

# Contents

<b>1</b>	<b>Introducing Internal Waves</b>	<b>1</b>
1.1	Introduction.	1
1.2	Internal Ocean Waves and Their Significance	2
1.3	Experimental Insights into Internal Waves.	3
1.4	Useful Definitions	6
1.5	Stability of Water Masses	9
1.6	Governing Equations	11
	References	22
<b>2</b>	<b>Internal Waves in Two-Layer Sea</b>	<b>25</b>
2.1	Introduction.	25
2.2	Analytic Solutions for Infinitesimal Interfacial Waves.	25
2.3	Progressive Interfacial Waves of Finite Amplitude	33
2.3.1	Deep and Intermediate Waters.	33
2.3.2	Long Interfacial Waves.	35
	References	43
<b>3</b>	<b>Waves in a Continuously Stratified Sea of Constant Water Depth</b>	<b>45</b>
3.1	Introduction.	45
3.2	Exponential Density Profile.	46
3.3	Three-Layer Density Profile	53
3.4	Other Specific Density Profiles	59
3.5	Arbitrary Density Profile—Variational Approach	61
3.6	System of Two Pycnoclines	64
3.7	Weakly Nonlinear Long Waves	69
3.8	Wave Energy in a Stratified Fluid	77

3.9	Remarks on Wave Induced Mixing in a Stratified Fluid . . . . .	81
3.9.1	Mixing in Two-Layer Flow System . . . . .	81
3.9.2	Role of Internal Waves in Supporting Turbulent Mixing. . . . .	82
	References . . . . .	85
<b>4</b>	<b>Waves in a Continuously Stratified Sea of Varying Depth . . . . .</b>	<b>87</b>
4.1	Introduction. . . . .	87
4.2	Review of Available Theoretical and Numerical Prediction Methods . . . . .	87
4.3	Waves Propagating on a Coastal Slope . . . . .	89
4.4	Ray Method for Internal Waves . . . . .	95
4.5	Nonlinear Internal Waves Propagation in a Horizontally Inhomogeneous Sea . . . . .	99
	References . . . . .	105
<b>5</b>	<b>Generation of Internal Waves . . . . .</b>	<b>109</b>
5.1	Introduction. . . . .	109
5.2	Generation of Internal Waves by Localised Disturbances. . . . .	109
5.3	Generation of Internal Waves by Wind Action and Atmospheric Pressure Fluctuations . . . . .	112
	References . . . . .	117
<b>6</b>	<b>Spectral Properties of Internal Waves . . . . .</b>	<b>119</b>
6.1	Introduction. . . . .	119
6.2	Internal Waves Spectra with a Given Modal Structure . . . . .	120
6.3	Experimental Spectra for Internal Waves in Deep Ocean. . . . .	128
	References . . . . .	130
<b>7</b>	<b>Internal Waves in the Baltic Sea . . . . .</b>	<b>131</b>
7.1	Introduction. . . . .	131
7.2	Basic Hydrographical and Dynamical Features of the Baltic Sea . . . . .	131
7.3	Observations of Internal Waves Using Thermistors Chain . . . . .	135
7.4	Observations of Vertical Water Structure Using Moving CTD Sensors. . . . .	142
	References . . . . .	150
	<b>Appendix A: Sea Water Density According to UNESCO Formula. . . . .</b>	<b>153</b>
	<b>Appendix B: Determination of Isopycnal Displacements by Moving CTD Sensors . . . . .</b>	<b>157</b>
	<b>Index . . . . .</b>	<b>161</b>

Internal Gravity Waves in the Shallow Seas

Massel, S.R.

2015, XVI, 163 p. 55 illus., 10 illus. in color., Hardcover

ISBN: 978-3-319-18907-9
