

Contents

1	Mechanisms of Nanoporous Alumina Formation and Self-organized Growth	1
	Zhiyuan Ling and Yi Li	
1.1	Introduction	2
1.2	Types of Anodic Aluminum Oxides (AAO) Membranes	2
1.2.1	Nonporous AAO Membranes	2
1.2.2	Porous AAO Membranes	3
1.3	Unit Cell Structure of Porous AAO Membranes	5
1.3.1	Unit Cell Structure	6
1.3.2	Chemical Composition of Unit Cell	7
1.4	Chemical Reactions During the Steady-State Growth of Porous AAO Membranes	9
1.5	Steady-State Anodization	13
1.5.1	Mild Anodization	13
1.5.2	Hard Anodization	15
1.5.3	The Maximum Anodization Voltage and the Breakdown Process	17
1.6	Unsteady-State Anodization	20
1.6.1	Rule of Branched Channel Growth	20
1.6.2	Competitive Growth Process	21
1.7	Microstructural Morphologies of Porous AAO	24
1.8	Conclusion	28
	References	29
2	Theoretical Pore Growth Models for Nanoporous Alumina	31
	Chuan Cheng and A.H.W. Ngan	
2.1	Introduction of Nanoporous Alumina	31
2.2	Review of Pore Growth Models	35
2.2.1	Electric Field Assisted Pore Growth	35
2.2.2	Mechanical Stress Assisted Pore Growth	37

2.3	A Kinetics Model for Pore Channel Growth in Nanoporous Alumina	38
2.3.1	Electric Potential Distribution Within AAO	39
2.3.2	Ion Migration	42
2.3.3	Interface Movement Equations	48
2.4	Simulation Results and Discussion	50
2.5	Outlook	55
2.6	Conclusions	55
	References.	55
3	Synthesis of Nanoporous Anodic Alumina by Anodic Oxidation of Low Purity Aluminum Substrates	61
	Leszek Zaraska, Ewa Wierzbicka, Elżbieta Kurowska-Tabor and Grzegorz D. Sulka	
3.1	Introduction	61
3.2	Synthesis of Porous Alumina on Low Purity Al Substrates. . .	65
3.2.1	Al Substrate Pre-treatment	65
3.2.2	Anodic Alumina Growth	68
3.3	Practical Applications of AAO from Low Purity Substrates	92
3.3.1	Template-Assisted Fabrication of Nanowire Arrays.	92
3.3.2	Nanoporous Capsules for Biofiltration and Drug Delivery.	94
3.3.3	Coloring of the Anodic Film.	95
3.3.4	Catalyst Supports	97
3.3.5	Fabrication of Superhydrophobic Surfaces	98
3.3.6	Large Scale Fabrication of Nanostructured Low-Cost Aluminum Foil.	98
	References.	101
4	Structural Engineering of Porous Anodic Aluminum Oxide (AAO) and Applications	107
	Woo Lee	
4.1	Introduction	108
4.2	Structure of Porous Anodic Aluminum Oxide (AAO) and Its Formation	109
4.3	Self-ordered Porous Anodic Aluminum Oxide (AAO)	112
4.3.1	Mild Anodization (MA)	112
4.3.2	Hard Anodization (HA)	115

4.4	Structural Engineering of Porous AAO	118
4.4.1	Microstructuring of Porous AAO.	118
4.4.2	Control of the Arrangement and Shape of the Pores	119
4.4.3	Engineering of the Internal Pore Structure	121
4.5	Concluding Remarks	144
	References.	145
5	Soft and Hard Surface Manipulation of Nanoporous Anodic Aluminum Oxide (AAO)	155
	Abdul Mutalib Md Jani, Hanani Yazid, Anisah Shafiqah Habiballah, Abdul Hadi Mahmud and Dusan Losic	
5.1	Introduction	155
5.1.1	Soft Techniques	156
5.1.2	Hard Modifications	165
5.2	Concluding Remarks	176
	References.	177
6	Optical Properties of Nanoporous Anodic Alumina and Derived Applications	185
	Josep Ferré-Borrull, Elisabet Xifré-Pérez, Josep Pallarès and Lluís F. Marsal	
6.1	Introduction	185
6.2	Interaction of Light with Porous Anodic Aluminum Oxide . . .	186
6.2.1	Anodic Aluminum Oxide: The Host Material	186
6.2.2	Porous Anodic Aluminum Oxide as an Effective Medium	188
6.2.3	Photonic Properties: Interaction of Light with p-AAO Nanostructure.	192
6.3	Applications Based on the Optical Properties of Porous Anodic Aluminum Oxide.	197
6.3.1	Waveguides Based on Porous Anodic Aluminum Oxide.	198
6.3.2	Porous Anodic Aluminum Oxide for Surface-Enhanced Raman Spectroscopy Applications	200
6.3.3	Reflection Interference Spectroscopy	200
6.3.4	Photoluminescence-Based Applications of Porous Anodic Aluminum Oxide.	203
6.3.5	Porous Anodic Aluminum Oxide in Photon-Energy Conversion	206
6.3.6	Alternative Applications.	207
6.4	Concluding Remarks	209
	References.	210

7	Nanoporous Anodic Alumina for Optical Biosensing.	219
	Abel Santos and Tushar Kumeria	
7.1	Introduction	219
7.2	Structural Engineering of Nanoporous Anodic Alumina	221
7.3	Optical Biosensors Based on NAA Structures	230
7.3.1	Surface-Enhanced Raman Scattering (SERS).	231
7.3.2	Surface Plasmon Resonance (SPR)	234
7.3.3	Reflectometric Interference Spectroscopy (RIfS)	236
7.3.4	Photoluminescence Spectroscopy (PLS)	239
7.4	Conclusions	241
