Learning and Evolution

Towards Real-Time Behavioral Evolution in Video Games	3
<i>Christopher J. Headleand, Gareth Henshall, Llyr Ap Cenydd, and William J. Teahan</i>	
Simulated Road Following Using Neuroevolution	17
<i>Aparajit Narayan, Elio Tuci, and Frédéric Labrosse</i>	
Enhancing Active Vision System Categorization Capability Through Uniform Local Binary Patterns	31
<i>Olalekan Lanihun, Bernie Tiddeman, Elio Tuci, and Patricia Shaw</i>	
Learning in Networked Interactions: A Replicator Dynamics Approach	44
<i>Daan Bloembergen, Ipek Caliskanelli, and Karl Tuyls</i>	

Human Interaction

Human Robot-Team Interaction: Towards the Factory of the Future	61
<i>Daniel Claes and Karl Tuyls</i>	
An Exploration on Intuitive Interfaces for Robot Control Based on Self Organisation	73
<i>Christos Melidis and Davide Marocco</i>	
Adaptive Training for Aggression de-Escalation	80
<i>Tibor Bosse, Charlotte Gerritsen, Jeroen de Man, and Suzanne Tolmeijer</i>	

Robotic Simulation

Mobile GPGPU Acceleration of Embodied Robot Simulation	97
<i>Simon Jones, Matthew Studley, and Alan Winfield</i>	
Ashby's Mobile Homeostat	110
<i>Steve Battle</i>	
Multi-Robot Coverage: A Bee Pheromone Signalling Approach	124
<i>Ipek Caliskanelli, Bastian Broecker, and Karl Tuyls</i>	

Author Index	141
