

Contents

Part I Foundations of CogInfoCom

1	Emergence of CogInfoCom in Science and Technology	3
1.1	What Is CogInfoCom?	4
1.2	Scientific Priming Effects	5
1.2.1	Convergence from a General Perspective	5
1.2.2	Convergence from an Infocommunications Perspective ..	7
1.3	Technological Priming Effects.....	8
2	Definitions, Concepts and Assumptions	13
2.1	Defining CogInfoCom	13
2.2	Concepts Emerging from CogInfoCom	14
2.2.1	Mode of Communication.....	14
2.2.2	Type of Communication.....	15
2.3	Implicit and Explicit Assumptions	16
2.3.1	Levels of Merging and Entanglement	16
2.3.2	Levels of Cognitive Capability.....	18
2.3.3	An Emergent Concept of Information	21
2.3.4	Transitions from Operation to Functionality	21
3	ICT-Based Foundations of CogInfoCom	23
3.1	The Digital Convergence.....	23
3.2	From Telecommunications to Cognitive Infocommunications.....	25
3.2.1	Digitization of Separate Communication Sectors	26
3.2.2	Unification of Telecommunications: Electronic Communications.....	27
3.2.3	Expansion of Telecommunications: Infocommunications	28
3.2.4	Expanding Content Space: Cognitive Infocommunications	31
3.3	ICT, TIM, DES and CogInfoCom	32

Part II Research Directions Under CogInfoCom

4	Synergies Between CogInfoCom and Other Fields	39
4.1	Affective Computing	40
4.2	Augmented Cognition	41
4.3	Body Area Networks	43
4.4	Brain-Computer Interfaces	44
4.5	Cognitive Informatics	45
4.6	Cognitive Networks for Future Internet	45
4.7	Human-Computer Interaction and Multimodal Interaction	47
4.8	Sensory Substitution	50
4.9	Social Signal Processing	51
4.10	Virtual and Augmented Avatars	52
4.11	Virtual and Augmented Reality	54
5	CogInfoCom-Driven Research Areas	57
5.1	CogInfoCom Channels	57
5.2	Speechability	59
5.3	Socio-Cognitive ICT	60
5.4	Common Features and Techniques	62
5.4.1	Icon-Based Approaches and Applications	63
5.4.2	Context-Based Approaches and Applications	66
5.4.3	Pattern-Based Approaches and Applications	69
5.5	A Summary of Common Concepts	71
6	Novel Research Initiatives	73
6.1	The Virtual Collaboration Arena	74
6.1.1	Affordances for Multi-user Collaboration	75
6.1.2	Synergies Supported by the VirCA Platform	76
6.2	Augmented Virtual Reality Mediated Neuroscience Research	77
6.3	Ergonomics of Augmented Virtual Collaboration	78
6.3.1	Adaptation of Rasmussen and Reason's Framework of Human Errors to VirCA	79
6.3.2	Types of Rule-Based Human Errors Identified	79
6.4	Ethologically Informed CogInfocom (EtoCom)	80
6.4.1	CogInfoCom Tanglefaces and Engines	81
6.4.2	Examples: The EtoMotor and Its Applications	82
6.5	CogInfoCom-Aided Industrial Engineering	91
6.5.1	Design Issues Relevant to Cognitive Networks	92
6.5.2	Industrial Robotics and Production Management	92
6.5.3	Industrial Capabilities of VirCA	93
6.6	Mathability	95
6.6.1	Granular and Analytical Representations	97
6.6.2	Example Application: Human-Aided Resolution of Linear Functional Equations	98

Part III CogInfoCom Channels

7	Structure of Sensory Signals: Icons and Messages	105
7.1	Motivations Behind CogInfoCom Channels	105
7.2	The Need for a Unified View of Communication: Overlaps, Ambiguities, and Contradictions	107
7.3	Unified Structure of Sensory Signals: Streams, Icons and Messages	109
7.3.1	CogInfoCom Streams	110
7.3.2	CogInfoCom Icons	111
7.3.3	CogInfoCom Messages	114
7.4	Icons and Messages: A Summary of Key Points	116
8	CogInfoCom Channels: Perceptual Unification of Representation and Meaning	119
8.1	CogInfoCom Channels and Relevant Concepts	120
8.1.1	CogInfoCom Message Generated Perceptual Concepts ..	120
8.1.2	Definition of CogInfoCom Channels	121
8.1.3	A Novel Interpretation of the Concept of Modality	122
8.2	Formal Representation of CogInfoCom Channel Parameters	123
8.2.1	Nomenclature and Notations	123
8.2.2	Mathematical Background	125
8.2.3	Generative Model of CogInfoCom Channels	126
8.3	Design Challenges Behind CogInfoCom Channels: A Summary of Key Points	127
9	Mapping Meaning onto CogInfoCom Channels	129
9.1	Concept Algebra Based Background	129
9.1.1	Key Definitions in the OAR Model	130
9.1.2	Message Generated Perceptual Concepts in Terms of OAR	131
9.1.3	Tools for Analogy: Interactive Concepts	134
9.2	Concept Mapping Techniques as Inference in OAR	134
9.2.1	Direct Mapping	135
9.2.2	Analogy-Based Mapping	136
9.2.3	A Note on the Joint Use of Mapping Techniques	138
9.3	Future Perspectives for Automated Mapping	139
10	Tunability of CogInfoCom Channels	141
10.1	Preliminary Discussions	141
10.2	Mathematical Background	144
10.2.1	Tensor Product Form of Multivariate Functions	144
10.2.2	HOSVD-Based Canonical Form of Discretized Multivariate Functions	145
10.3	Generic Tuning Model for CogInfoCom Channels	146
10.4	The Spiral Discovery Method (SDM)	147

10.5	Implementation of SDM	151
10.6	Usability of SDM	152
11	Temporal Aspects of CogInfoCom Channel Design	157
11.1	Challenges Behind Temporal Aspects.....	157
11.2	Aspects of Low-Level Biological Communication	159
11.2.1	CogInfoCom Cues and Signals	160
11.2.2	Cues, Signals and Messages in Past Research	162
11.3	Aspects of High-Level Human Communication	162
11.3.1	Volition	164
11.3.2	Directness	165
11.3.3	Discussion	166
11.4	Putting It All Together: Progressive CogInfoCom Channels.....	166
 Part IV Future Perspectives of CogInfoCom		
12	Cognitive Capabilities in the Future Internet	173
12.1	Challenges of Today's Internet	173
12.2	Future Internet Visions	175
12.3	Recent Future Internet Capabilities.....	178
12.4	Clustering Future Internet Research Themes	179
12.4.1	Cluster 1: Internet Basic Research (Internet Science)	181
12.4.2	Cluster 2: Future Internet Modeling, Analysis and Design	181
12.4.3	Cluster 3: Future Internet Network Architectures.....	181
12.4.4	Cluster 4: Data and Content Technologies	182
12.4.5	Cluster 5: 3D Internet and Cognitive Infocommunications	183
12.4.6	Cluster 6: Internet of Things (IoT).....	183
12.4.7	Cluster 7: Cyber-Physical Systems and Applications.....	184
12.4.8	Cluster 8: Future Internet Based Community Applications.....	184
12.4.9	Cluster 9: Experimentation, Standardization, Regulation	184
13	Towards a Cognitive Internet Ecosystem	187
13.1	Reshaping Digital Ecosystems.....	187
13.2	A Long-Term Vision: Cognitive Internet Ecosystem	190
