

# Contents

## Part I Geometric Measure Theory

<b>Sixty Years of Fractal Projections</b> .....	3
Kenneth Falconer, Jonathan Fraser, and Xiong Jin	
<b>Scenery Flow, Conical Densities, and Rectifiability</b> .....	27
Antti Käenmäki	
<b>The Shape of Anisotropic Fractals: Scaling of Minkowski Functionals</b> ...	39
Philipp Schönhöfer and Klaus Mecke	
<b>Projections of Self-Similar and Related Fractals: A Survey of Recent Developments</b> .....	53
Pablo Shmerkin	

## Part II Self-Similar Fractals and Recurrent Structures

<b>Dimension of the Graphs of the Weierstrass-Type Functions</b> .....	77
Krzysztof Barański	
<b>Tiling <math>\mathbb{Z}^2</math> by a Set of Four Elements</b> .....	93
De-Jun Feng and Yang Wang	
<b>Some Recent Developments in Quantization of Fractal Measures</b> .....	105
Marc Kesseböhmer and Sanguo Zhu	
<b>Apollonian Circle Packings</b> .....	121
Mark Pollicott	
<b>Entropy of Lyapunov-Optimizing Measures of Some Matrix Cocycles</b> ....	143
Michał Rams	

### Part III Analysis and Algebra on Fractals

<b>Poincaré Functional Equations, Harmonic Measures on Julia Sets, and Fractal Zeta Functions</b> .....	157
Peter J. Grabner	

<b>From Self-Similar Groups to Self-Similar Sets and Spectra</b> .....	175
Rostislav Grigorchuk, Volodymyr Nekrashevych, and Zoran Šunić	

<b>Finite Energy Coordinates and Vector Analysis on Fractals</b> .....	209
Michael Hinz and Alexander Teplyaev	

<b>Fractal Zeta Functions and Complex Dimensions: A General Higher-Dimensional Theory</b> .....	229
Michel L. Lapidus, Goran Radunović, and Darko Žubričić	

### Part IV Multifractal Theory

<b>Inverse Problems in Multifractal Analysis</b> .....	261
Julien Barral	

<b>Multifractal Analysis Based on <math>p</math>-Exponents and Lacunarity Exponents</b> .....	279
Patrice Abry, Stéphane Jaffard, Roberto Leonarduzzi, Clothilde Melot, and Herwig Wendt	

### Part V Random Constructions

<b>Dimensions of Random Covering Sets</b> .....	317
Esa Järvenpää and Maarit Järvenpää	

<b>Expected Lifetime and Capacity</b> .....	327
András Telcs and Marianna E.-Nagy	

Fractal Geometry and Stochastics V

Bandt, C.; Falconer, K.; Zähle, M. (Eds.)

2015, X, 340 p. 52 illus., 21 illus. in color., Hardcover

ISBN: 978-3-319-18659-7

A product of Birkhäuser Basel
