

Contents

Modelling and Visualising Landscape and Terrain Impacts of Planned Developments	1
Gábor Barton, Katalin Bódis and Róbert Géczi	
Morphological Analyses of the Central Slovakia on Base of the DEM.	13
Dalibor Bartoněk, Jiří Bureš, Lubomil Pospíšil and Otakar Švábenský	
Surface Classification Above Gas Pipeline Facilities	27
Dalibor Bartoněk, Irena Opatřilová and Jiří Bureš	
Rockfall Monitoring Based on Surface Models	37
Snežana Bogdanović, Miloš Marjanović, Biljana Abolmasov, Uroš Đurić and Irena Basarić	
Coping with Integrating Low-Cost 3D Printing and Surface Models: A Case Study on Prusa i3	45
Jan Brus and Radek Barviř	
Line-of-Sight Derived Indices: Viewing Angle Difference to a Local Horizon and the Difference of Viewing Angle and the Slope of Line of Sight.	61
Jan Caha and Alexandra Rášová	
Initial Results of a Surface Deformation by Using InSAR Techniques: Case Study of Babadağ (Denizli), Turkey.	73
Fatma Canaslan Çomut, Şule Gürboğa and Aydın Üstün	

Results Comparison of the Flow Direction and Accumulation Algorithms Together with Distributed Rainfall-Runoff Models in Czech Switzerland National Park	87
Vladimír Fárek and Jan Unucka	
Surveying of Small Water Reservoirs for Water Management Purposes	99
Jakub Fuska and Viliam Bárek	
Detailed Digital Terrain Models in the Research of Deserted Settlement: Hydrological Modelling and Environment of Settlement Areas	113
Lukáš Holata and Radek Světlík	
DTM Impact on the Results of Dam Break Simulation in 1D Hydraulic Models.	125
Andrea Jančíková and Jan Unucka	
Dasymetric Mapping of Population Distribution in Serbia Based on Soil Sealing Degrees Layer	137
Nikola Krunić, Branislav Bajat and Milan Kilibarda	
Geographic Information System for Flood Hazard Analysis and Early Warning Using Numerical Weather Predictions	151
Marcin Kulawiak, Andrzej Chybicki, Lukasz Markiewicz and Marlena Jankowska	
Effect of DEM Inaccuracy on Precision of Satellite InSAR Results.	165
Milan Lazecký, Matúš Bakoň and Ivana Hlaváčová	
Creating of DSM Based on RPAS Measurement and Accuracy Testing	173
Karel Pavelka and Jaroslav Šedina	
The Use of Real and Fictitious Surfaces for Territorial Distribution Assessment of Given Geographic Phenomenon	189
Aleš Ruda and Jaromír Kolečka	
Impact of GDAL JPEG 2000 Lossy Compression to a Digital Elevation Model	205
Jan Růžicka and Kateřina Růžicková	
Design of Test Base for Determine Volume Accuracy	215
Václav Šafář	

New Automatic Accuracy Evaluation of Altimetry Data: DTM 5G Compared with ZABAGED[®] Altimetry	225
Jakub Šilhavý and Václav Čada	
Hydraulic Erosion Modeling on a Triangular Mesh	237
Věra Skorkovská, Ivana Kolingerová and Bedrich Benes	
Registration of Optical and Radar Satellite Images Using Local Features and Non-rigid Geometric Transformations	249
Mohamed Tahoun, Aboul Ella Hassanien and Ralf Reulke	
Experimental Comparison of Sequential and Global Modelling Methods of Subsurface Horizon Sequence.	263
Ladislav Vizi and Mária Benčoková	
Implementation of Poisson Faulting Algorithm with Circular Fault Function for Hardness Data Synthesis	281
Korneliusz K. Warszawski and Sławomir S. Nikiel	
Photogrammetric Point Clouds for GIS-Based High-Resolution Estimation of Solar Radiation for Roof-Top Solar Systems	293
Roland Zink, Luis Ramirez Camargo, Patrick Reidelstürz and Wolfgang Dorner	
Author Index	307

Surface Models for Geosciences

Růžicková, K.; Inspektor, T. (Eds.)

2015, XXII, 308 p. 153 illus., 31 illus. in color., Hardcover

ISBN: 978-3-319-18406-7
