## Invited Papers

Simulation of Flow in Fractured Poroelastic Media: A Comparison of Different Discretization Approaches. . . . .	3
<i>I. Ambartsumyan, E. Khattatov, I. Yotov, and P. Zunino</i>	
A Transparent Boundary Condition for an Elastic Bottom in Underwater Acoustics . . . . .	15
<i>Anton Arnold and Matthias Ehrhardt</i>	
Well-Posedness in Hölder Spaces of Elliptic Differential and Difference Equations. . . . .	25
<i>Allaberen Ashyralyev</i>	
Operator Semigroups for Convergence Analysis . . . . .	38
<i>Petra Csomós, István Faragó, and Imre Fekete</i>	
The Power of Trefftz Approximations: Finite Difference, Boundary Difference and Discontinuous Galerkin Methods; Nonreflecting Conditions and Non-Asymptotic Homogenization . . . . .	50
<i>Fritz Kretzschmar, Sascha M. Schnepf, Herbert Egger, Farzad Ahmadi, Nabil Nowak, Vadim A. Markel, and Igor Tsukerman</i>	
On Extension of Asymptotic Comparison Principle for Time Periodic Reaction-Diffusion-Advection Systems with Boundary and Internal Layers. . .	62
<i>Nikolay Nefedov and Aleksei Yagremtsev</i>	
The Finite Difference Method for Boundary Value Problem with Singularity . . . . .	72
<i>Viktor A. Rukavishnikov and Elena I. Rukavishnikova</i>	
Superconvergence of Some Linear and Quadratic Functionals for Higher-Order Finite Elements . . . . .	84
<i>Vladimir Shaydurov and Tianshi Xu</i>	
Time Step for Numerically Solving Parabolic Problems . . . . .	96
<i>Petr N. Vabishchevich</i>	
Recent Advances in Numerical Solution of HJB Equations Arising in Option Pricing . . . . .	104
<i>Song Wang and Wen Li</i>	

Applications of Numerical Methods for Stochastic Controlled Switching Diffusions with a Hidden Markov Chain: Case Studies on Distributed Power Management and Communication Resource Allocation . . . . .	117
<i>Zhixin Yang, Le Yi Wang, George Yin, Qing Zhang, and Hongwei Zhang</i>	

Error Estimates of the Crank-Nicolson-Polylinear FEM with the Discrete TBC for the Generalized Schrödinger Equation in an Unbounded Parallelepiped . . . . .	129
<i>Alexander Zlotnik</i>	

**Contributed Papers**

Difference Schemes for Delay Parabolic Equations with Periodic Boundary Conditions . . . . .	145
<i>Allaberen Ashyralyev and Deniz Agirseven</i>	

Some Results of FEM Schemes Analysis by Finite Difference Method . . . . .	153
<i>Dmitry T. Chekmarev</i>	

Application of Finite Difference TVD Methods in Hypersonic Aerodynamics. . . . .	161
<i>Yury Dimitrienko, Mikhail Koryakov, and Andrey Zakharov</i>	

Finite Difference Equations for Neutron Flux and Importance Distribution in 3D Heterogeneous Reactor . . . . .	169
<i>A. Elshin</i>	

Matrix-Free Iterative Processes for Implementation of Implicit Runge–Kutta Methods . . . . .	177
<i>Boris Faleichik and Ivan Bondar</i>	

Simulation of Technogenic and Climatic Influences in Permafrost for Northern Oil Fields Exploitation . . . . .	185
<i>M.Yu. Filimonov and N.A. Vaganova</i>	

Iterative Implicit Methods for Solving Nonlinear Dynamical Systems: Application of the Levitron . . . . .	193
<i>Jürgen Geiser, Karl Felix Lüskow, and Ralf Schneider</i>	

Modeling Textile Fabric Used in Pest Control with a 3 Scale Domain Decomposition Method . . . . .	201
<i>Tineke Goessens, Benny Malengier, and Lieva Van Langenhove</i>	

The Theory and Applications of the SMIF Method for Correct Mathematical Modeling of the Incompressible Fluid Flows. . . . .	209
<i>Valentin Gushchin and Pavel Matyushin</i>	

