

Contents

Keynote Presentations

Physics of the Medical Record: Handling Time in Health Record Studies	3
<i>George Hripcsak</i>	
Contextualisation of Biomedical Knowledge Through Large-Scale Processing of Literature, Clinical Narratives and Social Media	7
<i>Goran Nenadic</i>	

Process Mining and Phenotyping

An Active Learning Framework for Efficient Condition Severity Classification	13
<i>Nir Nissim, Mary Regina Boland, Robert Moskovitch, Nicholas P. Tattonetti, Yuval Elovici, Yuval Shahar, and George Hripcsak</i>	
Predictive Monitoring of Local Anomalies in Clinical Treatment Processes	25
<i>Zhengxing Huang, Jose M. Juarez, Wei Dong, Lei Ji, and Huilong Duan</i>	
Mining Surgery Phase-Related Sequential Rules from Vertebroplasty Simulations Traces	35
<i>Ben-Manson Toussaint and Vanda Luengo</i>	
Data Driven Order Set Development Using Metaheuristic Optimization	47
<i>Yiye Zhang and Rema Padman</i>	
Conceptual Modeling of Clinical Pathways: Making Data and Processes Connected	57
<i>Carlo Combi, Barbara Oliboni, and Alberto Gabrieli</i>	

Data Mining and Machine Learning

Distributed Learning to Protect Privacy in Multi-centric Clinical Studies	65
<i>Andrea Damiani, Mauro Vallati, Roberto Gatta, Nicola Dinapoli, Arthur Jochems, Timo Deist, Johan van Soest, Andre Dekker, and Vincenzo Valentini</i>	

Mining Hierarchical Pathology Data Using Inductive Logic Programming	76
<i>Tim Op De Beéck, Arjen Hommersom, Jan Van Haaren, Maarten van der Heijden, Jesse Davis, Peter Lucas, Lucy Overbeek, and Iris Nagtegaal</i>	
What if Your Floor Could Tell Someone You Fell? A Device Free Fall Detection Method	86
<i>Roberto Luis Shinmoto Torres, Asanga Wickramasinghe, Viet Ninh Pham, and Damith Chinthana Ranasinghe</i>	
Domain Knowledge Based Hierarchical Feature Selection for 30-Day Hospital Readmission Prediction	96
<i>Sandro Radovanovic, Milan Vukicevic, Ana Kovacevic, Gregor Stiglic, and Zoran Obradovic</i>	
A Genomic Data Fusion Framework to Exploit Rare and Common Variants for Association Discovery	101
<i>Simone Marini, Ivan Limongelli, Ettore Rizzo, Tan Da, and Riccardo Bellazzi</i>	
Collaborative Filtering for Estimating Health Related Utilities in Decision Support Systems	106
<i>Enea Parimbelli, Silvana Quaglini, Riccardo Bellazzi, and John H. Holmes</i>	
Temporal Data Mining	
Updating Stochastic Networks to Integrate Cross-Sectional and Longitudinal Studies	113
<i>Allan Tucker and Yuanxi Li</i>	
Optimal Sub-sequence Matching for the Automatic Prediction of Surgical Tasks	123
<i>Germain Forestier, François Petitjean, Laurent Riffaud, and Pierre Jannin</i>	
On the Advantage of Using Dedicated Data Mining Techniques to Predict Colorectal Cancer	133
<i>Reinier Kop, Mark Hoogendoorn, Leon M.G. Moons, Mattijs E. Numans, and Annette ten Teije</i>	
Identifying Chemotherapy Regimens in Electronic Health Record Data Using Interval-Encoded Sequence Alignment	143
<i>Haider Syed and Amar K. Das</i>	

An Evaluation Framework for the Comparison of Fine-Grained Predictive Models in Health Care	148
<i>Ward R.J. van Breda, Mark Hoogendoorn, A.E. Eiben, and Matthias Berking</i>	
A Model for Cross-Platform Searches in Temporal Microarray Data	153
<i>Guenter Tusch, Olvi Tole, and Mary Ellen Hoinski</i>	

Uncertainty and Bayesian Networks

Risk Assessment for Primary Coronary Heart Disease Event Using Dynamic Bayesian Networks.....	161
<i>Kalia Orphanou, Athena Stassopoulou, and Elpida Keravnou</i>	
Uncertainty Propagation in Biomedical Models	166
<i>Andrea Franco, Marco Correia, and Jorge Cruz</i>	
A Bayesian Network for Probabilistic Reasoning and Imputation of Missing Risk Factors in Type 2 Diabetes	172
<i>Francesco Sambo, Andrea Facchinetti, Liisa Hakaste, Jasmina Kravic, Barbara Di Camillo, Giuseppe Fico, Jaakko Tuomilehto, Leif Groop, Rafael Gabriel, Tuomi Tiinamaija, and Claudio Cobelli</i>	
Causal Discovery from Medical Data: Dealing with Missing Values and a Mixture of Discrete and Continuous Data	177
<i>Elena Sokolova, Perry Groot, Tom Claassen, Daniel von Rhein, Jan Buitelaar, and Tom Heskes</i>	
Modeling Coronary Artery Calcification Levels from Behavioral Data in a Clinical Study	182
<i>Shuo Yang, Kristian Kersting, Greg Terry, Jefferey Carr, and Sriraam Natarajan</i>	
Running Genome Wide Data Analysis Using a Parallel Approach on a Cloud Platform	188
<i>Andrea Demartini, Davide Capozzi, Alberto Malovini, and Riccardo Bellazzi</i>	

