

Contents

1	Introduction	1
 Part I The Electrostatics of Maxwell		
2	The Fundamental Properties of Dielectrics. The Doctrines of Faraday and Mossotti	13
2.1	The Theory of Magnetization by Induction, Precursor to the Theory of Dielectrics	13
2.2	The Polarization of Dielectrics	18
2.3	Key Propositions of the Theory of Dielectrics	23
2.4	The Particular Idea of Faraday	29
3	The First Electrostatics of Maxwell	35
3.1	Reminder of the Theory of Heat Conductivity	35
3.2	Theory of Dielectric Media, Constructed by Analogy with the Theory of the Conduction of Heat	37
3.3	Discussion of the First Electrostatics of Maxwell	40
4	The Second Electrostatics of Maxwell	43
4.1	The Hypothesis of Electrical Cells	43
4.2	The Preceding Principles in the Later Writings of Maxwell	46
4.3	The Equation of Free Electricity	48
4.4	The Second Electrostatics of Maxwell is Illusory	50
4.5	Determination of the Electrostatic Energy	54
4.6	On the Forces Exerted Between Two Small Charged Bodies	57
4.7	On the Capacitance of a Capacitor	62

5	The Third Electrostatics of Maxwell	65
5.1	Essential Difference Between the Second and the Third Electrostatics of Maxwell.	65
5.2	Development of the Third Electrostatics of Maxwell	75
5.3	A Return to the First Electrostatics of Maxwell	77
 Part II The Electrodynamics of Maxwell		
6	Conduction Current and Displacement Current	81
6.1	On Conduction Current	81
6.2	On the Displacement Current	83
6.3	In Maxwell's Theory, Is the Total Current a Uniform Current?	85
6.4	Return to the Third Maxwell Electrostatics. To What Extent it Can Agree with Classical Electrostatics	93
7	The Six Equations of Maxwell and Electromagnetic Energy	101
7.1	The Three Relations Between the Components of the Electric Field and the Components of the Current	101
7.2	The Electrotonic State and the Magnetic Potential in the Memoir: ON FARADAY'S LINES OF FORCE	105
7.3	Review of the Previous Theory.	110
7.4	The Electrotonic State and the Electromagnetic Energy in the Memoir: ON PHYSICAL LINES OF FORCE.	114
7.5	The Electrotonic State and Electromagnetic Energy in the Memoir: A DYNAMICAL THEORY OF THE ELECTROMAGNETIC FIELD	123
7.6	The Theory of Magnetism in the TREATISE ON ELECTRICITY AND MAGNETISM	131
7.7	The Theory of Electromagnetism in the TREATISE ON ELECTRICITY AND MAGNETISM	135
8	The Electromagnetic Theory of Light	141
8.1	The Speed of Light and the Propagation of Electrical Actions: The Research of W. Weber and G. Kirchhoff	141
8.2	The Speed of Light and the Propagation of Electrical Actions: The Research of B. Riemann, C. Neumann, and L. Lorenz	146
8.3	The Fundamental Hypothesis of Maxwell—Electrodynamic Polarization of Dielectrics	154
8.4	First Draft of the Electromagnetic Theory of Light of Maxwell	159

8.5	Final Form of the Electromagnetic Theory of Light of Maxwell	163
9	Conclusion	171
	References.	175
	Index	179

The Electric Theories of J. Clerk Maxwell

A Historical and Critical Study

Duhem, P.M.M.

2015, XV, 185 p. 1 illus., Hardcover

ISBN: 978-3-319-18514-9
