1	Introduction: Surface Plasmons	1
1.1	Introduction	1
1.2	Brief History	2
1.3	Theory: Surface Plasmons	4
1.3.1	Surface Plasmons in Metal Nanostructures	5
1.3.2	Surface Plasmons in Metal Films	12
1.4	Surface Plasmons Today	22
1.5	Aims of This Work	23
1.6	Organization of the Work	24
	References	24
2	Experimental Techniques	29
2.1	Introduction	29
2.2	Sample Growth	29
2.2.1	Thin Film Growth by Thermal Evaporation	30
2.2.2	Fabrication of Nanostructures by Annealing of Thin Films	35
2.3	Reflected Light Optical Microscopy (RLOM)	36
2.4	Scanning Electron Microscopy (SEM)	37
2.5	Atomic Force Microscopy (AFM)	37
2.6	Thickness Determination of the Films	39
2.6.1	X-Ray Reflectivity (XRR)	39
2.6.2	Relation Between the Thickness of Films and Their Integrated Absorbance	40
2.7	Raman Spectroscopy	41
2.8	X-Ray Absorption Spectroscopy (XAS)	43
2.9	Optical Absorption Spectroscopy	46

2.10	Surface Plasmon Resonance (SPR) in the Kretschmann-Raether Configuration.	47
2.10.1	Software to Measure SPR Spectra	51
2.10.2	Reproducibility of SPR Spectra	51
2.10.3	Capabilities of the Experimental Setup	52
2.10.4	Software to Simulate SPR Spectra	54
	References	55
3	Extended and Localized Surface Plasmons in Annealed Au Films on Glass Substrates	59
3.1	Introduction.	59
3.2	Fabrication of Samples	60
3.3	Experimental Details.	61
3.4	Morphological Characterization of Samples	61
3.5	Optical Characterization of Samples	67
3.5.1	Extended Surface Plasmon Resonance.	67
3.5.2	Localized Surface Plasmon Resonance	69
3.6	Conclusions.	71
	References	72
4	Complex Au/FeO_x Nanostructures Obtained from Annealed Bilayers	73
4.1	Introduction.	73
4.2	Experimental Details.	74
4.3	Au/FeO _x Nanostructures Obtained by Annealing in Air.	75
4.3.1	Fabrication of Samples Prepared in Air.	75
4.3.2	Morphological Characterization of Samples Prepared in Air.	78
4.3.3	Confocal Raman Characterization of Samples Prepared in Air.	87
4.3.4	Optical Characterization of Samples Prepared in Air.	96
4.4	Au/FeO _x Nanostructures Obtained by Annealing in Low Vacuum.	98
4.4.1	Fabrication of Samples Prepared in Low Vacuum.	98
4.4.2	Morphological Characterization of Samples Prepared in Low Vacuum.	100
4.4.3	Confocal Raman Characterization of Samples Prepared in Low Vacuum.	105
4.4.4	Optical Characterization of Samples Prepared in Low Vacuum.	113
4.5	Conclusions.	114
	References	114

5	Combination of Surface Plasmon Resonance and X-Ray Absorption Spectroscopies. Experimental Setup	119
5.1	Introduction	119
5.2	Description of Experimental Setup	120
5.2.1	Alignment of the Beams	123
5.2.2	Spot Size of the Beams	125
5.3	Resolution of the Experimental Setup	125
5.3.1	Reproducibility of SPR Spectra	126
5.3.2	Reproducibility of XAS Spectra	126
5.4	Capabilities of the Experimental Setup	127
5.4.1	Study of SPR upon X-Ray Irradiation	127
5.4.2	Experimental Setup to Study Instantaneous Effects	131
5.4.3	XAS Measurements upon Surface Plasmon Excitation	132
5.5	Conclusions	133
	References	134
6	In-Situ Study of Glasses Irradiated with X-rays by Surface Plasmon Resonance	135
6.1	Introduction	135
6.2	Fabrication of Samples	137
6.3	Experimental Details	137
6.4	Study of Soda-Lime Glasses by SPR-XAS Setup	137
6.5	Study of Silica Glasses by SPR-XAS Setup	147
6.6	Conclusions	152
	References	153
7	Study of Co-Phthalocyanines Irradiated with X-Rays by Surface Plasmon Resonance	155
7.1	Introduction	155
7.2	Fabrication of Samples	157
7.3	Experimental Details	158
7.4	Study of Co-Phthalocyanines by SPR-XAS Setup	159
7.4.1	SPR of Au Thin Films Irradiated with X-Rays	159
7.4.2	SPR of CoPc/Au Samples Irradiated with X-Rays	161
7.5	Raman Spectroscopy of CoPc/Au Samples Irradiated with X-Rays	168
7.6	Conclusions	174
	References	175
8	Conclusions	177
	Appendix A: Estimation of Changes in the SPR Curve upon X-ray Irradiation	181

Modified Au-Based Nanomaterials Studied by Surface
Plasmon Resonance Spectroscopy

Rubio, A.S.

2015, XIX, 183 p. 143 illus., 21 illus. in color., Hardcover