Determination of the Time-Dependent Thermal Conductivity in the Heat Equation with Spacewise Dependent Heat Capacity . . . . .	217
<i>M.S. Hussein and D. Lesnic</i>	
Inverse Problems of Simultaneous Determination of the Time-Dependent Right-Hand Side Term and the Coefficient in a Parabolic Equation . . . . .	225
<i>Vitaly L. Kamynin</i>	
Effectiveness of the Parallel Implementation of the FEM for the Problem of the Surface Waves Propagation . . . . .	233
<i>Evgeniya Karepova and Ekaterina Dementyeva</i>	
Splitting Scheme for Poroelasticity and Thermoelasticity Problems . . . . .	241
<i>Alexandr E. Kolesov, Petr N. Vabishchevich, Maria V. Vasilyeva, and Victor F. Gornov</i>	
Numerical Investigation of Adaptive Immune Response to Viral Infection . . .	249
<i>Mikhail Kolev, Ana Markovska, and Boiana Garkova</i>	
Efficient Application of the Two-Grid Technique for Solving Time-Fractional Non-linear Parabolic Problem . . . . .	257
<i>Miglena N. Koleva</i>	
Error Estimates of Four Level Conservative Finite Difference Schemes for Multidimensional Boussinesq Equation . . . . .	266
<i>Natalia Kolkovska</i>	
Positive Solutions for Boundary Value Problem of Nonlinear Fractional Differential Equation with $p$ -Laplacian Operator . . . . .	274
<i>Hongling Lu, Zhenlai Han, Chao Zhang, and Yan Zhao</i>	
Finite-Difference Simulation of Wave Propagation Through Prestressed Elastic Media . . . . .	282
<i>Egor Lys, Evgeniy Romenski, Vladimir Tcheverda, and Mikhail Epov</i>	
Modeling the Wind Influence on Acoustic-Gravity Propagation Waves in a Heterogeneous Earth-Atmosphere Model . . . . .	290
<i>B. Mikhailenko, A.A. Mikhailov, and G.V. Reshetova</i>	
Numerical Solutions of Fractional Differential Equations by Extrapolation . . .	299
<i>Kamal Pal, Fang Liu, and Yubin Yan</i>	
Finite Difference Method for Two-Sided Space-Fractional Partial Differential Equations . . . . .	307
<i>Kamal Pal, Fang Liu, Yubin Yan, and Graham Roberts</i>	
Spline Collocation for Fractional Integro-Differential Equations . . . . .	315
<i>Arvet Pedas, Enn Tamme, and Mikk Vikerpuur</i>	

Rational Spectral Collocation Method for Pricing American Vanilla and Butterfly Spread Options . . . . .	323
<i>Edson Pindza, Kailash C. Patidar, and Edgard Ngounda</i>	
Riemann Problem for First-Order Partial Equations Without the Convexity of a State Functions. . . . .	332
<i>Mahir Rasulov and S. Ozgur Ulas</i>	
Numerical Modeling of a Block Medium as an Orthotropic Cosserat Continuum . . . . .	340
<i>Oxana V. Sadovskaya, Vladimir M. Sadovskii, and Mariya A. Pokhabova</i>	
Computational Algorithm for Modeling Viscoelastic Waves in the Kelvin–Voigt Medium . . . . .	348
<i>Vladimir M. Sadovskii</i>	
Investigating the Dynamics of Traffic Flow on a Highway in a Class of Discontinuous Functions . . . . .	356
<i>Bahaddin Sinsoysal, Hakan Bal, and E. Ilhan Sahin</i>	
Numerical Simulation of Thermoelasticity Problems on High Performance Computing Systems. . . . .	364
<i>Petr V. Sivtsev, Petr N. Vabishchevich, and Maria V. Vasilyeva</i>	
Multifrontal Hierarchically Solver for 3D Discretized Elliptic Equations. . . . .	371
<i>Sergey Solovyeu</i>	
Solving the 3D Elasticity Problems by Rare Mesh FEM Scheme . . . . .	379
<i>S.V. Spirin, Dmitry T. Chekmarev, and A.V. Zhidkov</i>	
Computational Algorithm for Identification of the Right-Hand Side of the Parabolic Equation. . . . .	385
<i>Petr N. Vabishchevich, Maria V. Vasilyeva, and Vasily I. Vasilyev</i>	
Simulation and Numerical Investigation of Temperature Fields in an Open Geothermal System. . . . .	393
<i>N.A. Vaganova and M.Yu. Filimonov</i>	
Modeling of Annual Heat and Moisture Diffusion in a Multilayer Wall . . . . .	400
<i>G.P. Vasilyev, V.A. Lichman, and N.V. Peskov</i>	
Asymptotic-Numerical Method for Moving Fronts in Two-Dimensional R-D-A Problems . . . . .	408
<i>Vladimir Volkov, Nikolay Nefedov, and Eugene Antipov</i>	
A New Approach to Constructing Splitting Schemes in Mixed FEM for Heat Transfer: A Priori Estimates. . . . .	417
<i>Kirill Voronin and Yuri Laevsky</i>	

The Analysis of Lagrange Interpolation for Functions with a Boundary Layer Component . . . . .	426
<i>Alexander Zadorin</i>	
<b>Author Index</b> . . . . .	433

Finite Difference Methods, Theory and Applications  
6th International Conference, FDM 2014, Lozenetz,  
Bulgaria, June 18-23, 2014, Revised Selected Papers  
Dimov, I.; Faragó, I.; Vulkov, L. (Eds.)  
2015, XI, 434 p. 105 illus., Softcover  
ISBN: 978-3-319-20238-9
