

Contents

1	Introduction	1
1.1	War and Fixed Nitrogen	1
1.2	Background to Fixed Nitrogen	4
1.3	Natural Nitrogen Fertilizers	6
1.4	Fertilizers and Agriculture Experiment Stations	7
1.5	Expansion of the Nitrogen Industry	8
	References	14
2	Electric Arcs, Cyanamide, Carl Bosch and Fritz Haber	17
2.1	Electrochemistry	17
2.2	The Burning of Air	19
2.3	Cyanamide	32
2.4	BASF	43
2.5	Carl Bosch	45
2.6	Fritz Haber	47
2.7	Nitrogen Fixation: Haber's Studies	49
2.8	"Es Tropft, Herr Geheimrat!" The Direct Synthesis of Ammonia	52
2.8.1	Bosch and Haber	55
2.9	Nitric Acid	66
	References	68
3	The Great War	73
3.1	Chemistry at War	73
3.2	Badische versus Bayrische	78
3.3	The Explosives: Nitro Compounds	81
	References	82
4	Concentrated Nitric Acid and Expansion of the Nitrogen Industry in Germany, France and Britain	85
4.1	Catalytic Oxidation and Cyanamide	85
4.2	Let's Mention the War... and Fritz Haber	93

4.3	Chemical Warfare	95
4.4	War Work: Ammonia Converters and Merseburg	98
	References	108
5	Nobel Prizes and New Technologies	111
5.1	Haber and the Nobel Prize: Don't Mention the War	111
5.2	Gold from the Sea, and After	112
5.3	Non-BASF Ammonia Technology and Ammonia Oxidation	113
5.3.1	Britain	114
5.3.2	Italy: Casale and Fauser	118
5.3.3	France	127
5.3.4	Other Developments in Europe, and Japan	128
5.3.5	United States	130
5.4	Friedrich Bergius, Carl Bosch, and the I.G.	135
5.4.1	High-Pressure Catalytic Circulatory Plants	135
	References	141
6	Conclusion: A Legacy of Synthetic Nitrogen	145
6.1	Homage to Inventors	145
6.2	Autarky	147
	References	150
	Index	153

The Synthetic Nitrogen Industry in World War I
Its Emergence and Expansion

Travis, A.S.

2015, IX, 163 p. 66 illus., 16 illus. in color., Softcover

ISBN: 978-3-319-19356-4
