

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Field Theories in Cosmology	1
1.1.1	Infrared Modifications of GR	3
1.1.2	Quantum Field Theories	7
1.1.3	Effective Field Theories	16
1.2	Massive Gravity	18
1.2.1	Bi-Gravity	24
1.2.2	Vielbein Formulation	25
1.3	Galileons	26
1.4	Outline of This Work	34
	References	36

## Part I Cosmology with Massive Gravity

<b>2</b>	<b>Cosmology of Massive Gravity in the Decoupling Limit</b>	<b>41</b>
2.1	The Self-Accelerated Solution in the Decoupling Limit	45
2.1.1	Self-Accelerating Background	45
2.1.2	Small Perturbations and Stability	47
2.2	Screening the Cosmological Constant in the Decoupling Limit	49
2.2.1	The Degravitating Branch	50
2.2.2	de Sitter Branch	51
2.2.3	Diagonalizable Action	52
2.2.4	Phenomenology	55
2.3	Summary and Critics	57
	References	59

<b>3 Proxy Theory</b>	61
3.1 de Sitter Solutions	63
3.1.1 Self-accelerating Solution	64
3.1.2 Stability Conditions	65
3.1.3 Degravitation	66
3.2 Cosmology	66
3.3 Structure Formation	68
3.4 Covariantization from the Einstein Frame	70
3.5 Proxy Theory as a Subclass of Horndeski Scalar-Tensor Theories	73
3.6 Critical Assessment of the Proxy Theory	74
3.7 Horndeski Vector Fields	84
3.8 Summary and Discussion	93
References	95

## Part II Superluminality

<b>4 Superluminal Propagation in Galileon Models</b>	99
4.1 Single Galileon	100
4.2 Multi-Galileon	102
4.2.1 Bi-Galileon	104
4.3 Spherical Symmetric Backgrounds	104
4.3.1 Focus on the Bi-Galileon	106
4.4 Superluminalities at Large Distances	107
4.4.1 Superluminalities from the Cubic Galileon	108
4.4.2 Superluminalities from the Quartic Galileon About an Extended Source	110
4.5 Quartic Galileon About a Point-Source	111
4.5.1 Stability at Large Distances	111
4.5.2 Short Distance Behavior	112
4.5.3 Stability at Short Distances	113
4.5.4 Sound Speed Near the Source	114
4.5.5 Special Case of Dominant First Order Corrections	116
4.6 Cubic Lagrangian Near the Source	118
4.7 Summary and Discussion	119
References	121

**Part III Quantum Corrections in Massive Gravity**

<b>5 Quantum Corrections: Natural Versus Non-natural</b>	125
5.1 Non-renormalization Theorem for the Galileon Theory	127
5.2 Non-renormalization Theorem in the Decoupling Limit of Massive Gravity	129
5.3 Implications for the Full Theory	135
References	138
<b>6 Renormalization Beyond the Decoupling Limit of Massive Gravity</b>	141
6.1 Quantum Corrections in the Metric Formulation	142
6.1.1 Quantum Corrections in the Matter Loop	144
6.1.2 Quantum Corrections in the Graviton Loop	148
6.2 Quantum Correction in the Vielbein Language	152
6.2.1 Ghost-Free Massive Gravity in the Vielbein Inspired Variables	153
6.2.2 Quantum Corrections from Matter Loops in the Vielbein Language	156
6.2.3 Quantum Corrections from Graviton Loops in the Vielbein Language	164
6.3 Quantum Corrections in Bimetric Gravity	172
6.3.1 Quantum Corrections in the Decoupling Limit of Bimetric Theory	174
6.3.2 Beyond the Decoupling Limit	175
6.4 Summary and Critics	182
References	187

**Part IV Summary**

<b>7 Summary and Outlook</b>	191
7.1 Summary	191
7.2 Outlook	192
7.2.1 Theoretical Concepts	193
7.2.2 Observational Concepts	194

<b>Appendix</b>	197
-----------------	-----

Theoretical and Observational Consistency of Massive  
Gravity

Heisenberg, L.

2015, XXI, 201 p. 42 illus., 19 illus. in color., Hardcover

ISBN: 978-3-319-18934-5
