Part I Concepts and Methods

1	Introduction	3
1.1	Optimization	3
1.2	A Short Survey of Metaheuristic Algorithms	4
1.3	The Formulation of Optimization Problems	5
1.3.1	Objective Function	5
1.3.2	Constraint Handling	6
1.3.3	Parameter Tuning of Metaheuristic Algorithm	6
1.4	Organization of the Present Book	7
	References.	9
2	Colliding Bodies Optimization Algorithms	11
2.1	Introduction	11
2.2	One-Dimensional Colliding Bodies Optimization	12
2.2.1	The Physical Laws of Collision	12
2.2.2	Mathematical Formulation of the CBO Algorithm.	14
2.2.3	The Features of the CBO Algorithm	20
2.2.4	The Features of CBO	26
2.3	Two-Dimensional Colliding Bodies Optimization	28
2.3.1	Formulation of the Two-Dimensional Collision.	29
2.3.2	The 2-Dimensional Version of the CBO Algorithm.	30
2.3.3	Numerical Examples	32
2.3.4	Discussions	36
	References.	37
3	Optimal Design of Truss Structures with Continuous Variables Using Colliding Bodies Optimization.	39
3.1	Introduction	39
3.2	CBO for Optimal Design of Truss Structures	40

3.3	Size Optimization of Truss Structures	41
3.3.1	Weight Minimization of Trusses Under Static Loads	41
3.3.2	Weight Minimization of Trusses Under Dynamic Frequency Constraints	53
3.3.3	Discussion	64
3.4	Simultaneously Size and Topology Optimization of Truss Structures	66
3.4.1	Topology Optimization Method	72
3.4.2	Numerical Examples of the Present Problem	73
3.4.3	Discussions	84
	References.	84
4	Optimal Design of Truss Structures with Discrete Variables Using Colliding Bodies Optimization.	87
4.1	Introduction	87
4.2	Discrete CBO Algorithm	87
4.2.1	The Coefficient of Restitution (COR)	88
4.3	Test Problems and Optimization Results	89
4.3.1	Planar 52-Bar Truss	89
4.3.2	Spatial 72-Bar Truss	93
4.3.3	Spatial 582-Bar Tower.	96
4.3.4	Planar 47-Bar Power Line	100
4.4	Discussions	103
	References.	104
 Part II Extensions and Applications		
5	Enhanced Versions of the CBO Algorithm.	107
5.1	Introduction	107
5.2	Enhanced Colliding Bodies Optimization for Design Problems with Continuous and Discrete Variables.	107
5.2.1	Optimization Algorithms	108
5.2.2	Validation of the ECBO	112
5.2.3	Discussions	139
5.3	A Hybrid CBO and PSO for Optimal Design of Truss Structures with Dynamic Constraints	139
5.3.1	Introduction	139
5.3.2	Formulation of Optimal Design of Structures	140
5.3.3	CBO-PSO Based Hybrid Optimization Algorithm	141

5.3.4	Numerical Examples	144
5.3.5	Discussions	154
5.3.6	Discussions	158
	References.	159
6	A Comparative Study of CBO and ECBO for Optimal	
	Design of Structures	161
6.1	Introduction	161
6.2	Structural Optimization	162
6.3	An Enhanced Colliding Bodies Optimization (ECBO)	164
6.3.1	A Brief Explanation of the CBO Algorithm	164
6.3.2	The ECBO Algorithm	165
6.4	Design Examples	167
6.4.1	The 25-bar Space Truss	168
6.4.2	The 72-bar Space Truss	169
6.4.3	The 3-bay 15-story Frame	170
6.4.4	The 3-bay 24-story Frame	175
6.5	Discussion	179
	References.	179
7	Optimum Design of Castellated Beams Utilizing	
	Colliding Bodies Optimization	181
7.1	Introduction	181
7.2	Design of Castellated Beams	183
7.2.1	Overall Beam Flexural Capacity	183
7.2.2	Beam Shear Capacity	183
7.2.3	Flexural and Buckling Strength of Web Post	185
7.2.4	Vierendeel Bending of Upper and Lower Tees	185
7.2.5	Deflection of Castellated Beam.	186
7.3	Optimum Design Problem of Castellated Beams	187
7.3.1	Design of Castellated Beam with Circular Opening	188
7.3.2	Design of Castellated Beam with Hexagonal Opening	189
7.4	The Colliding Bodies Optimization Method	190
7.4.1	The CBO Algorithm	190
7.5	Design Examples	191
7.5.1	Castellated Beam with 4 m Span	192
7.5.2	Castellated Beam with 8 m Span	193
7.5.3	Castellated Beam with 9 m Span	194
7.5.4	Discussion	197
	References.	197

8	Optimal Design of Concrete Structures Using Colliding Bodies Optimization	199
8.1	Introduction	199
8.2	Optimum Design of Reinforced Concrete Cantilever Retaining Walls	200
8.2.1	Design Variables of the Problem	201
8.2.2	Objective Function	201
8.2.3	DPSO Algorithm	202
8.2.4	Optimum Design Process	203
8.2.5	Numerical Example	205
8.2.6	Results and Discussion	207
8.2.7	Conclusions	207
8.3	Colliding Bodies Optimization for Design of Arch Dams with Frequency Limitations	213
8.3.1	Introduction	216
8.3.2	Geometrical Model of Arch Dam	217
8.3.3	Arch Dam Optimization Problems	219
8.3.4	Numerical Examples	222
8.3.5	Discussion	226
8.4	Optimum Cost Design of Reinforced Concrete One-Way Ribbed Slabs	228
8.4.1	Introduction	228
8.4.2	Problem Statement	229
8.4.3	Numerical Example	231
8.4.4	Discussions	234
	References	235
9	Domain Decomposition of Finite Element Models and Bandwidth Reduction of Sparse Matrices	237
9.1	Introduction	237
9.2	Optimal Domain Decomposition Using Colliding Bodies Optimization and k-Median Method	238
9.2.1	Introduction	238
9.2.2	Domain Decomposition Using k-Median Methodology	239
9.2.3	Numerical Examples	242
9.2.4	Results and Discussion	248
9.3	Bandwidth Reduction Using CBO and ECBO	251
9.3.1	Introduction	251
9.3.2	Problem Definition	252
9.3.3	Enhanced Colliding Bodies Optimization	253
9.3.4	Numerical Examples	254
9.3.5	Discussion	258
	References	258

10	Resource Allocation and Time-Cost Trade-Off	
	Using Colliding Bodies Optimization	261
10.1	Introduction	261
10.2	Problem Formulation	263
	10.2.1 Proposed MRC-DTCTP Model	263
	10.2.2 Mathematical Model of MRC-DTCTP	265
10.3	Metaheuristic Algorithms	266
	10.3.1 Charged System Search	266
	10.3.2 Colliding Body Optimization	269
10.4	Model Application and Discussion of the Results	269
	10.4.1 Case Study 1: Model Verification	270
	10.4.2 Case Study 2: Real Project	271
10.5	Discussion	275
	References	276
	Appendix: CBO and ECBO Codes in Matlab and C++	279

Colliding Bodies Optimization

Extensions and Applications

Kaveh, A.; Mahdavi, V.R.

2015, XI, 284 p. 162 illus., 106 illus. in color., Hardcover
