175
8.1	Introduction	175
8.2	To What Extent Is It Desirable to Expand the Boundaries of Our Lived Experiences Beyond Prevailing Social Norms of Attention?	178
8.2.1	Communicative Action and Hermeneutic and Emancipatory Learning	181
8.2.2	The Social Imagination	184
8.3	To What Extent Is It Desirable to Expand Scientific Knowledges About Climate Change Beyond Their Boundaries?	186
8.4	How Might Expansion of Climate Change Knowledge Be Enabled and Who Might Enable It?	190
	References	197
9	Rationalist and Public Action Theories of Knowledge in Climate Change Debates	201
9.1	Introduction	201
9.2	Towards a Targeted Climate Change Policy	203
9.3	Positive and Normative Assertions of Policy Making	205
9.4	The Role of the Media	207
9.5	The Rationalist Model of Policy Making	209

9.6	The Social Process of a Non-linear Public Action Approach and Lived Experience.	211
9.7	Power Politics and Contested Knowledge	215
9.8	Lived Experience and Public Action Through Demonstration. . .	217
	References	219
10	Institutionalising Lived Experience in the Public Policy Process . . .	223
10.1	Introduction	224
10.2	Why Should We Wish to Institutionalise Lived Experience in Public Policy Debates About Climate Change?	225
10.2.1	Government and Its Local Institutions	225
10.2.2	The Private Sector	228
10.2.3	Scientists Across the Social and Natural Divides.	229
10.2.4	Engineers	230
10.2.5	Civil Society	231
10.2.6	Us, the Authors of This Book.	232
10.3	The Issues (and Problems) Associated with Institutionalising Lived Experience in Public Policy Debates About Climate Change	236
10.3.1	'Getting Real'	236
10.3.2	Creating the Conditions for Productive Engagement with Lived Experiences, and Between Lived Experiences and Other Forms of Knowledge.	237
10.3.3	The Issue of Power	239
10.4	Ways of Institutionalising.	242
10.4.1	Institutionalisation Through Monitoring Independent Social Media	243
10.4.2	Direct Governmental Institutionalisation Through Focus Groups.	245
10.4.3	Independent Institutionalisation Through Environmental Action Groups	246
10.4.4	Bringing It Together: Institutionalising as Space Making.	250
	References	251
11	A Public Action Approach to Knowledge and Intervention to Meet the Climate Challenge.	255
11.1	Introduction	255
11.2	A Public Action Approach to Knowledge	257
11.3	Public Action, Knowledge and Engagement on Climate Change: The Broader Picture.	265
