1	Requirements Problem Solving	1
1.1	Motivation	1
1.2	Problem Situations	2
1.3	Problem-Solving Tasks	4
1.4	Solution Situations	6
1.5	Requirements Problem Solving	6
2	Problem-Solving Automation with Artificial Intelligence	9
2.1	Automation	9
2.2	Ill-Structured Problems	10
2.3	Well-Structured Problems	13
2.4	Well-Structured Subproblems	15
2.5	Case-Specific and Recurrent Tasks	17
2.6	Languages and Algorithms	17
2.7	Artificial Intelligence	18
3	Problem and Solution Concepts in Requirements Engineering	21
3.1	Requirements Engineering	21
3.2	Problem and Solution	22
3.2.1	Problem	23
3.2.2	Solution	24
3.3	System	24
3.4	Model	24
3.5	Default Problem and Solution	25
4	Introduction to Requirements Modeling Languages	29
4.1	Formal Language	29
4.1.1	Syntax	30
4.1.2	Semantics	31
4.2	Role in Problem Solving	32
4.3	Rough Historical Overview	33

4.4	i-Star	37
4.4.1	Motivation	38
4.4.2	Syntax	40
4.4.3	Semantic Domain and Mapping	40
4.4.4	Comments	41
4.5	Technique	42
4.5.1	Motivation	42
4.5.2	Semantic Domain and Mapping	45
4.5.3	Syntax and More Semantic Mapping	47
4.5.4	Analysis	52
4.5.5	Formalization	54
4.5.6	Comments	59
5	Requirements Problem-Solving Cases	61
5.1	Brussels Law	61
5.1.1	Terminology	62
5.1.2	Interviews Summary	63
5.1.3	Problems	64
5.2	Copenhagen Sports	66
5.2.1	Terminology	66
5.2.2	Interview Summary	67
5.2.3	Problem	68
5.3	Dubai Telecom	68
5.3.1	Interviews Summary	68
5.3.2	Problem	70
5.4	London Ambulance	70
6	Checklists, Templates, and Services for Requirements	
	Modeling Language Design	73
6.1	Problem-Solving Services	73
6.2	Checklists and Templates	75
6.3	Language and Module Names	76
7	Relations	77
7.1	Motivation	77
7.2	Single Relation Language	78
7.2.1	Choose a Language Service	79
7.2.2	Models over Fragments	80
7.2.3	Trivial Modeling Language	82
7.3	Modular Definitions	84
7.4	Some Influence Relations	89
7.4.1	Presence of Influence	90
7.4.2	Direction of Influence	92
7.4.3	Relative Strength of Influence	94
7.4.4	Summary on Influence Relations	98

7.5	Arguments in Models	98
7.5.1	Support and Defeat	100
7.5.2	Accepted or Rejected	105
7.6	Combinations of Relations	112
7.6.1	Independent Relations	112
7.6.2	Interacting Relations	113
7.7	Summary on Relations	116
8	Guidelines	119
8.1	Motivation	119
8.2	Guidelines from Arguments	120
8.3	Composite Guidelines	124
8.4	Stronger and Weaker Guidelines	128
8.5	Summary on Guidelines	130
9	Categories	131
9.1	Motivation	131
9.2	Independent Categories	132
9.3	Taxonomy of Categories	136
9.4	In Meta-models and Ontologies	139
9.5	Derived Categories and Relations	140
9.6	Enforce Category Use	143
9.7	Summary on Categories	145
10	Valuation	147
10.1	Motivation	147
10.2	Propagating Binary Values	148
10.2.1	Binary Value Type	148
10.2.2	Value Propagation	149
10.3	Combining Several Binary Value Types	156
10.3.1	Independent Value Assignments	158
10.3.2	Dependent Value Assignments	162
10.4	Sets of Values	163
10.5	Constraints on Assignments	165
10.6	Real Numbers	167
10.7	Summary on Valuation	168
11	Uncertainty	171
11.1	Motivation	171
11.2	Independent Random Variables	173
11.3	Dependent Random Variables	180
11.3.1	Ignoring Existing Relations	181
11.3.2	Using Existing Relations	182

12 Alternatives	187
12.1 Motivation	187
12.2 Alternatives over Binary Value Types	189
12.3 Picks and Their Use	200
12.4 Several Arbitrary Value Types	216
12.5 Summary on Alternatives	220
13 Constraints	223
13.1 Representing Constraints	223
13.2 Constraints in Outcome Search	229
13.3 Summary on Constraints	237
14 Preferences	239
14.1 Motivation	239
14.2 Preferences and Criteria Basics	240
14.2.1 Core Preference Relations	240
14.2.2 Domains of Preference Relations	241
14.2.3 Criteria	242
14.3 Representing Preferences	242
14.4 Finding Criteria	249
14.5 Better and Best Outcomes	254
14.6 Summary on Preferences	262
15 Links to Formal Logic	267
15.1 Motivation	267
15.2 Models to Theories, Approach One	269
15.3 Models to Theories, Approach Two	273
15.4 Risks of Mapping to Formal Theories	273
15.5 Summary on Formal Theories	274
References	275
Index	283

The Design of Requirements Modelling Languages
How to Make Formalisms for Problem Solving in
Requirements Engineering

Jureta, I.

2015, XII, 286 p., Hardcover

ISBN: 978-3-319-18820-1
