

Contents

Deriving Protein Backbone Using Traces Extracted from Density Maps at Medium Resolutions	1
<i>Kamal Al Nasr and Jing He</i>	
Binary Contingency Table Method for Analyzing Gene Mutation in Cancer Genome	12
<i>Emi Ayada, Atsushi Niida, Takanori Hasegawa, Satoru Miyano, and Seiya Imoto</i>	
A Filter-Based Approach for Approximate Circular Pattern Matching	24
<i>Md. Aashikur Rahman Azim, Costas S. Iliopoulos, M. Sohel Rahman, and Mohammad Samiruzzaman</i>	
Fast Algorithms for Inferring Gene-Species Associations	36
<i>Arkadiusz Betkier, Paweł Szczęsny, and Paweł Górecki</i>	
Couplet Supertree Based Species Tree Estimation	48
<i>Sourya Bhattacharyya and Jayanta Mukhopadhyay</i>	
A Novel Computational Method for Deriving Protein Secondary Structure Topologies Using Cryo-EM Density Maps and Multiple Secondary Structure Predictions	60
<i>Abhishek Biswas, Desh Ranjan, Mohammad Zubair, and Jing He</i>	
Managing Reproducible Computational Experiments with Curated Proteins in KINARI-2	72
<i>John C. Bowers, Rose Tharail John, and Ileana Streinu</i>	
Protein Crystallization Screening Using Associative Experimental Design	84
<i>İmren Dinç, Marc L. Pusey, and Ramazan S. Aygün</i>	
DAM: A Bayesian Method for Detecting Genome-wide Associations on Multiple Diseases	96
<i>Xuan Guo, Jing Zhang, Zhipeng Cai, Ding-Zhu Du, and Yi Pan</i>	
MINED: An Efficient Mutual Information Based Epistasis Detection Method to Improve Quantitative Genetic Trait Prediction	108
<i>Dan He, Zhanyong Wang, and Laxmi Parada</i>	
Domain Adaptation with Logistic Regression for the Task of Splice Site Prediction	125
<i>Nic Herndon and Doina Caragea</i>	

A Stacking-Based Approach to Identify Translated Upstream Open Reading Frames in <i>Arabidopsis Thaliana</i>	138
<i>Qiwen Hu, Catharina Merchante, Anna N. Stepanova, Jose M. Alonso, and Steffen Heber</i>	
PRESS-PLOT: An Online Server for Protein Structural Analysis and Evaluation with Residue-level Virtual Angle Correlation Plots	150
<i>Yuanyuan Huang, Kejue Jia, Robert Jernigan, and Zhijun Wu</i>	
Calcium Ion Fluctuations Alter Channel Gating in a Stochastic Luminal Calcium Release Site Model	162
<i>Hao Ji, Yaohang Li, and Seth H. Weinberg</i>	
Interleaving Global and Local Search for Protein Motion Computation	175
<i>Kevin Molloy and Amarda Shehu</i>	
On the Complexity of Duplication-Transfer-Loss Reconciliation with Non-binary Gene Trees	187
<i>Misagh Kordi and Mukul S. Bansal</i>	
On the Near-Linear Correlation of the Eigenvalues Across BLOSUM Matrices	199
<i>Jin Li, Yen Kaow Ng, Xingwu Liu, and Shuai Cheng Li</i>	
Predicting RNA Secondary Structures: One-grammar-fits-all Solution	211
<i>Menglu Li, Micheal Cheng, Yongtao Ye, Wk Hon, Hf Ting, Tw Lam, Cy Tang, Thomas Wong, and Sm Yiu</i>	
An Approach for Matching Mixture MS/MS Spectra with a Pair of Peptide Sequences in a Protein Database	223
<i>Yi Liu, Weiping Sun, Gilles Lajoie, Bin Ma, and Kaizhong Zhang</i>	
Diploid Alignments and Haplotyping	235
<i>Veli Mäkinen and Daniel Valenzuela</i>	
Structural Comparative Analysis of Ecto- NTPDase Models from <i>S. Mansoni</i> and <i>H. Sapiens</i>	247
<i>Vinicius Schmitz Nunes, Eveline Gomes Vasconcelos, Priscila Faria-Pinto, Carlos Cristiano H. Borges, and Priscila V.S.Z. Capriles</i>	
Assessing the Robustness of Parsimonious Predictions for Gene Neighborhoods from Reconciled Phylogenies: Supplementary Material	260
<i>Ashok Rajaraman, Cedric Chauve, and Yann Ponty</i>	
Sorting Signed Circular Permutations by Super Short Reversals	272
<i>Gustavo Rodrigues Galvão, Christian Baudet, and Zanoni Dias</i>	

