

Contents

1	A Survey of Dynamic Representations and Generalizations of the Marshall–Olkin Distribution	1
	German Bernhart, Lexuri Fernández, Jan-Frederik Mai, Steffen Schenk and Matthias Scherer	
1.1	The Classical Construction of the Marshall–Olkin Law	2
1.1.1	The Exogenous Shock Model Is “Static”	4
1.2	Interpretation via Poisson Processes	5
1.2.1	Generalization to Cox Processes	5
1.3	The Iterative Construction of Barry Arnold	6
1.3.1	Generalization to Multivariate Phase-Type Distributions	7
1.4	The Lévy–Frailty Construction	8
1.4.1	Generalizations	9
1.5	Conclusion	12
	References	12
2	Copulas Based on Marshall–Olkin Machinery	15
	Fabrizio Durante, Stéphane Girard and Gildas Mazo	
2.1	Introduction	15
2.2	Marshall–Olkin Machinery	16
2.3	Copulas Generated by One Independent Shock	17
2.3.1	The Bivariate Case	19
2.3.2	The Multivariate Case	22
2.4	Combining Marshall–Olkin Bivariate Copulas to Get Flexible Multivariate Models	24
2.5	Some Comments About Statistical Inference Procedures	27
2.6	Conclusions	29
	References	30

3	The Mean of Marshall–Olkin-Dependent Exponential Random Variables	33
	Lexuri Fernández, Jan-Frederik Mai and Matthias Scherer	
3.1	Introduction	33
3.2	The Marshall–Olkin Law	34
3.3	The Exchangeable Marshall–Olkin Law	38
3.4	The Extendible Marshall–Olkin Law	46
3.5	Conclusion.	49
	References.	49
4	General Marshall–Olkin Models, Dependence Orders, and Comparisons of Environmental Processes	51
	Esther Frostig and Franco Pellerey	
4.1	Introduction	51
4.2	Preliminaries	52
4.2.1	Dependence Orders	53
4.2.2	Some Univariate Stochastic Orders	55
4.2.3	The General Model for the Environmental Processes	55
4.3	Comparison Results	56
4.4	Supermodular Comparison of Environmental Processes	58
4.4.1	An Application in Population Dynamics	58
4.4.2	An Application in Comparisons of Collective Risks.	60
4.4.3	An Application in Ruin Theory	61
4.4.4	An Application in Reliability	62
	References.	63
5	Marshall–Olkin Machinery and Power Mixing: The Mixed Generalized Marshall–Olkin Distribution	65
	Sabrina Mulinacci	
5.1	Introduction	65
5.2	Mixtures of Survival Distributions on $[0, +\infty)^d$	67
5.2.1	Min-ID Distributions.	67
5.2.2	Power-Mixtures of Survival Min-ID Distributions	70
5.2.3	Conditional Mixed Survival Min-ID Distributions	71
5.3	Power-Mixture Closure Under the MO-machinery.	73
5.3.1	The General MO-machinery.	73
5.3.2	Min-ID Closure Under the MO-machinery	75
5.3.3	Power-Mixture Closure Under the MO-machinery.	76
5.4	The Generalized Marshall–Olkin Type Distributions	77
5.5	The Mixed Generalized Marshall–Olkin Distribution	81
	References.	86
