

Contents

Author biographies	vii
Abbreviations	xv
Introduction	xxi
1 Pathophysiology	1
<i>Hervé Avet-Loiseau and Jill Corre</i>	
Chromosomal aberrations	1
Changes in gene expression	4
Bone marrow microenvironment and cytokine network	5
References	11
2 Diagnosis and staging	15
<i>Carlos Fernández de Larrea and Joan Bladé</i>	
Diagnostic criteria	15
Classification	16
Prognosis	19
Imaging	21
Response criteria	21
Minimal residual disease	25
Acknowledgement	27
References	27
3 Treatment of transplant-eligible patients	29
<i>Mohamad Mohty, Florent Malard, and Jean-Luc Harousseau</i>	
Induction therapy	29
Autologous transplantation	31
Consolidation	32
Maintenance	34
Allogeneic transplantation	36
References	38

4	Treatment of elderly patients with myeloma	41
	<i>Eileen M Boyle, Charline Legrand, Hélène Demarquette, Stéphanie Guidez Charles Herbaux, Xavier Leleu, and Thierry Facon</i>	
	Introduction	41
	Epidemiology	41
	Biological and clinical features	42
	Defining aims	43
	What to aim for?	44
	Disease-specific treatment options	44
	Tailoring the treatment to the patient	50
	Supportive care	56
	Conclusion and perspectives	58
	References	59
5	Treatment of relapsed multiple myeloma	65
	<i>Michel Delforge</i>	
	General considerations	65
	Immediate treatment initiation or watchful waiting	66
	To re-treat or not	68
	Role of allogeneic transplantation	70
	Optimizing drug-based treatment at relapse	70
	Supportive care	73
	Conclusion	74
	References	74
6	Bone disease	79
	<i>Evangelos Terpos</i>	
	Introduction	79
	Biology of multiple myeloma bone disease	79
	Therapy	82
	References	88

Handbook of Multiple Myeloma

Mohty, M.; Harousseau, J.-L. (Eds.)

2015, XXII, 90 p. 4 illus., Softcover

ISBN: 978-3-319-18217-9