Multiple Alignment of Structures Using Center of ProTeins	284
<i>Kaushik Roy, Satish Chandra Panigrahi, and Asish Mukhopadhyay</i>	
NRRC: A Non-referential Reads Compression Algorithm	297
<i>Subrata Saha and Sanguthevar Rajasekaran</i>	
New Heuristics for Clustering Large Biological Networks	309
<i>Md. Kishwar Shafin, Kazi Lutful Kabir, Iffatur Ridwan, Tasmiah Tamzid Anannya, Rashid Saadman Karim, Mohammad Mozammel Hoque, and M. Sohel Rahman</i>	
A Novel Algorithm for Glycan <i>de novo</i> Sequencing Using Tandem Mass Spectrometry	320
<i>Weiping Sun, Gilles A. Lajoie, Bin Ma, and Kaizhong Zhang</i>	
Community Detection-Based Feature Construction for Protein Sequence Classification	331
<i>Karthik Tangirala, Nic Herndon, and Doina Caragea</i>	
Curvilinear Triangular Discretization of Biomedical Images	343
<i>Jing Xu and Andrey N. Chernikov</i>	
The Role of miRNAs in Cisplatin-Resistant HeLa Cells	355
<i>Yubo Yang, Cuihong Dai, Zhipeng Cai, Aiju Hou, Dayou Cheng, and Dechang Xu</i>	
DNA AS X: An Information-Coding-Based Model to Improve the Sensitivity in Comparative Gene Analysis	366
<i>Ning Yu, Xuan Guo, Feng Gu, and Yi Pan</i>	
A Distance-Based Method for Inferring Phylogenetic Networks in the Presence of Incomplete Lineage Sorting	378
<i>Yun Yu and Luay Nakhleh</i>	
Predicting Protein Functions Based on Dynamic Protein Interaction Networks	390
<i>Bihai Zhao, Jianxin Wang, Fang-Xiang Wu, and Yi Pan</i>	
An Iterative Approach for Phylogenetic Analysis of Tumor Progression Using FISH Copy Number	402
<i>Jun Zhou, Yu Lin, William Hoskins, and Jijun Tang</i>	
Phenome-Based Gene Discovery Provides Information about Parkinson's Disease Drug Targets	413
<i>Yang Chen and Rong Xu</i>	

Estimating Features with Missing Values and Outliers: a Bregman-proximal Point Algorithm for Robust Non-negative Matrix Factorization with Application to Gene Expression Analysis	415
<i>Stéphane Chrétien, Christophe Guyeux, Bastien Conesa, Régis Delage-Mouroux, Michèle Jouvenot, Philippe Huetz, and Françoise Descôtes</i>	
Conservation and Network Analysis of the $(4\beta+\alpha)$ Fold of the Immunoglobulin-Binding B1 Domain of Protein G to Elucidate the Key Determinants of Structure, Folding and Stability	417
<i>Jason C. Collins, John Bedford, and Lesley H. Greene</i>	
Assessment of Transcription Factor Binding Motif and Regulon Transfer Methods	420
<i>Sefa Kilic and Ivan Erill</i>	
Short Tandem Repeat Number Estimation from Paired-end Sequence Reads by Considering Unobserved Genealogy of Multiple Individuals . .	422
<i>Kaname Kojima, Yosuke Kawai, Naoki Nariai, Takahiro Mimori, Takanori Hasegawa, and Masao Nagasaki</i>	
PnpProbs: Better Multiple Sequence Alignment by Better Handling of Guide Trees	424
<i>Yongtao Ye, Tak-Wah Lam, and Hing-Fung Ting</i>	
A Novel Method for Predicting Essential Proteins Based on Subcellular Localization, Orthology and PPI Networks	427
<i>Gaoshi Li, Min Li, Jianxin Wang, and Yi Pan</i>	
BASE: A Practical <i>de novo</i> Assembler for Large Genomes Using Longer NGS Reads	429
<i>Binghang Liu, Ruibang Luo, Chi-Man Liu, Dinghua Li, Yingrui Li, Hing-Fung Ting, Siu-Ming Yiu, and Tak-Wah Lam</i>	
InteGO2: A Web Tool For Measuring and Visualizing Gene Semantic Similarities Using Gene Ontology	431
<i>Jiajie Peng, Hongxiang Li, Yongzhuang Liu, Liran Juan, Qinghua Jiang, Yadong Wang, and Jin Chen</i>	
Predicting Drug-Target Interactions for New Drugs via Strategies for Missing Interactions	433
<i>Jian-Yu Shi, Jia-Xin Li, and Hui-Meng Lu</i>	
A Genome-Wide Drug Repositioning Approach toward Prostate Cancer Drug Discovery	435
<i>Rong Xu and QuanQiu Wang</i>	
Clustering Analysis of Proteins from Microbial Genomes at Multiple Levels of Resolution	438
<i>Leonid Zaslavsky and Tatiana Tatusova</i>	

Systematic Analyses Reveal Regulatory Mechanisms of the Flexible Tails on Beta-catenin	440
<i>Bi Zhao and Bin Xue</i>	
GRASPx: Efficient Homolog-Search of Short-Peptide Metagenome Database Through Simultaneous Alignment and Assembly	442
<i>Cuncong Zhong, Youngik Yang, and Shibu Yooseph</i>	
Author Index	445

Bioinformatics Research and Applications
11th International Symposium, ISBRA 2015 Norfolk,
USA, June 7-10, 2015 Proceedings
Harrison, R.; Li, Y.; Măndoiu, I. (Eds.)
2015, XXII, 446 p. 163 illus., Softcover
ISBN: 978-3-319-19047-1