Text Mining

Extracting Adverse Drug Events from Text Using Human Advice	195
<i>Phillip Odom, Vishal Banger, Tushar Khot, David Page, and Sriraam Natarajan</i>	
An Analysis of Twitter Data on E-cigarette Sentiments and Promotion	205
<i>Andreea Kamiana Godea, Cornelia Caragea, Florin Adrian Bulgarov, and Suhasini Ramisetty-Mikler</i>	

Determining User Similarity in Healthcare Social Media Using Content Similarity and Structural Similarity	216
<i>Ling Jiang and Christopher C. Yang</i>	
Biomedical Concepts Extraction Based on Possibilistic Network and Vector Space Model	227
<i>Wiem Chebil, Lina Fatima Soualmia, Mohamed Nazih Omri, and Stéfan Jacques Darmoni</i>	
Answering PICO Clinical Questions: A Semantic Graph-Based Approach	232
<i>Eya Znaidi, Lynda Tamine, and Chiraz Latiri</i>	
Semantic Analysis and Automatic Corpus Construction for Entailment Recognition in Medical Texts	238
<i>Asma Ben Abacha, Duy Dinh, and Yassine Mrabet</i>	
Automatic Computing of Global Emotional Polarity in French Health Forum Messages	243
<i>Natalia Grabar and Loïc Dumonet</i>	
Automatic Symptom Extraction from Texts to Enhance Knowledge Discovery on Rare Diseases	249
<i>Jean-Philippe Métivier, Laurie Serrano, Thierry Charnois, Bertrand Cuissart, and Antoine Widlöcher</i>	

Prediction in Clinical Practice

A Composite Model for Classifying Parotid Shrinkage in Radiotherapy Patients Using Heterogeneous Data	257
<i>Marco Pota, Elisa Scalco, Giuseppe Sanguineti, Maria Luisa Belli, Giovanni Mauro Cattaneo, Massimo Esposito, and Giovanna Rizzo</i>	
Feasibility of Spirography Features for Objective Assessment of Motor Symptoms in Parkinson's Disease	267
<i>Aleksander Sadikov, Jure Žabkar, Martin Možina, Vida Groznik, Dag Nyholm, and Mevludin Memedi</i>	
Using Multivariate Sequential Patterns to Improve Survival Prediction in Intensive Care Burn Unit	277
<i>Isidoro J. Casanova, Manuel Campos, Jose M. Juarez, Antonio Fernandez-Fernandez-Arroyo, and Jose A. Lorente</i>	
A Heterogeneous Multi-Task Learning for Predicting RBC Transfusion and Perioperative Outcomes	287
<i>Che Ngufor, Sudhindra Upadhyaya, Dennis Murphree, Nageswar Madde, Daryl Kor, and Jyotishman Pathak</i>	

Comparison of Probabilistic versus Non-probabilistic Electronic Nose Classification Methods in an Animal Model	298
<i>Camilla Colombo, Jan Hendrik Leopold, Lieuwe D.J. Bos, Riccardo Bellazzi, and Ameen Abu-Hanna</i>	

Knowledge Representation and Guidelines

Detecting New Evidence for Evidence-Based Guidelines Using a Semantic Distance Method	307
<i>Qing Hu, Zhisheng Huang, Annette ten Teije, and Frank van Harmelen</i>	

Analyzing Recommendations Interactions in Clinical Guidelines: Impact of Action Type Hierarchies and Causation Beliefs	317
<i>Veruska Zamborlini, Marcos da Silveira, Cedric Pruski, Annette ten Teije, and Frank van Harmelen</i>	

A General Approach to Represent and Query Now-Relative Medical Data in Relational Databases	327
<i>Luca Anselma, Luca Piovesan, Abdul Sattar, Bela Stantic, and Paolo Terenziani</i>	

Temporal Conformance Analysis of Clinical Guidelines Execution	332
<i>Matteo Spiotta, Paolo Terenziani, and Daniele Theseider Dupré</i>	

Combining Decision Support System-Generated Recommendations with Interactive Guideline Visualization for Better Informed Decisions	337
<i>Lucia Sacchi, Enea Parimbelli, Silvia Panzarasa, Natalia Viani, Elena Rizzo, Carlo Napolitano, Roxana Ioana Budasu, and Silvana Quaglini</i>	

Author Index	343

Artificial Intelligence in Medicine

15th Conference on Artificial Intelligence in Medicine,
AIME 2015, Pavia, Italy, June 17-20, 2015. Proceedings

Holmes, J.H.; Bellazzi, R.; Sacchi, L.; Peek, N. (Eds.)

2015, XVI, 345 p. 76 illus., Softcover

ISBN: 978-3-319-19550-6
