

Contents

1	Introduction to One-Dimensional Bose Gases	1
1.1	From Quantum to Statistical Mechanics	1
1.2	Thermal Equilibrium	3
1.3	Bose Statistics	5
1.3.1	The Ideal Bose Gas	5
1.3.2	The Interacting Bose Gas	7
1.4	Degenerate One-Dimensional Bose Gases	9
1.4.1	The Ideal One-Dimensional Bose Gas	10
1.4.2	The Interacting One-Dimensional Bose Gas	10
1.4.3	Luttinger Liquid Theory	13
1.4.4	Luttinger Liquid in a Trap	16
1.4.5	Trapped Quasi-condensates in the 1D/3D Crossover	17
1.4.6	Description by a Stochastic Process	18
1.5	Bose Gases in a Double-Well Potential	20
1.5.1	Matter-Wave Interference of One-Dimensional Bose Gases	22
1.5.2	Equilibrium States	26
	References	30
2	Experimental Realization of One-Dimensional Bose Gases	39
2.1	Magnetic Trapping of Ultracold Atoms	39
2.1.1	Magnetic Trapping	39
2.1.2	Atom Chips	40
2.2	Theory of Radio-Frequency Dressed-State Potentials	42
2.2.1	A Double-Well Potential for Ultracold Atoms	43
2.2.2	Beyond the Rotating-Wave Approximation	45
2.3	Experimental Setup and Cooling Sequence	47
2.3.1	Atom Source and Precooling	48
2.3.2	Science Chamber and Mirror Magneto-optical Trap	48
2.3.3	Wire Traps and Evaporative Cooling	49

2.3.4	The Atom Chip	49
2.3.5	Imaging Systems	51
2.3.6	Making and Probing Degenerate Gases	54
2.4	Experiments with Atoms in a Tunable Double-Well Potential . . .	56
2.4.1	Characterization of the Radio-Frequency Dressing	57
2.4.2	Turning Off the Double Well	57
2.4.3	Equilibrium States: Cooling into the Double Well	59
	References	63
3	Isolated Quantum Systems Out of Equilibrium	67
3.1	Dynamics Following a Quench	67
3.1.1	Scenario I: No Relaxation	69
3.1.2	Scenario II: Relaxation with One Timescale	70
3.1.3	Scenario III: (Partial) Relaxation with More Timescales	71
3.2	The Role of Integrability	71
	References	73
4	Relaxation and Prethermalization in One-Dimensional Bose Gases	75
4.1	Coherent Splitting as a Quench	76
4.2	Observation of a Non-thermal Steady State	79
4.3	Theoretical Discussion and Interpretation	82
4.4	Approximate Description Using an Ornstein-Uhlenbeck Process	87
4.5	Dynamics Beyond Prethermalization	90
	References	93
5	Local Emergence of Thermal Correlations	97
5.1	The Local Relaxation Conjecture	97
5.2	Experimental Results	98
5.3	Theoretical Discussion	102
5.4	The Characteristic Velocity	106
5.5	Conclusion	107
	References	108
6	Experimental Observation of a Generalized Gibbs Ensemble	111
6.1	The Generalized Gibbs Ensemble	111
6.2	Experimental Results	112
6.3	Conclusion	119
	References	120

7	Relaxation Dynamics in an Imbalanced Pair of One-Dimensional Bose Gases	123
7.1	Quenching an Imbalanced Pair of One-Dimensional Bose Gases	123
7.2	Experimental Results	124
7.3	Theoretical Discussion and Interpretation	127
7.4	Conclusion	131
	References	132
8	Conclusion and Outlook	135
8.1	Cooling, Thermalization and Ultracold Mixtures in 1D	135
8.2	Using Prethermalized States for Precision Interferometry	136
8.3	From the Coherence Dynamics of Coupled 1D Superfluids to Universality Away from Equilibrium	136
	References	139
	Appendices	141

Non-equilibrium Dynamics of One-Dimensional Bose
Gases

Langen, T.

2015, XV, 146 p. 56 illus., 19 illus. in color., Hardcover

ISBN: 978-3-319-18563-7
