

Contents

1	Introduction to the Standard Model and Jet Vetoing	1
1.1	History	1
1.2	Quantum Electro- and Chromodynamics	6
1.2.1	QCD	8
1.3	Electroweak and Higgs Sectors	10
1.3.1	The Standard Model Higgs	12
1.4	The Physics of Hadron Colliders	16
1.4.1	Next-to-Leading Order Corrections	19
1.5	Monte Carlo Event Generators	20
1.5.1	Matrix Elements	20
1.5.2	Parton Showers	20
1.5.3	Hadronisation and Underlying Event	24
1.5.4	Event Generators	24
1.5.5	Theoretical Uncertainties	25
1.5.6	Jets	25
1.6	Jet vetoing	27
	References	28
2	Experimental Apparatus	33
2.1	The Large Hadron Collider	33
2.1.1	Design	33
2.1.2	Performance	35
2.2	The ATLAS Detector	36
2.2.1	The Inner Detector	37
2.2.2	The Calorimeters	39
2.2.3	The Muon Spectrometer	40
2.2.4	Trigger and Data Acquisition	41
	References	43

3	Reconstructing Physics Objects	45
3.1	Charged Particle Tracks	45
3.2	Primary Vertices	46
3.3	Electrons	46
3.3.1	Reconstruction	46
3.3.2	Identification	47
3.4	Muons	48
3.4.1	Reconstruction	48
3.4.2	Identification	48
3.5	Jets	49
3.5.1	b -tagging	51
3.6	Missing Transverse Energy	51
	References	53
4	Event-Filter Muon Isolation	55
4.1	Introduction	55
4.2	The Need for Isolated Triggers	55
4.3	Implementation and Performance	56
4.3.1	Pile-up Dependence	60
4.4	Summary	62
	Reference	62
5	Jet Vetoing in Top-Antitop Events	63
5.1	Introduction and Motivation	63
5.1.1	Variable Definition	64
5.2	Data and Monte Carlo Samples	65
5.3	Object and Event Selection	68
5.3.1	Muons	68
5.3.2	Electrons	68
5.3.3	Jets	69
5.3.4	Missing Transverse Energy	69
5.3.5	Event Selection Requirements	69
5.4	Backgrounds	71
5.4.1	Fake Lepton Background	71
5.4.2	Other Backgrounds	71
5.5	Corrections to the Simulation	71
5.6	Detector-Level Data and MC Comparisons	73
5.7	Correction for Detector Effects	75
5.8	Systematic Uncertainties	78
5.8.1	Jet Energy Scale	79
5.8.2	Uncertainties Due to Additional pp Interactions	80
5.8.3	Uncertainty in the b -Tagging	81
5.8.4	Uncertainty Due to Unfolding to Particle Level	82
5.8.5	Uncertainty Due to Background Contamination	86

5.8.6	Uncertainty Due to Lepton Efficiencies and Resolutions	88
5.8.7	Uncertainty Due to Jet Resolution and Efficiency	88
5.8.8	Summary of Systematic Uncertainties	90
5.9	Results	91
5.10	Impact.	94
	References.	99
6	Studies and Applications of Jet Vetoing in Boosted Topologies . . .	103
6.1	Identifying the Colour of TeV-Scale Resonances	103
6.1.1	Introduction	103
6.1.2	Simulation and Event Selection	105
6.1.3	Definition of the Jet Veto Region and the Jet Veto Efficiency	107
6.1.4	Extracting the Signal from Background	109
6.1.5	Extracting the Colour	112
6.1.6	Effect of Experimental and Theoretical Uncertainties	113
6.2	Dependency of Tagging Algorithms on the Event Colour Structure	116
6.2.1	Introduction	116
6.2.2	Boosted Top Reconstruction.	116
6.2.3	Basic Kinematic Features of the Signal Events	118
6.2.4	Dependence of Top-Tagging Efficiency on Event Colour Structure	118
6.2.5	Impact on Experimental Analyses	125
	References.	126
7	Measurements of Electroweak Z Boson + Dijet Production.	129
7.1	Introduction	129
7.2	Event and Object Reconstruction and Selection	130
7.2.1	Muons.	131
7.2.2	Electrons	131
7.2.3	Jets	131
7.3	Theoretical Predictions	132
7.3.1	Electroweak Signal Composition.	133
7.4	Monte Carlo Simulation.	134
7.4.1	Combination of QCD Z Samples	134
7.5	Differential Cross Section Measurements	136
7.5.1	Phase Space Definitions.	136
7.5.2	Distributions of Interest	138
7.5.3	Detector-Level Data and MC Comparisons.	139
7.5.4	Introduction to Bayesian Unfolding.	139
7.5.5	Bayesian Unfolding in This Analysis.	141

7.5.6	Extending the EWUnfolding Package to 2D	143
7.5.7	Selected Control Plots	144
7.5.8	Statistical Uncertainties and Correlations	146
7.5.9	Luminosity, Trigger and Lepton-Based Systematics. . .	148
7.5.10	Jet Energy-Based Systematic Uncertainties.	150
7.5.11	Pile-up and JVF Modelling Uncertainty.	151
7.5.12	Modelling Uncertainties and Unfolding Closure	153
7.5.13	Summaries of Systematic and Statistical Uncertainties	153
7.5.14	Unfolded Differential Cross Sections.	157
7.6	Electroweak Z_{jj} Signal Extraction and Cross Section.	165
7.6.1	Extraction Technique.	166
7.6.2	Experimental Systematic Uncertainties.	167
7.6.3	Theoretical Modelling of the Signal and Background	167
7.6.4	Uncertainty Due to Signal and Background Interference	169
7.6.5	Electroweak Fiducial Cross Section Results	170
7.7	Limits on Anomalous Triple Gauge Couplings	171
	References.	174
8	Conclusions	177

QCD Radiation in Top-Antitop and Z+Jets Final States
Precision Measurements at ATLAS

Joshi, K.

2015, XVI, 178 p. 97 illus., 63 illus. in color., Hardcover

ISBN: 978-3-319-19652-7
